μετάληψις

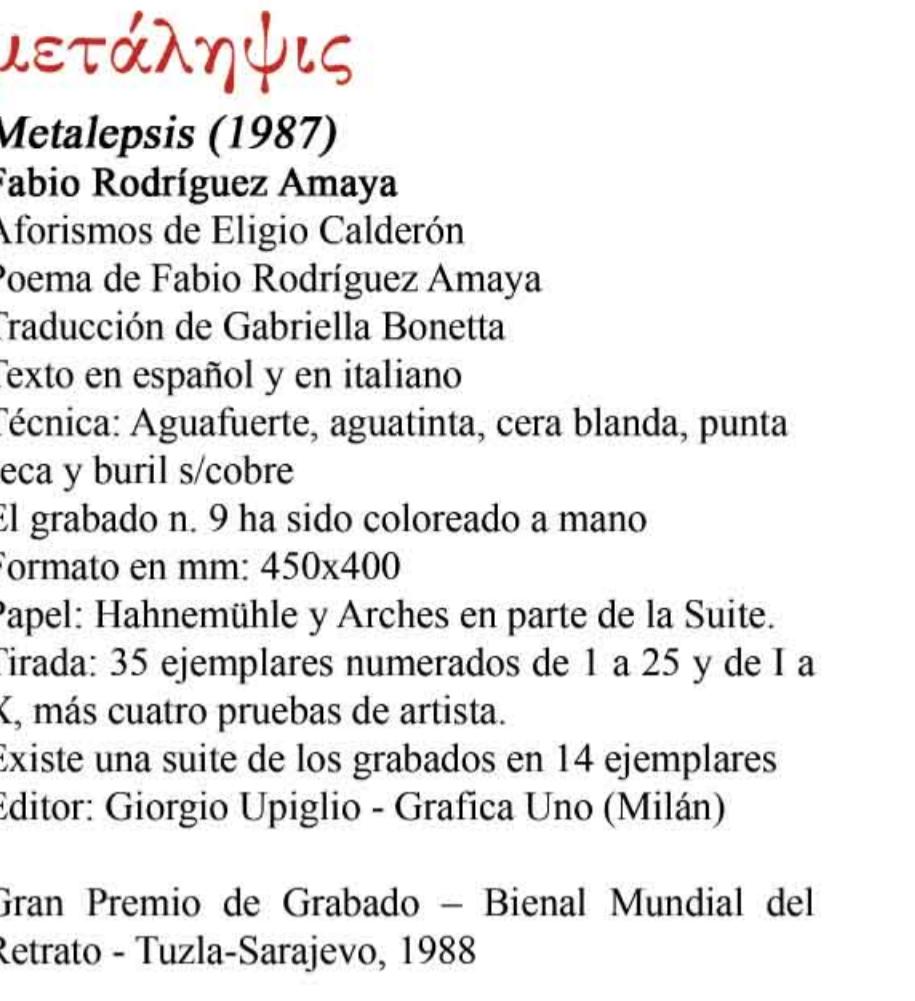

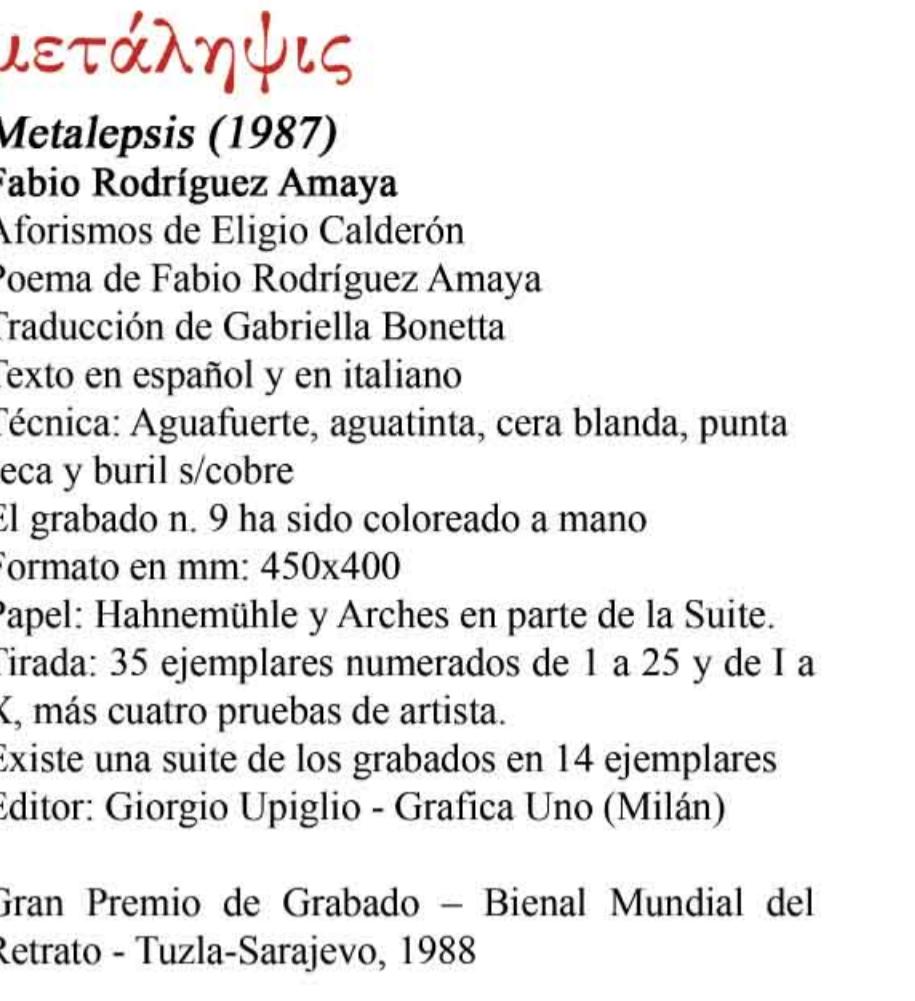

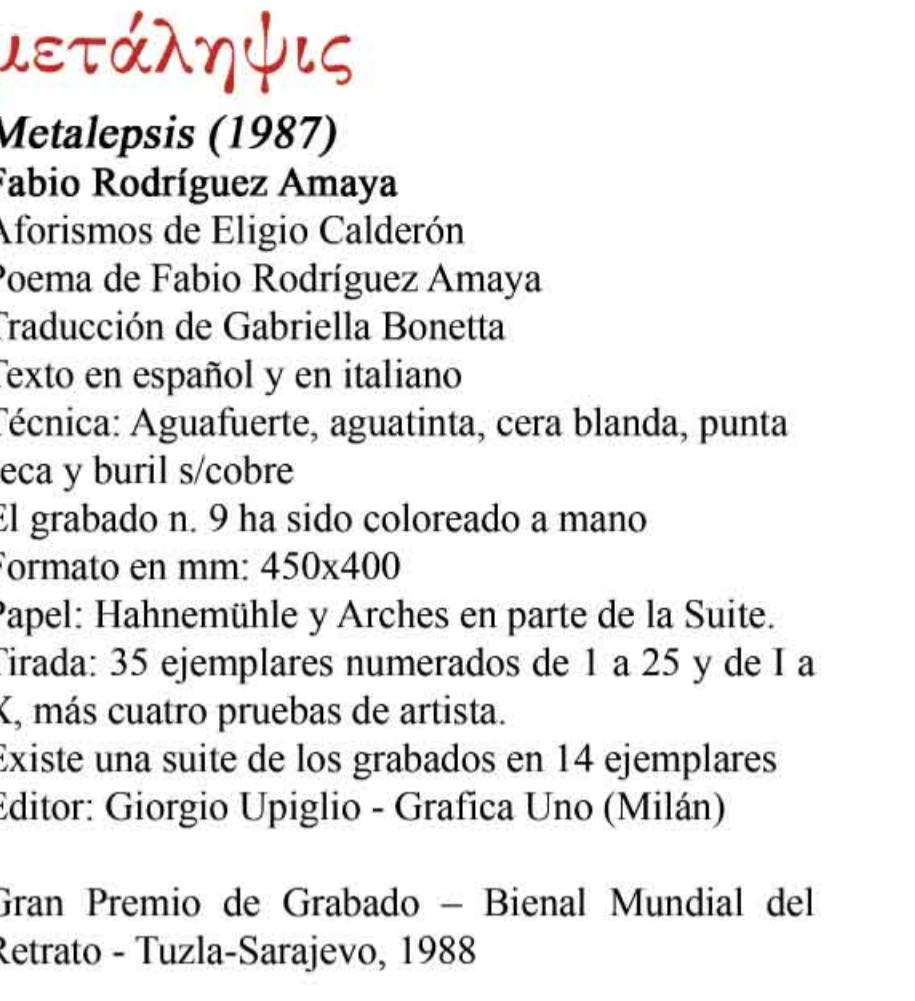

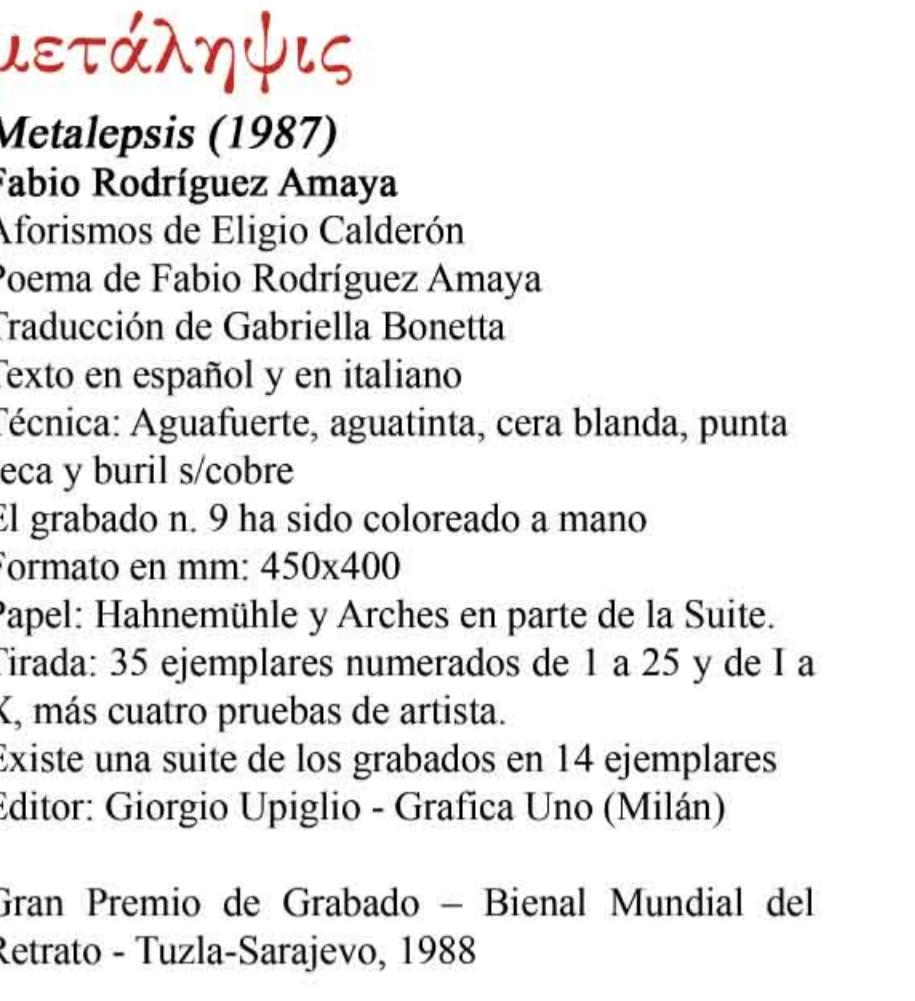

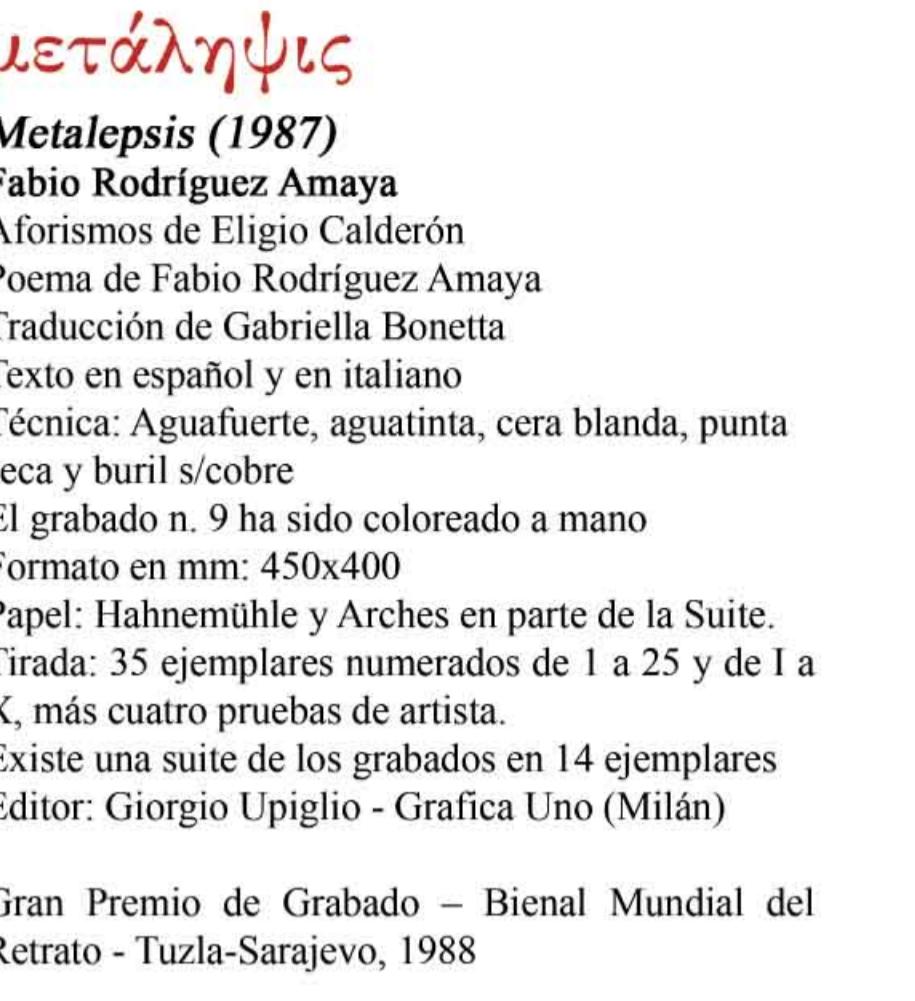

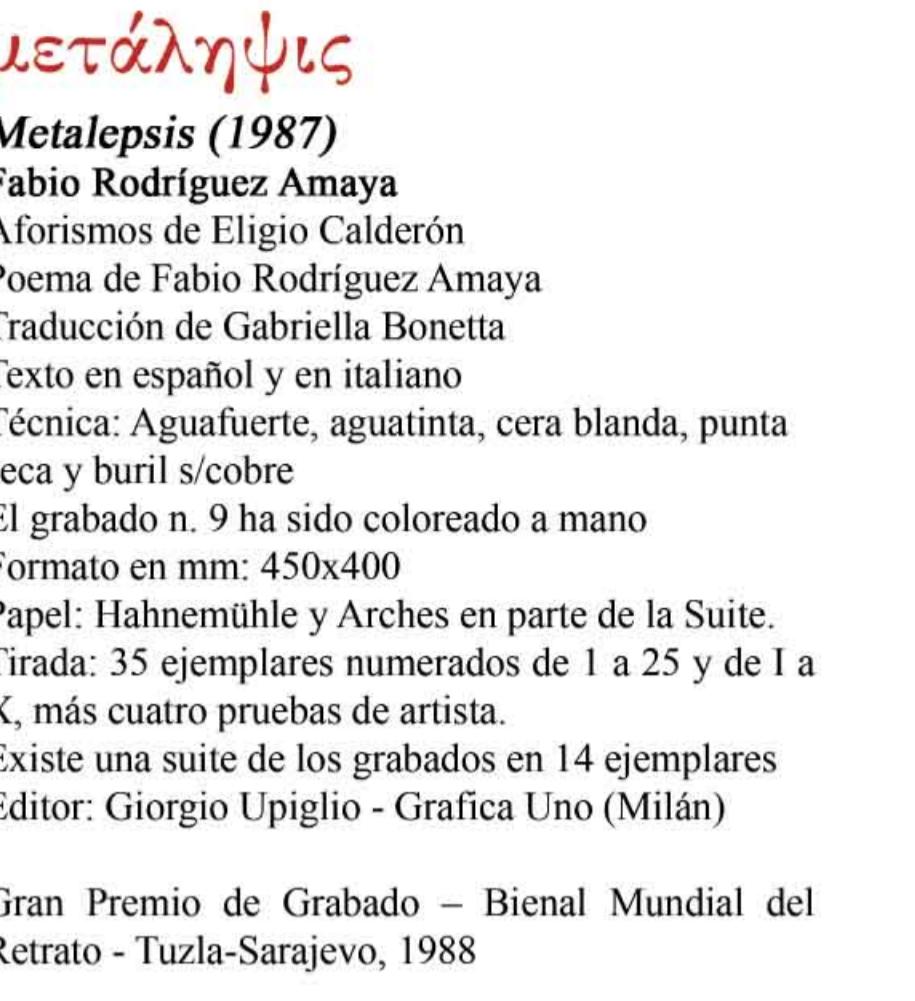

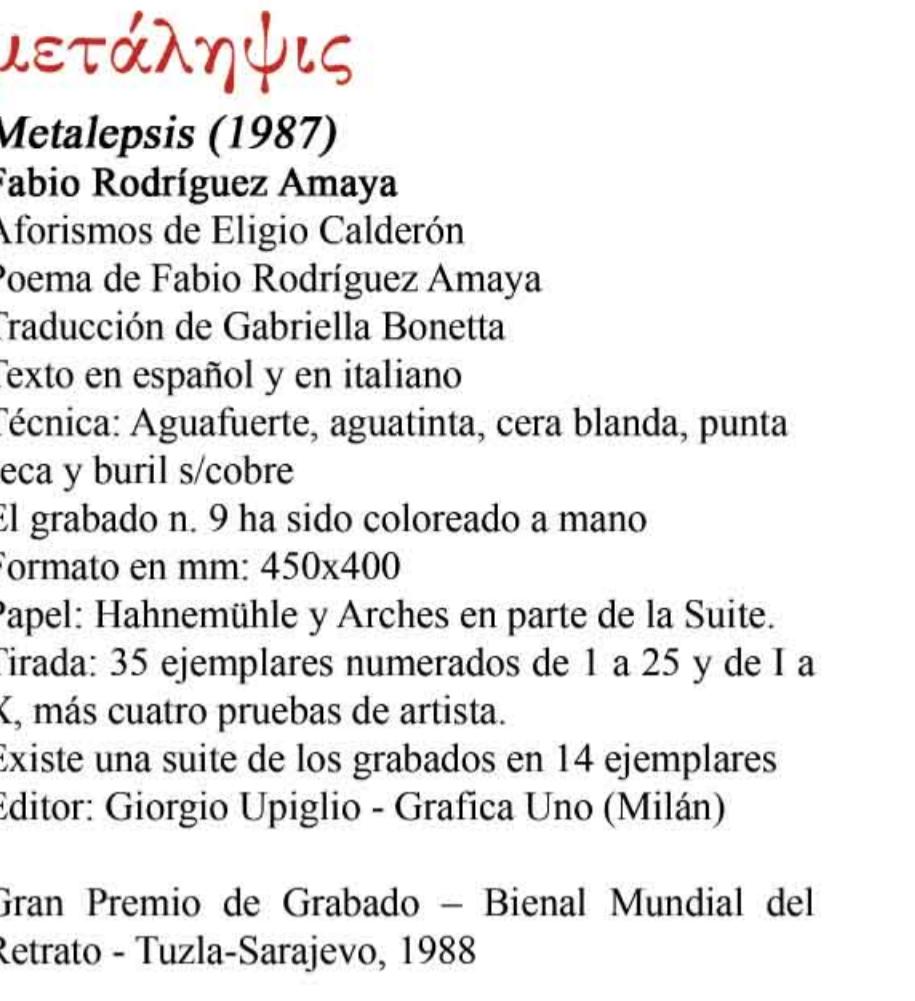

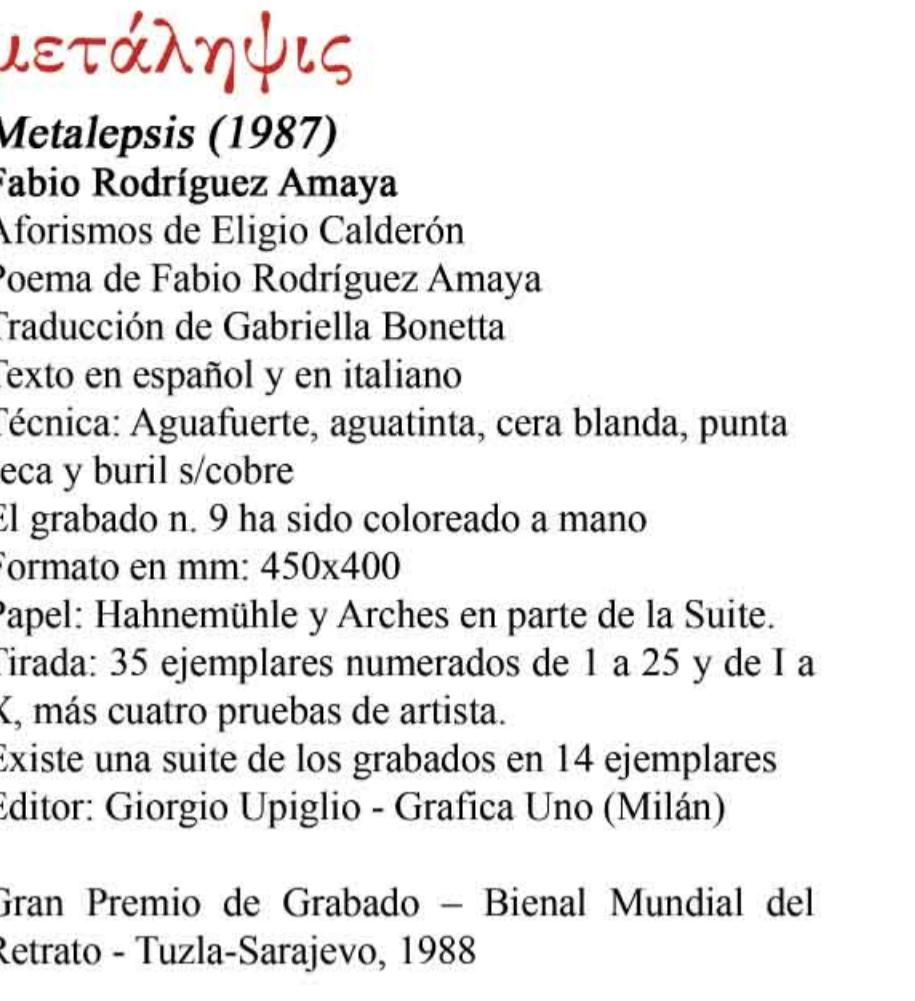

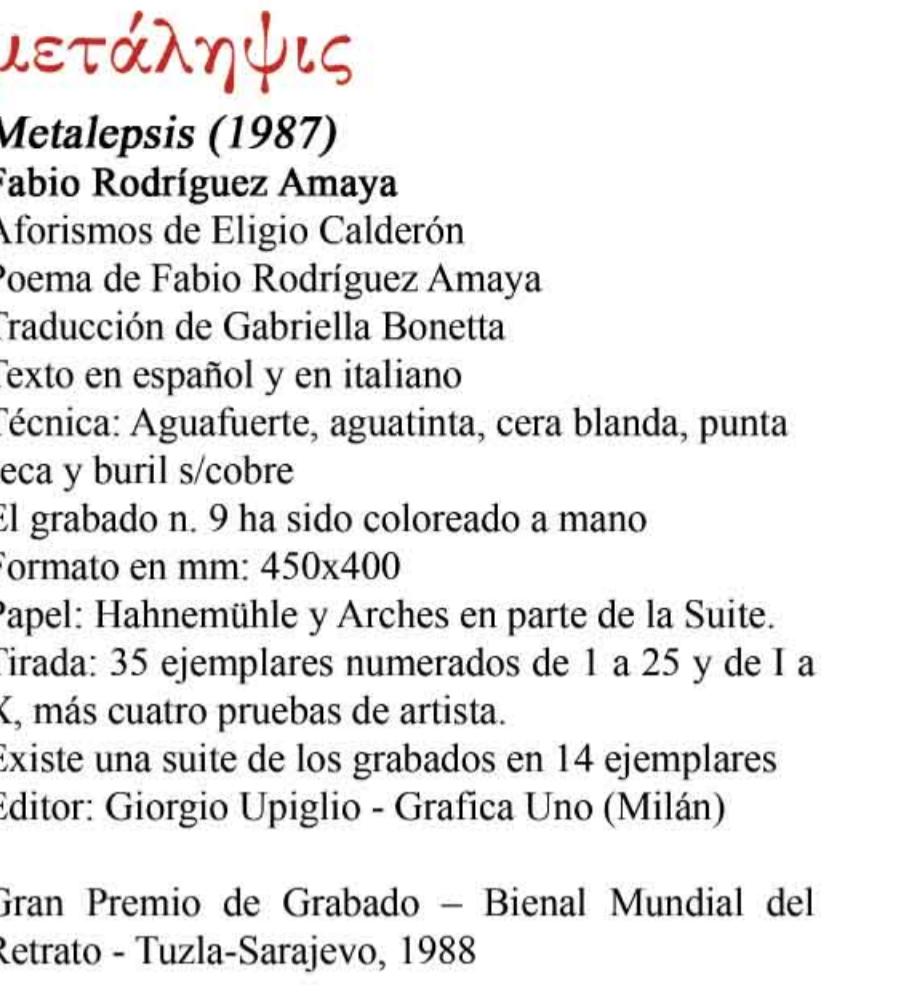

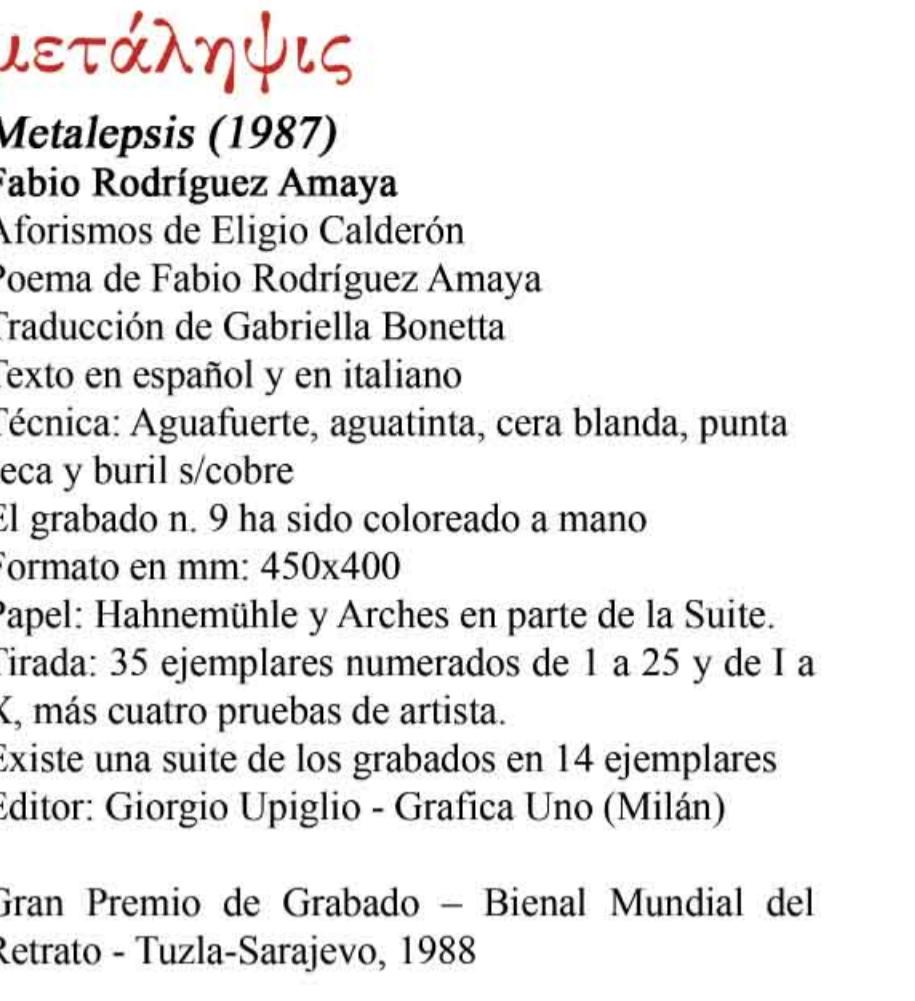

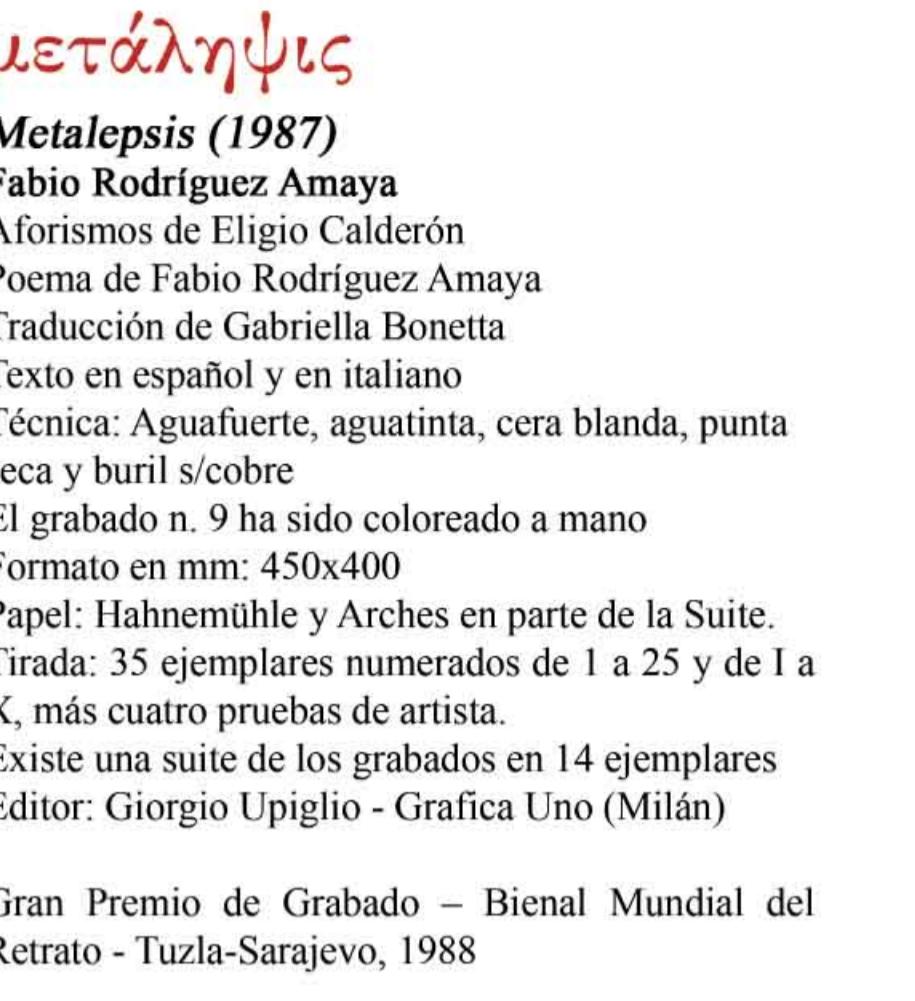

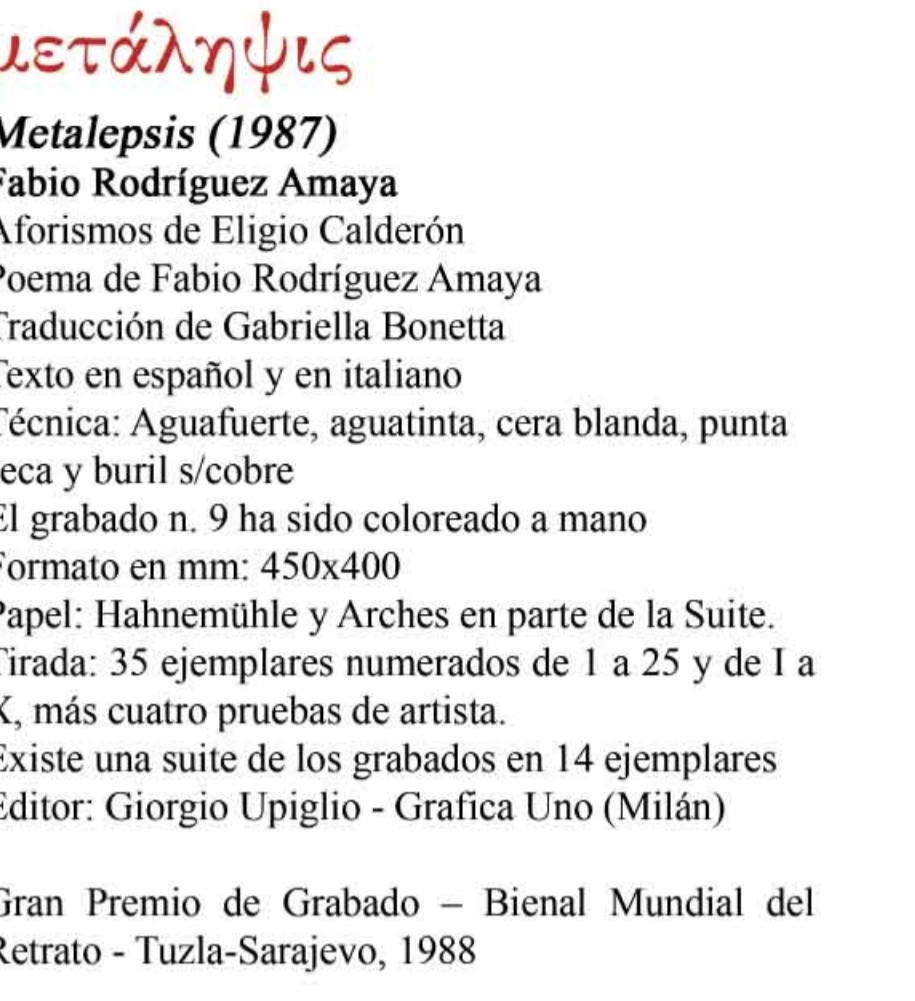

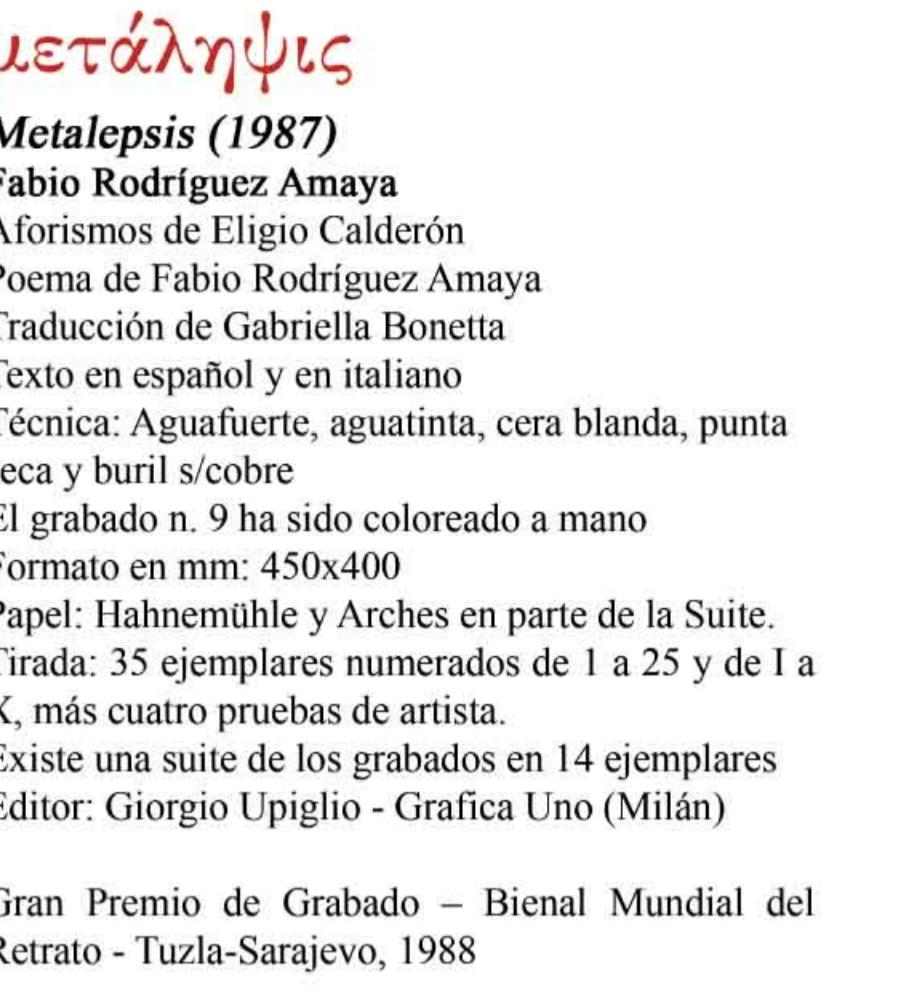

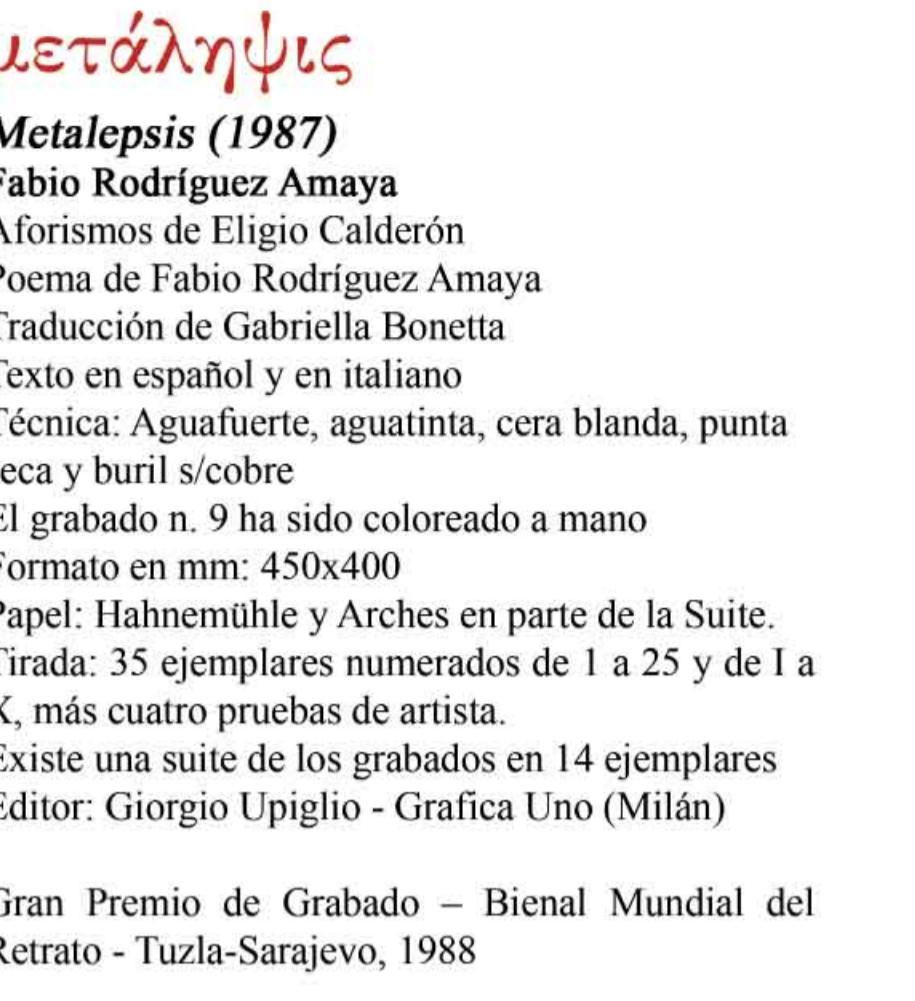

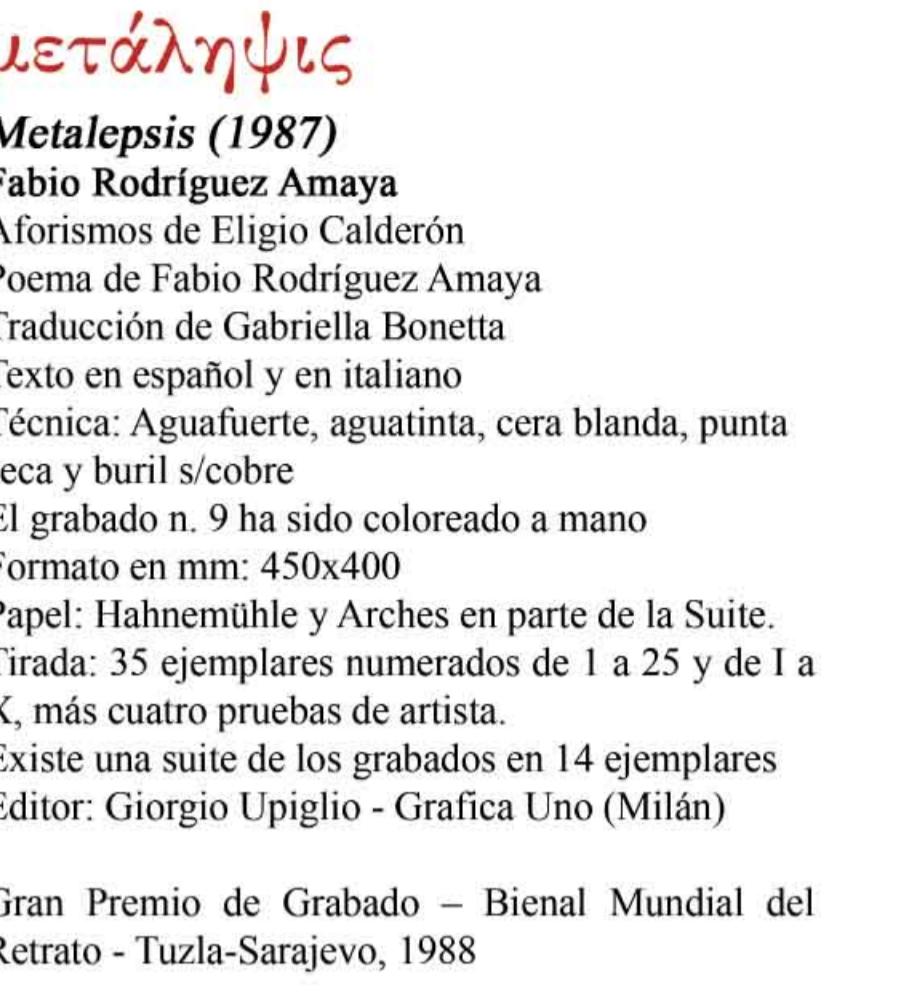

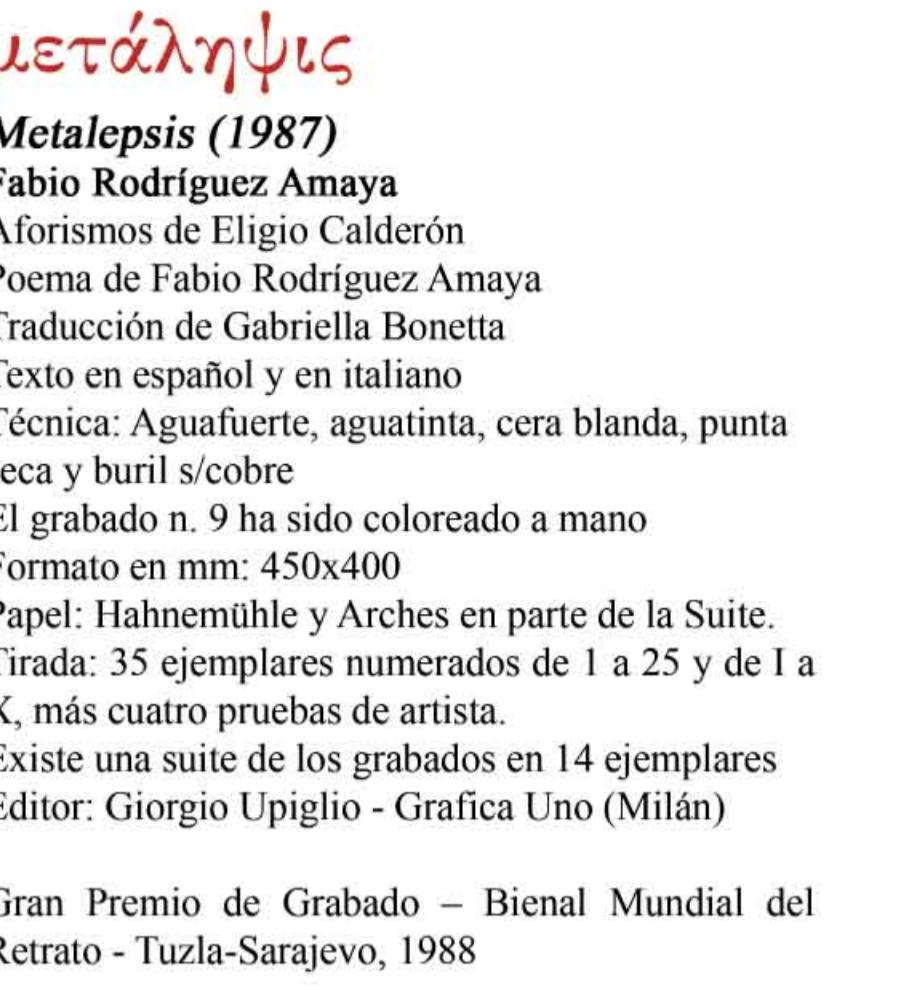

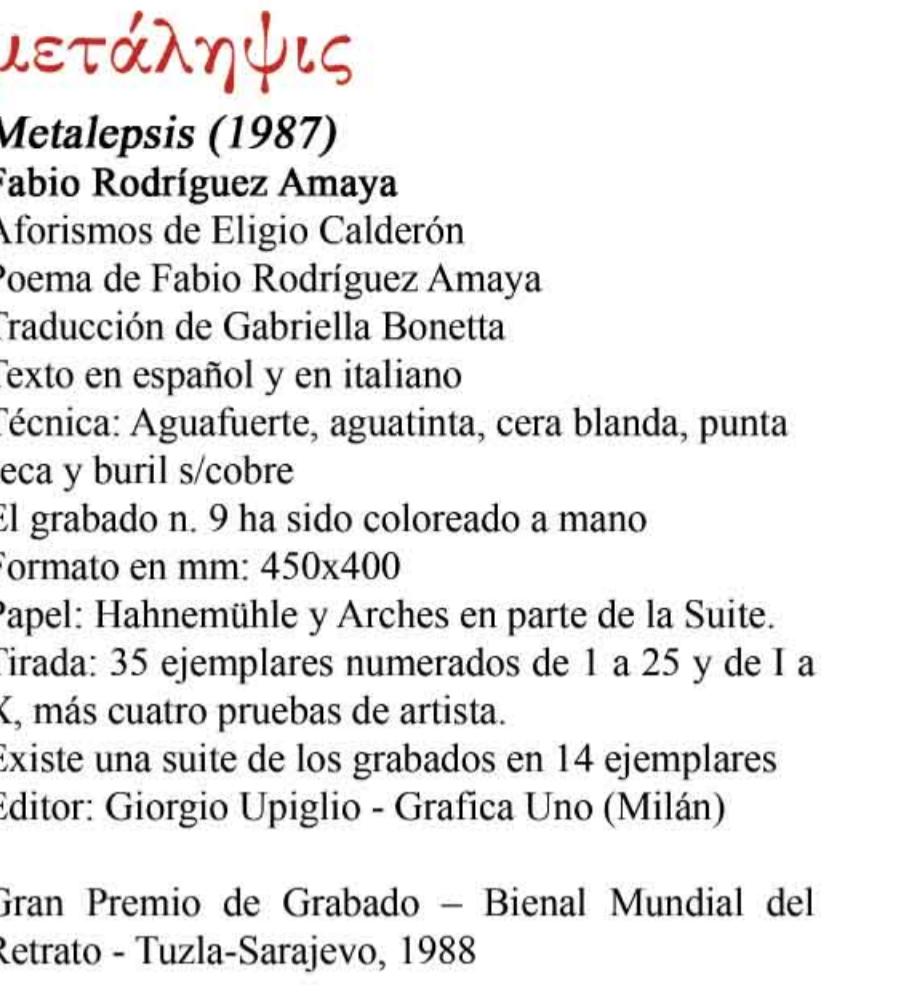

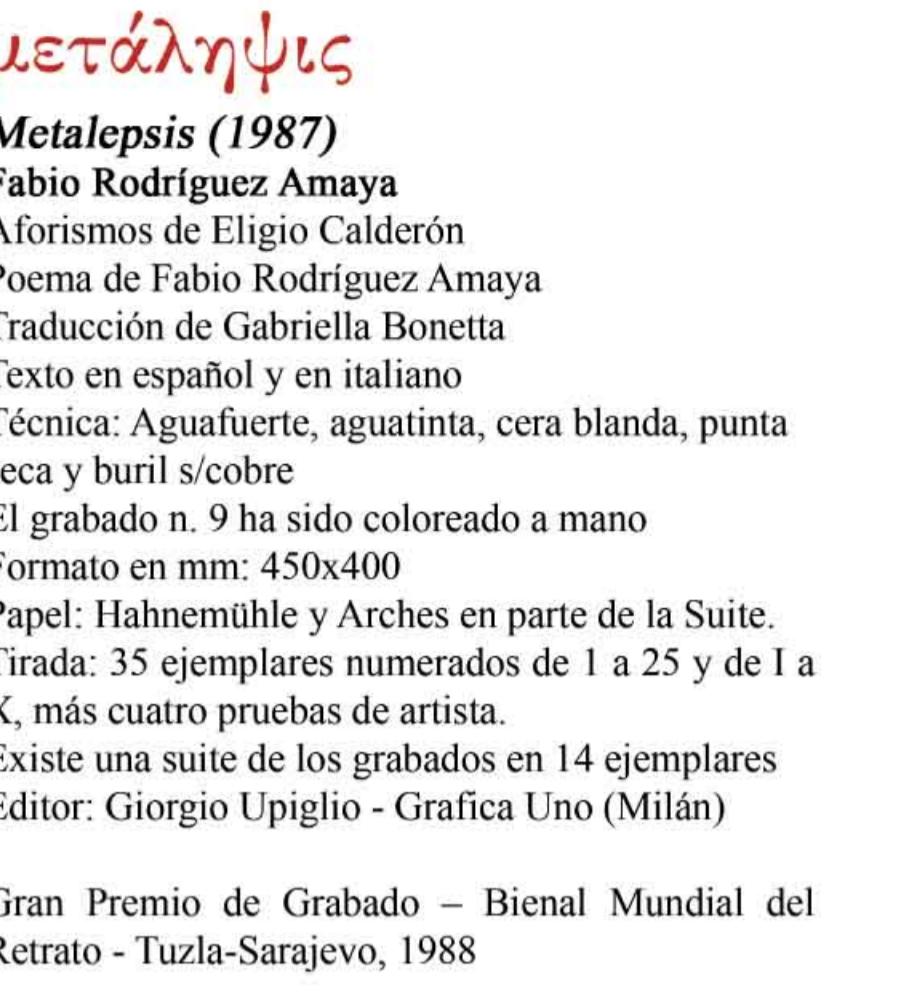

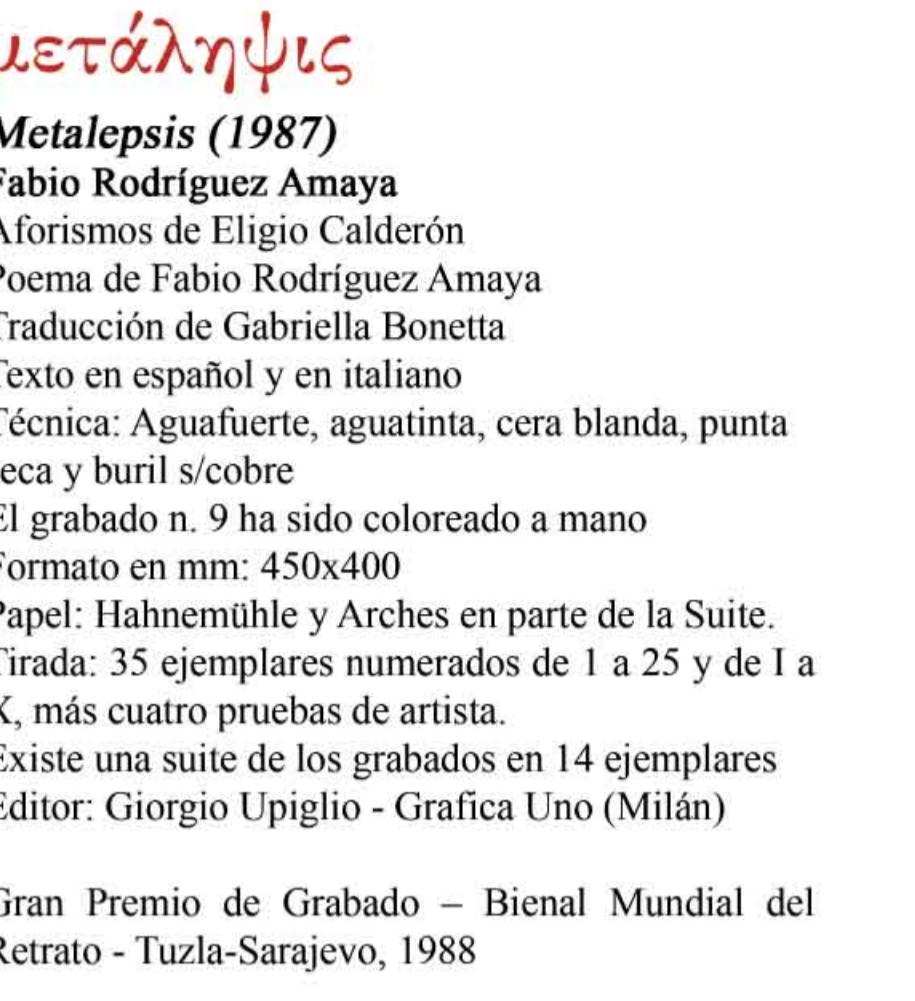

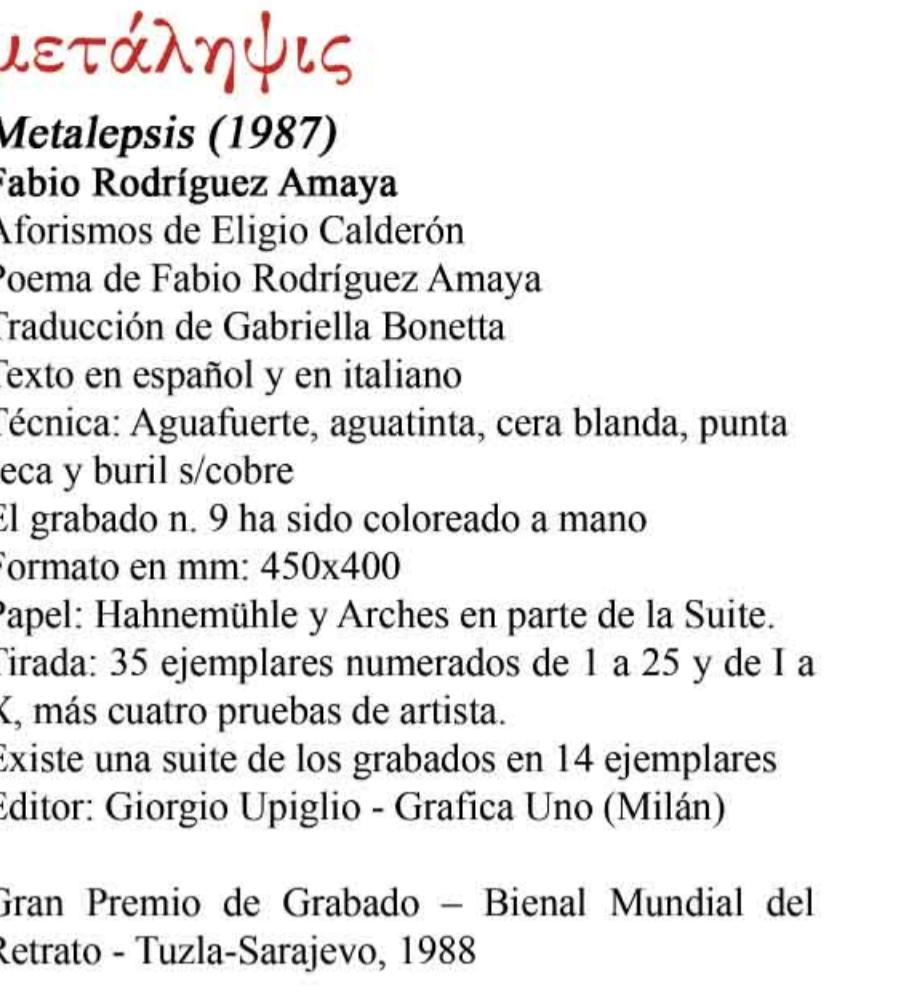

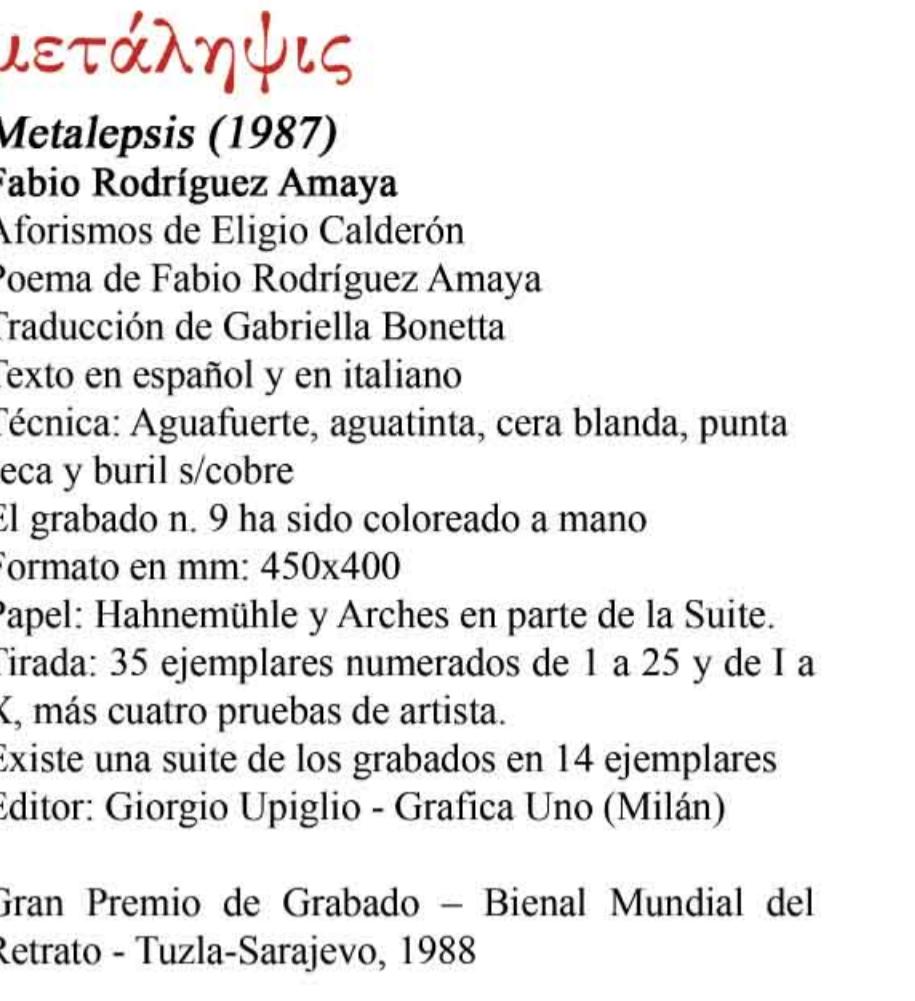

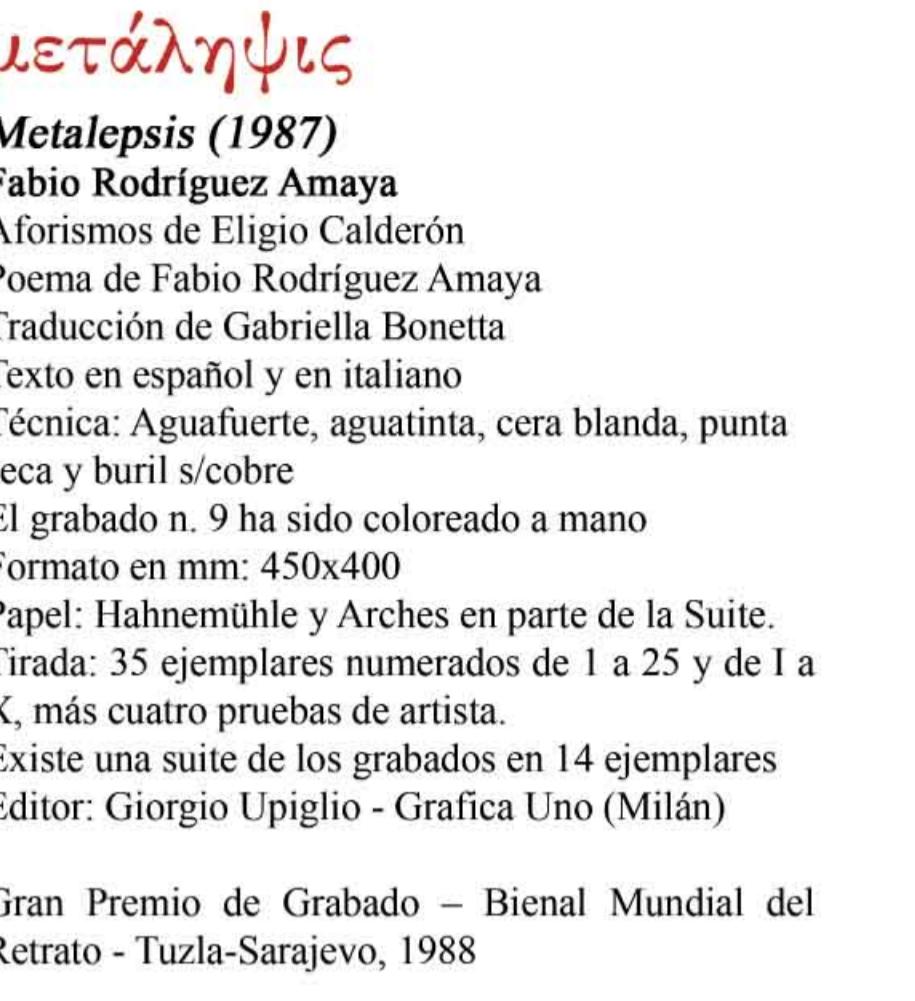

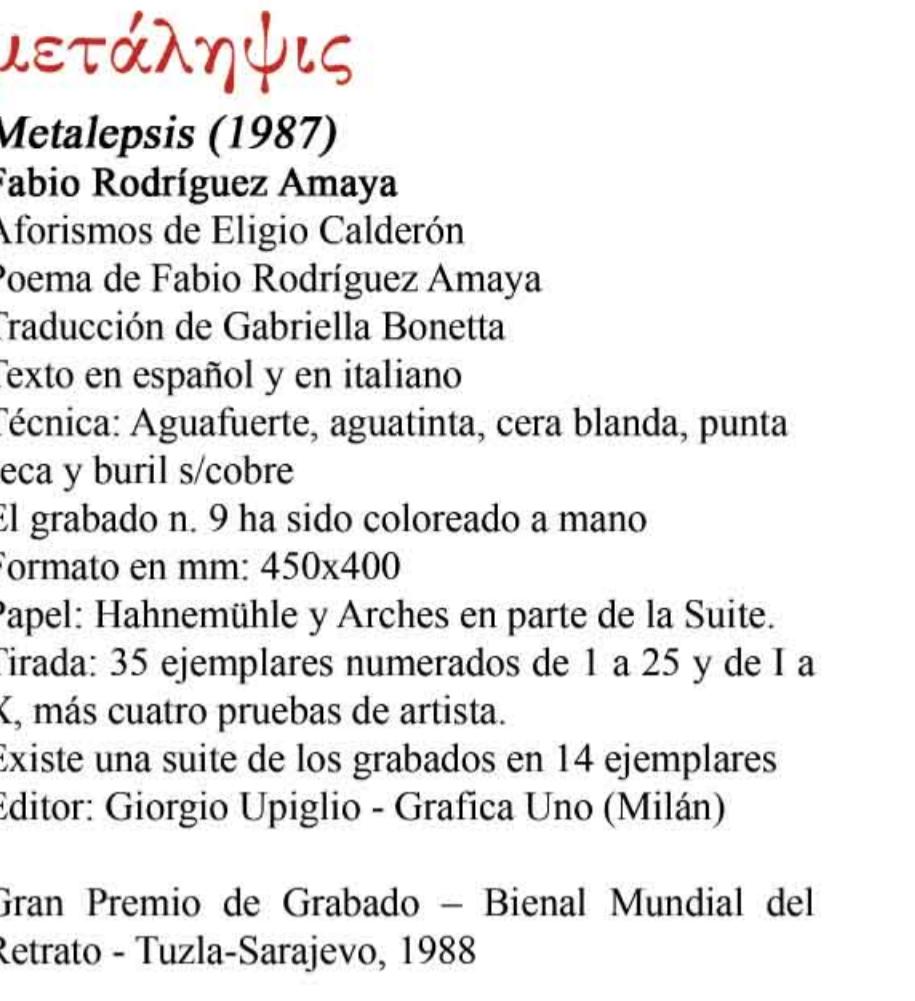

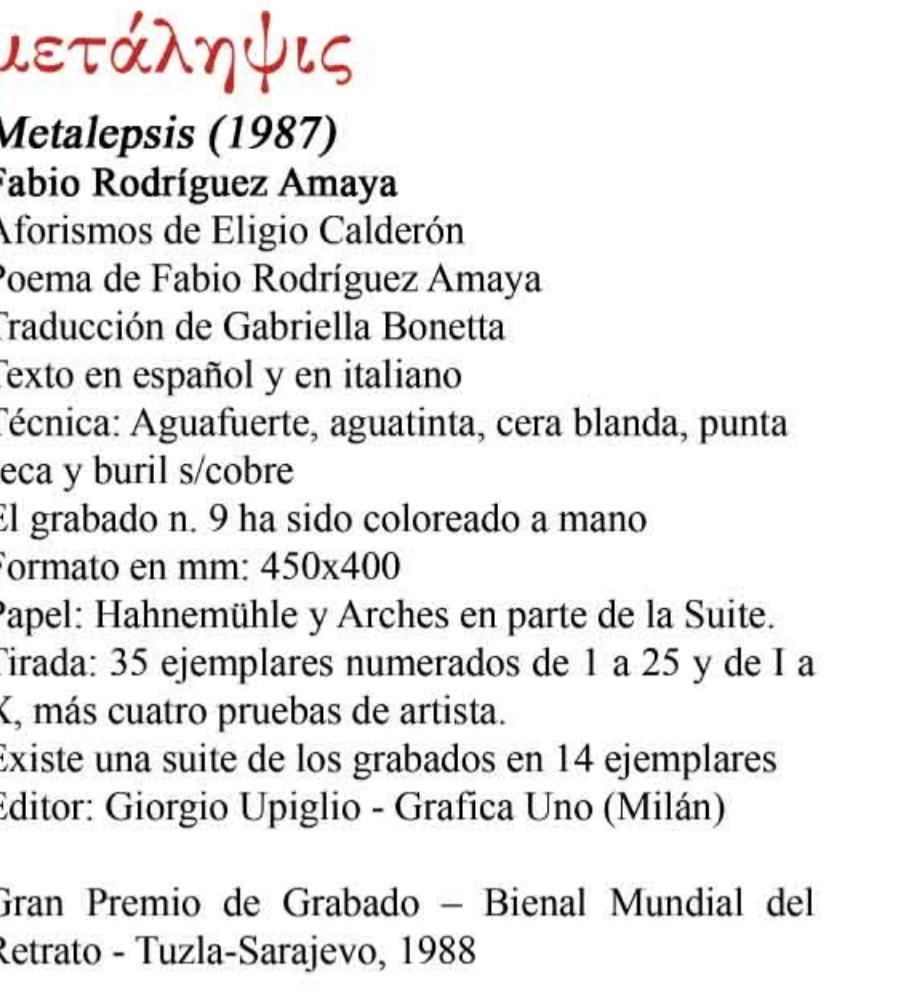

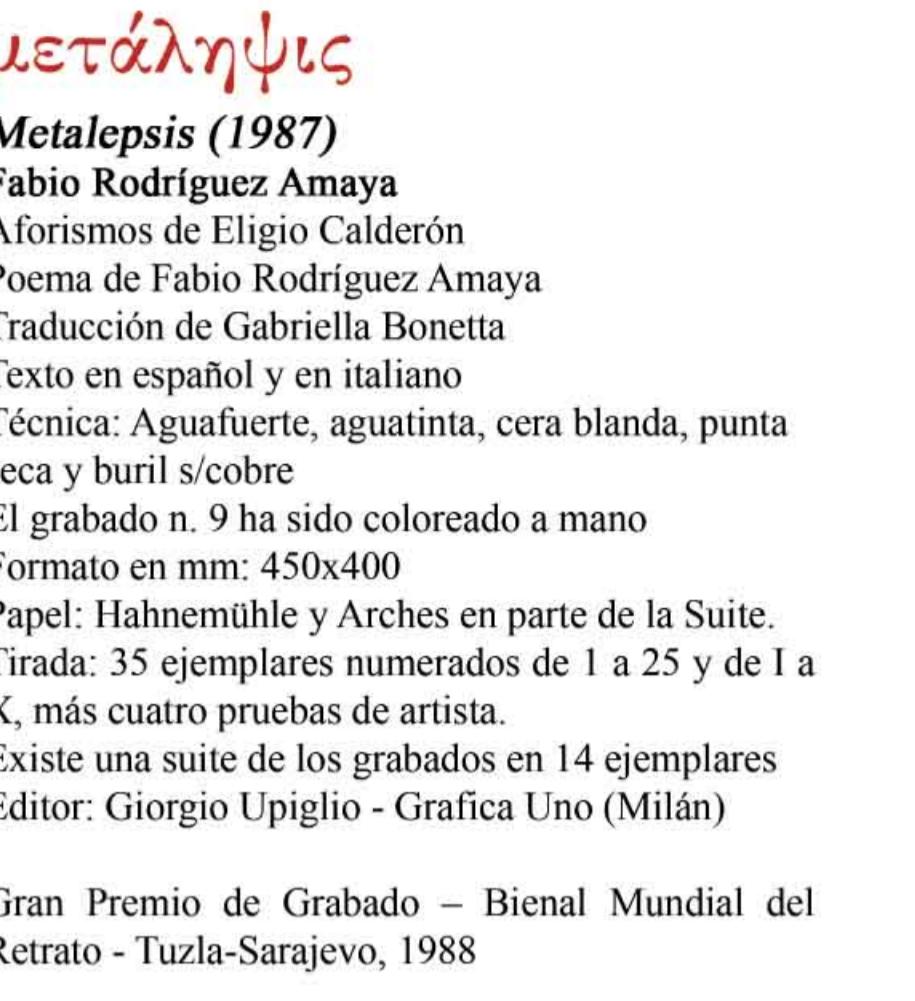

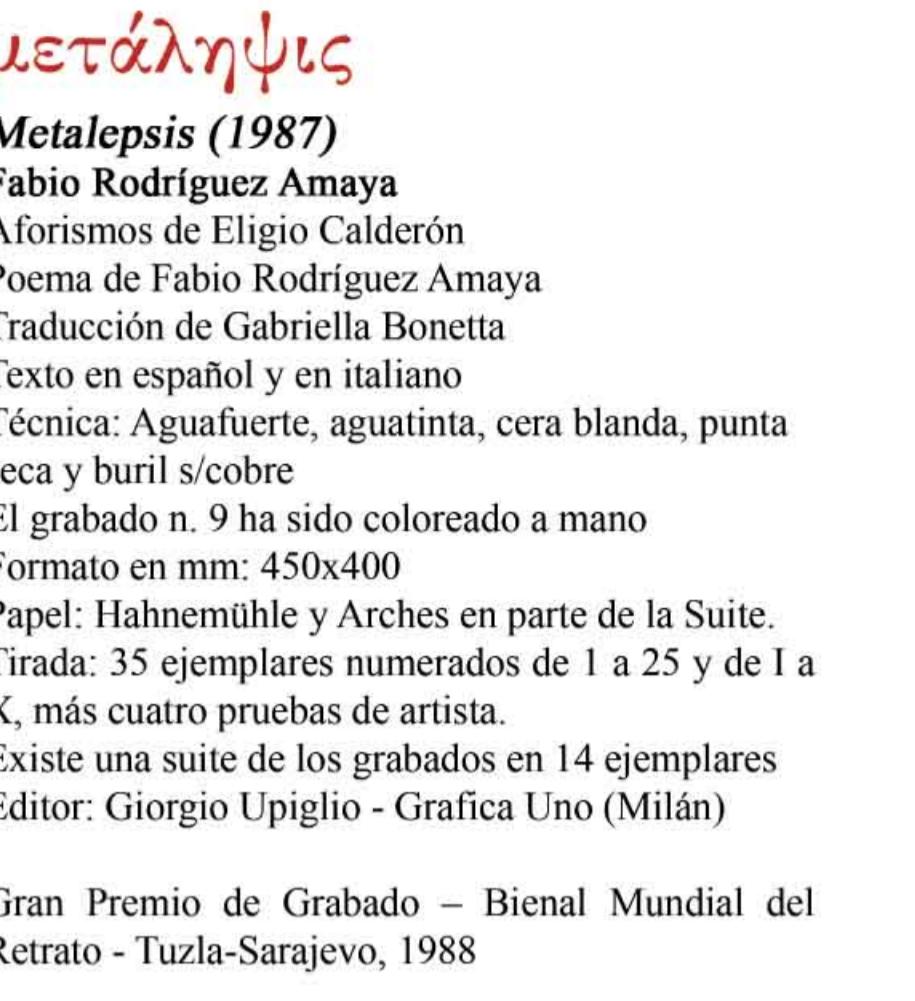

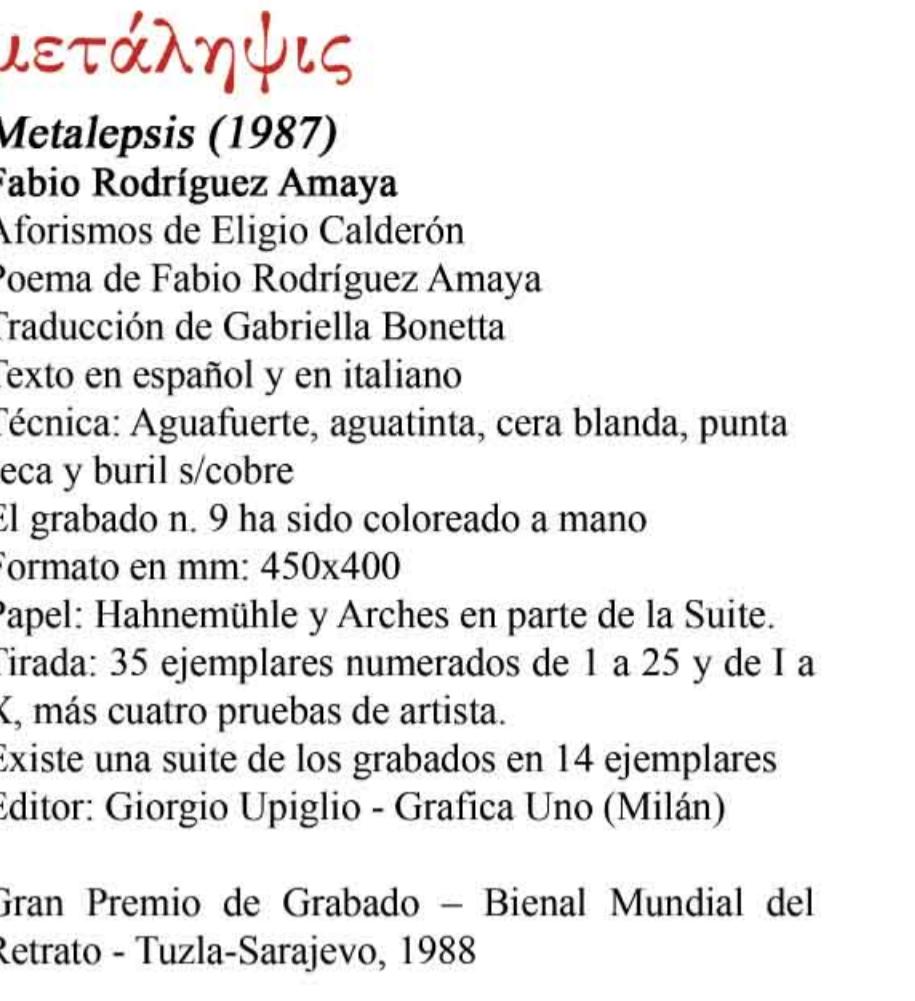

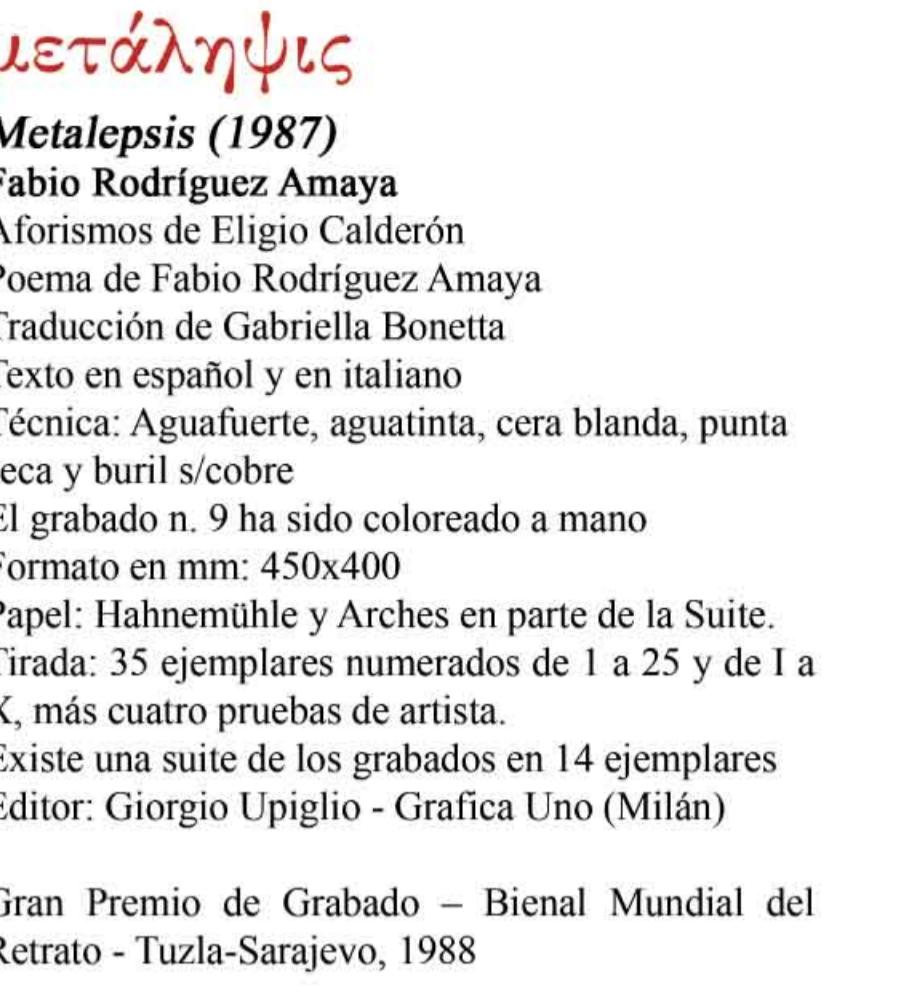

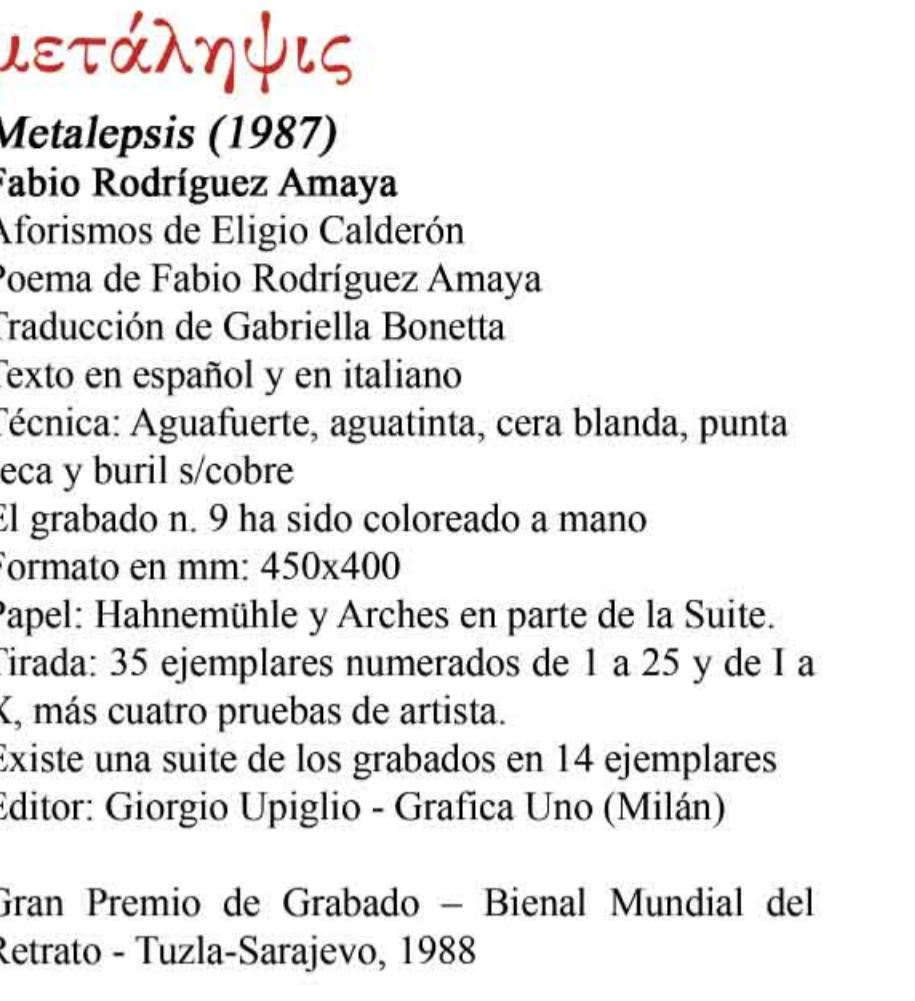

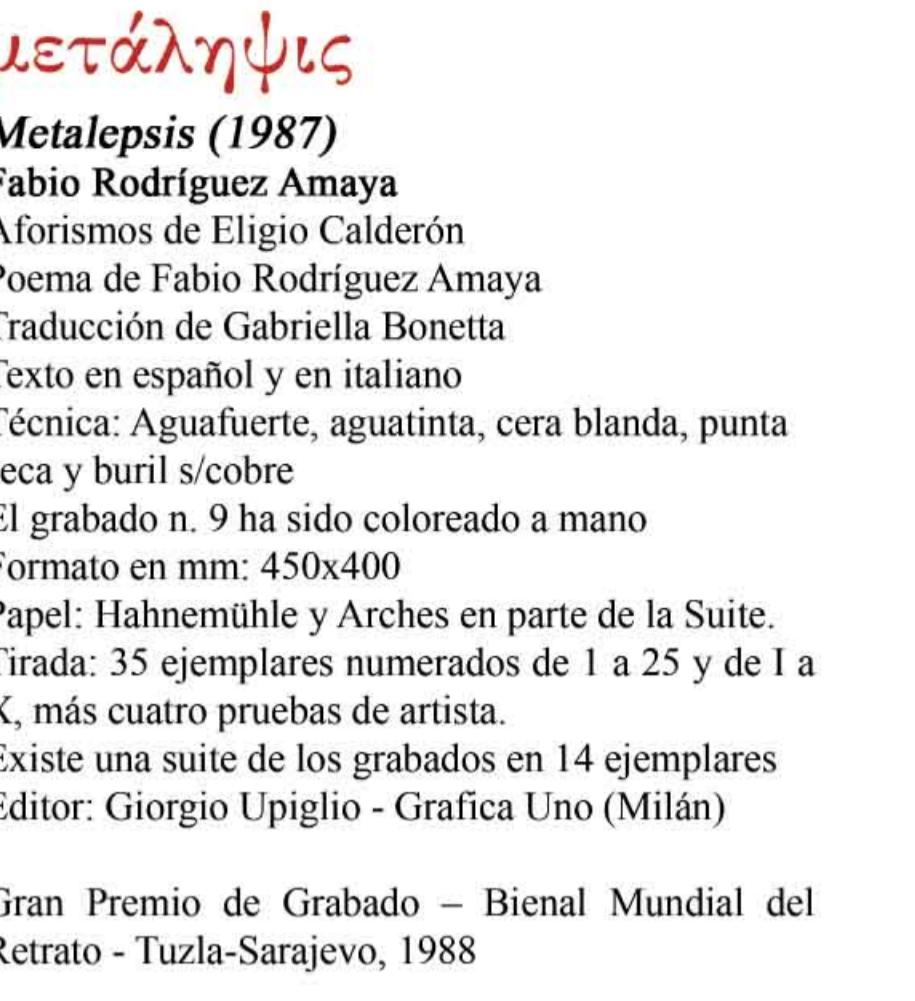

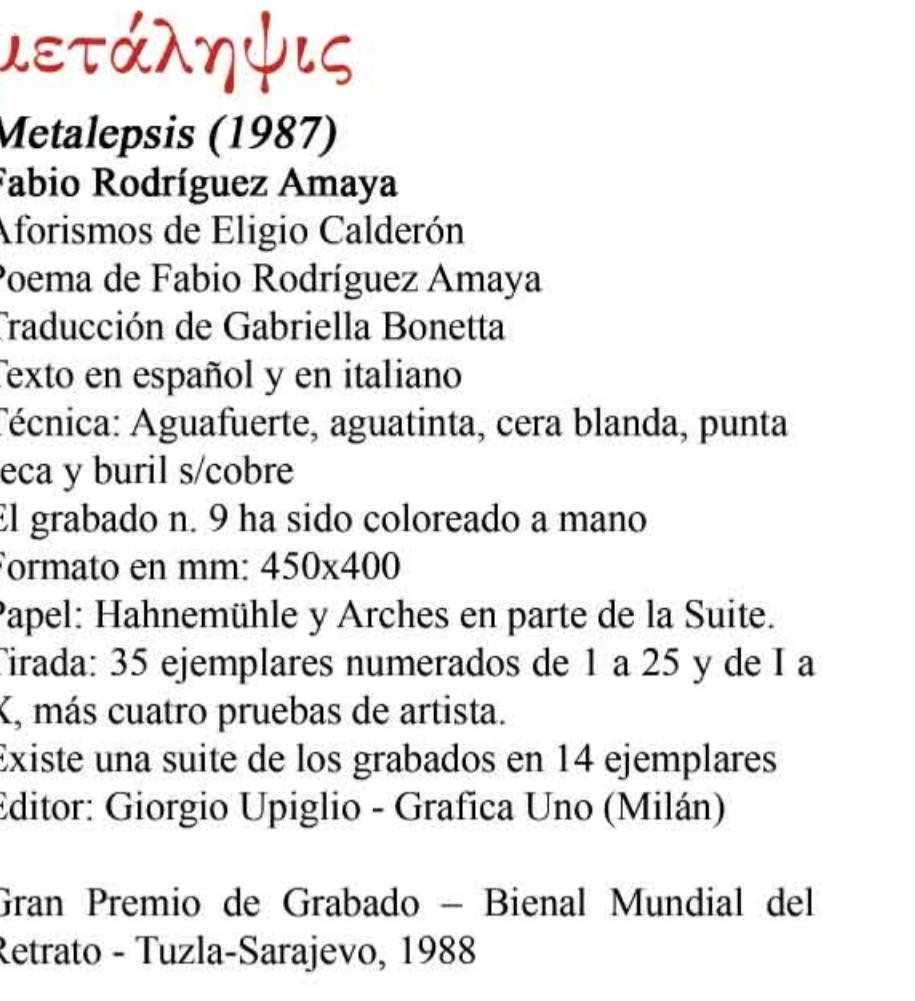

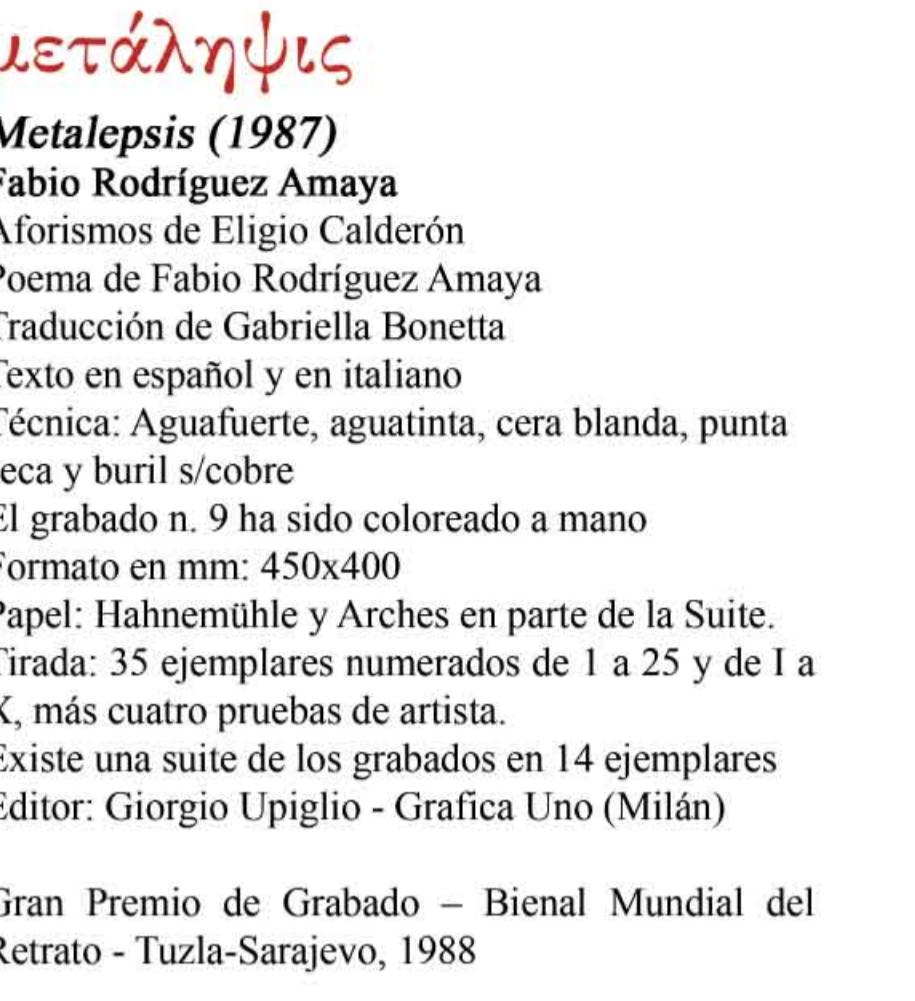

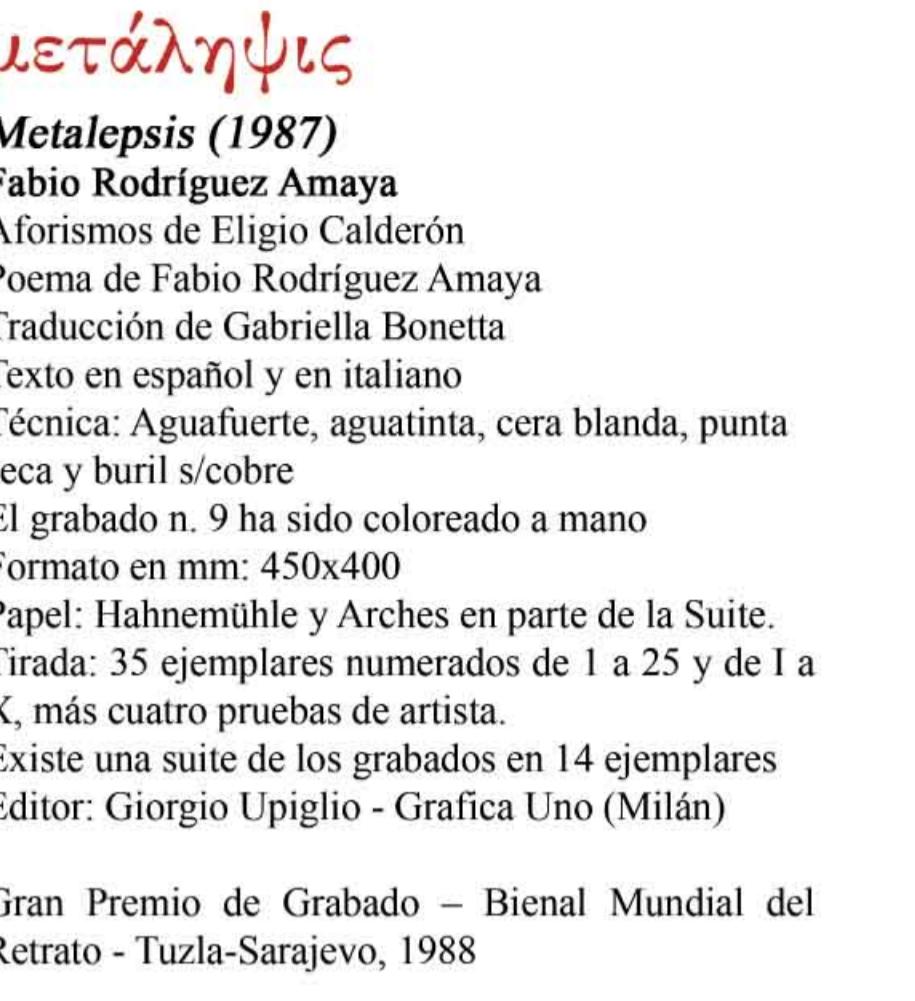

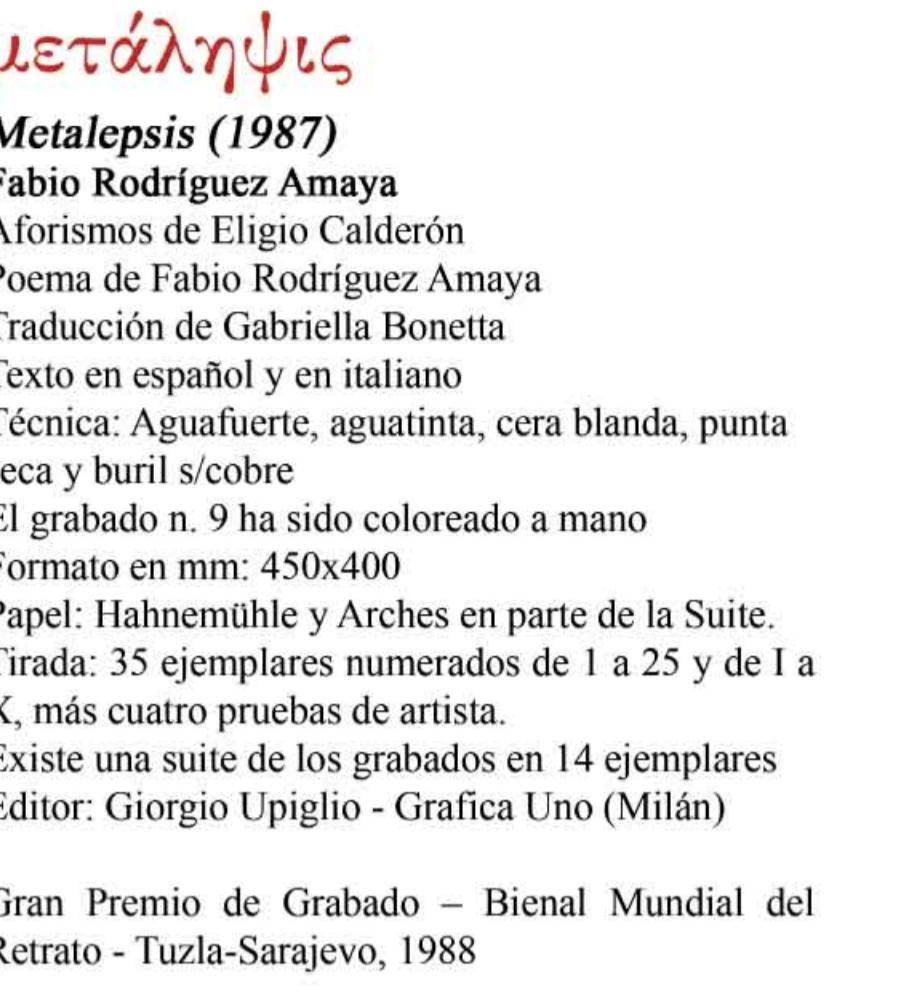

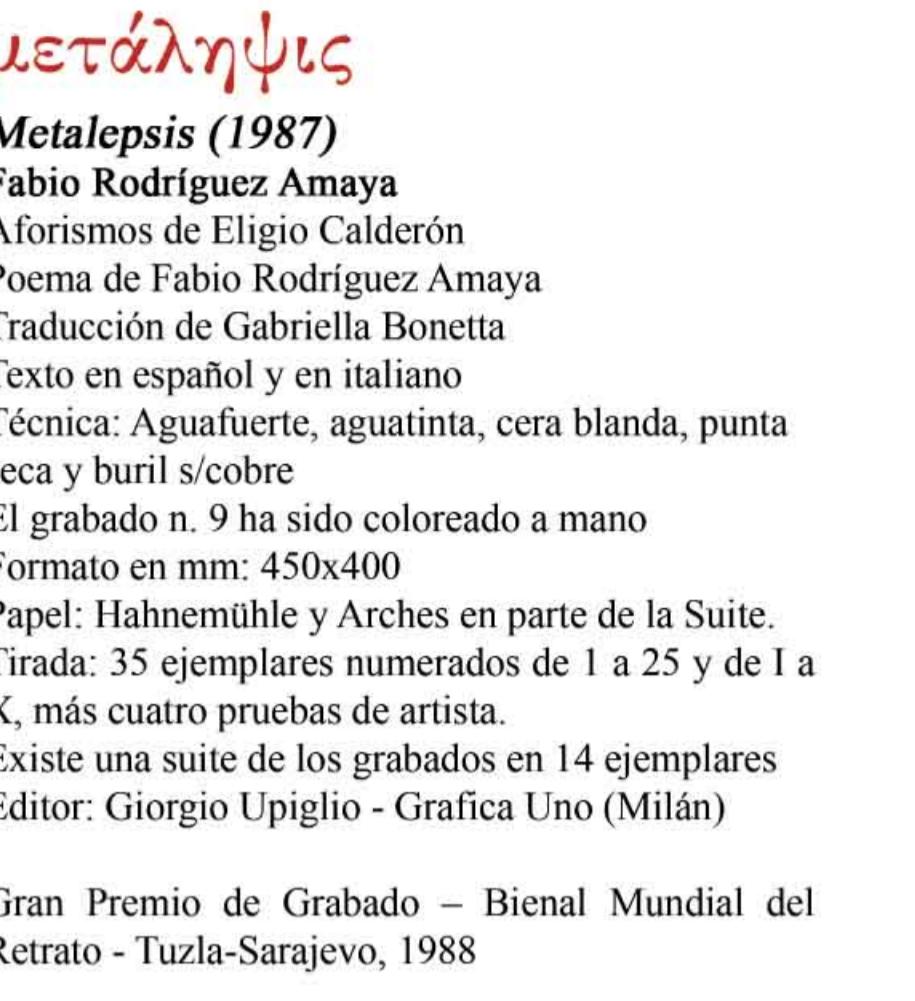

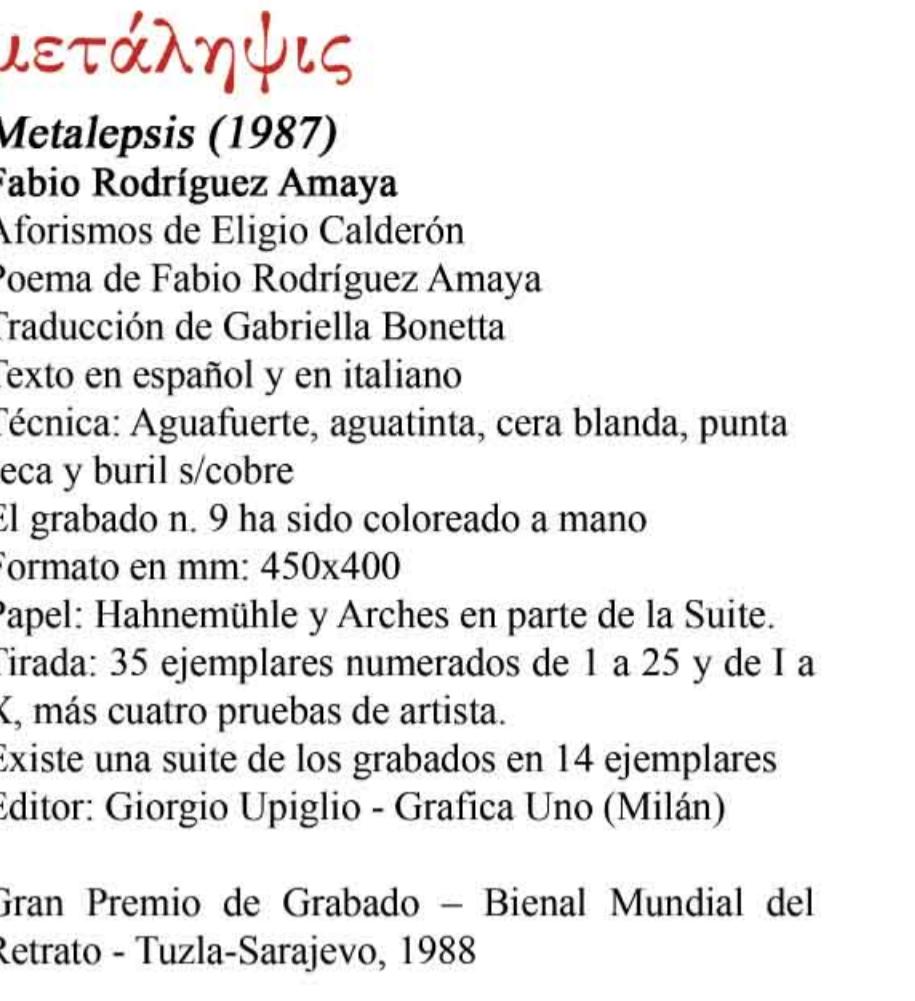

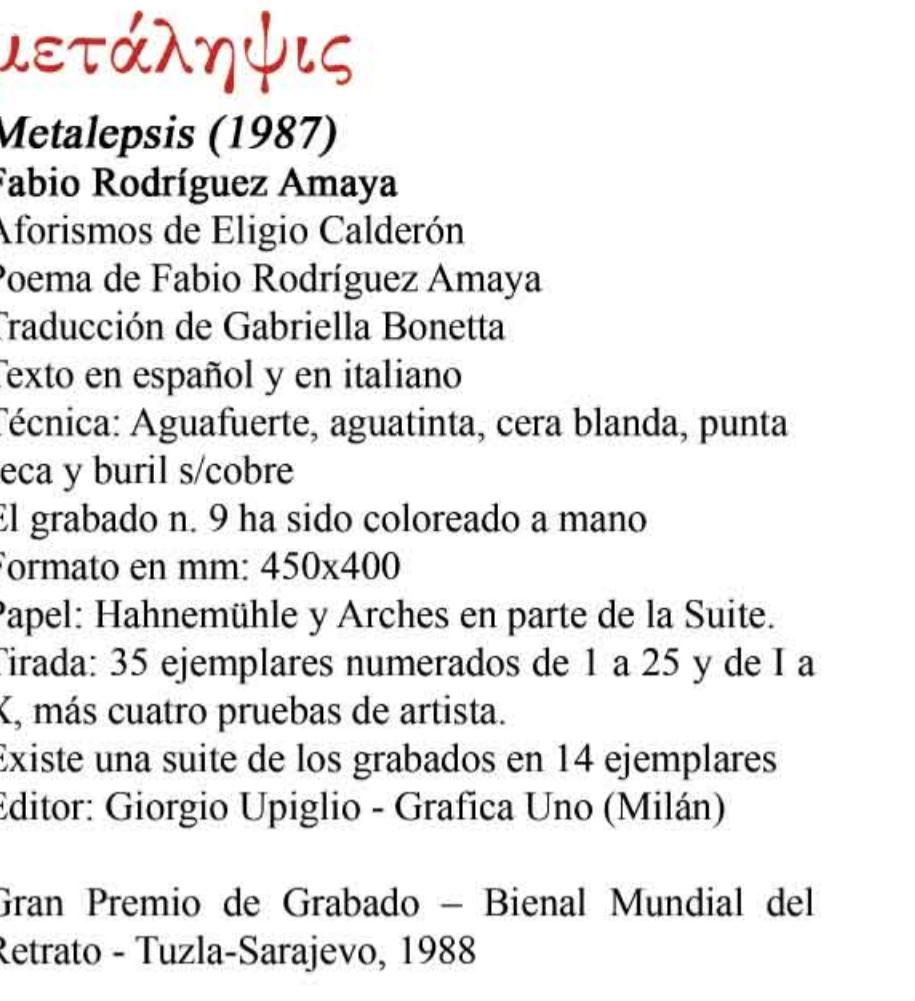

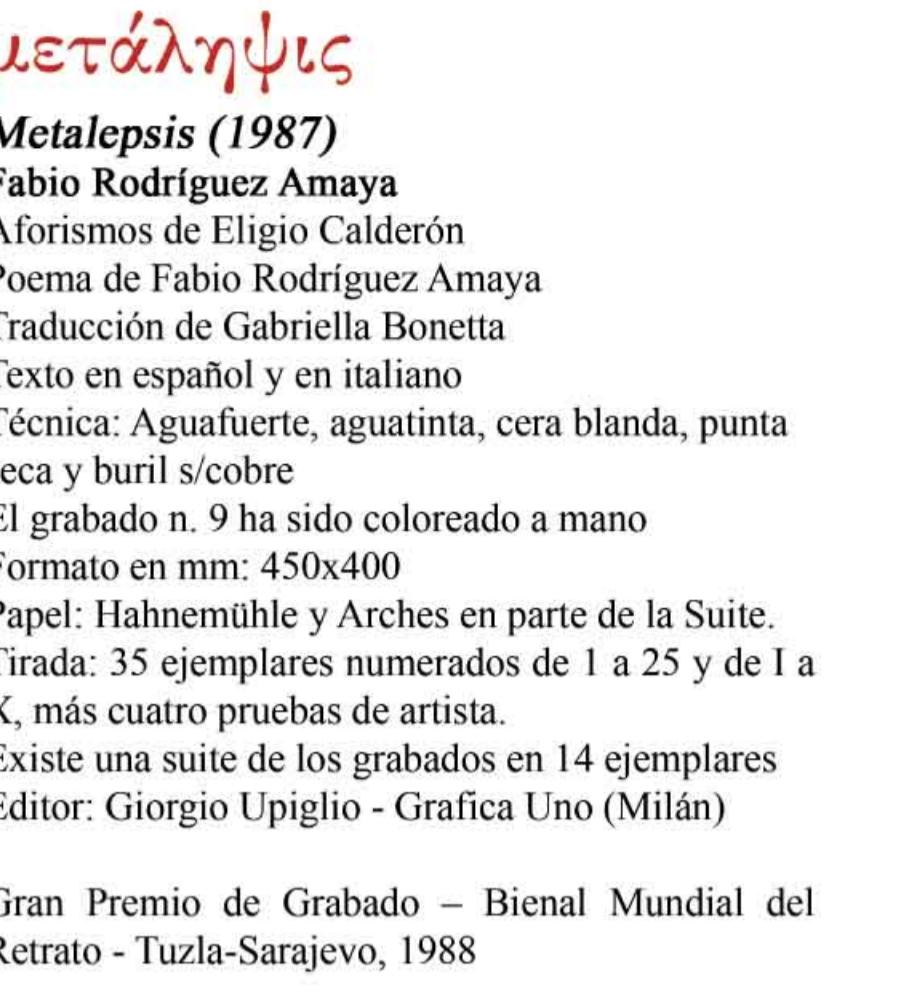

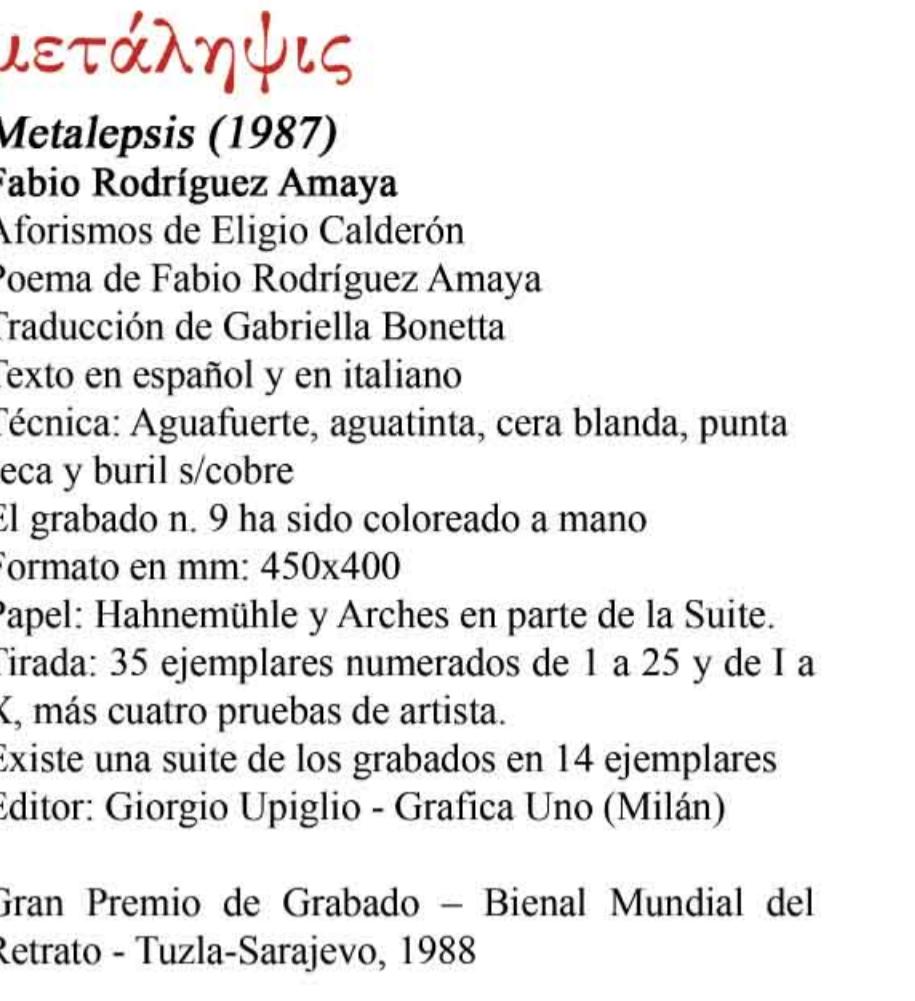

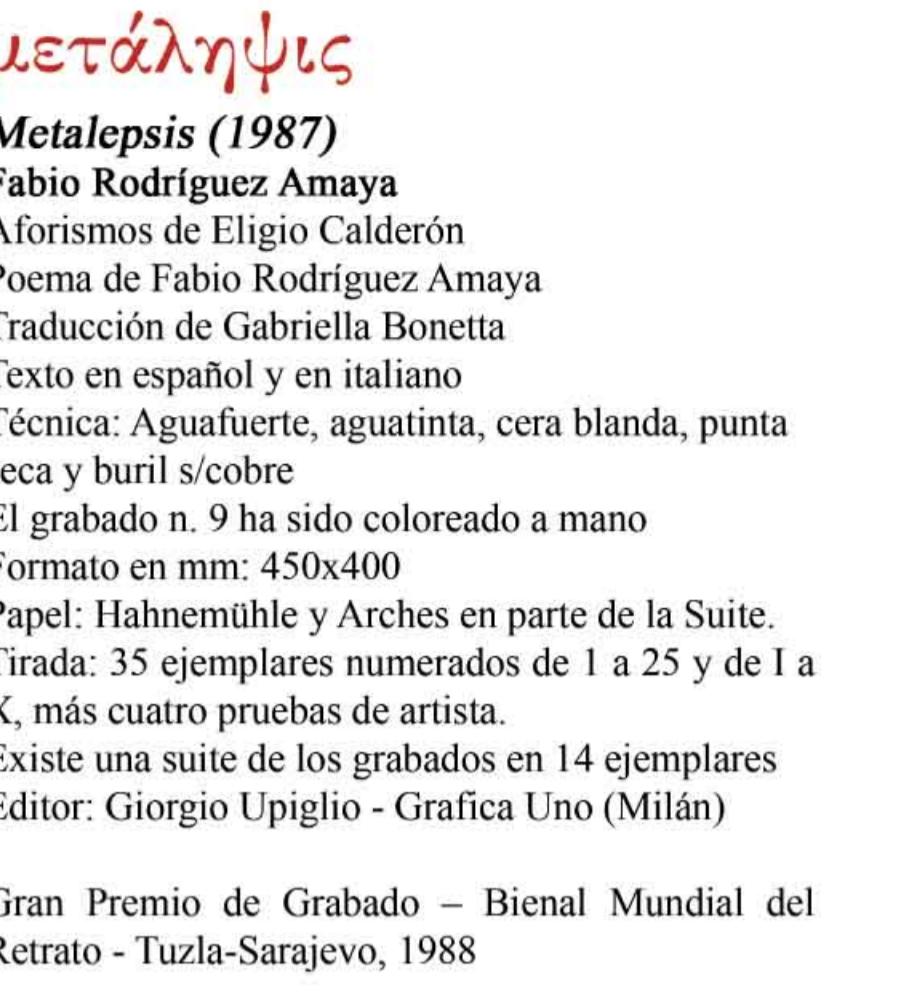

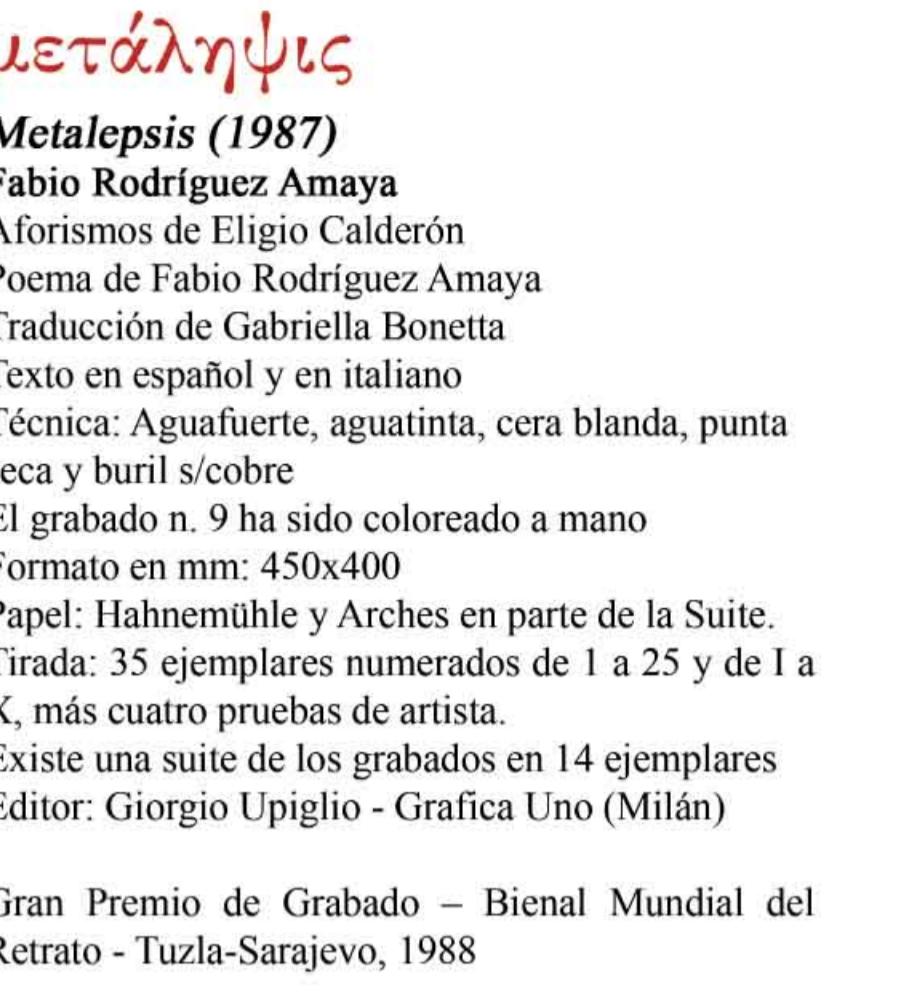

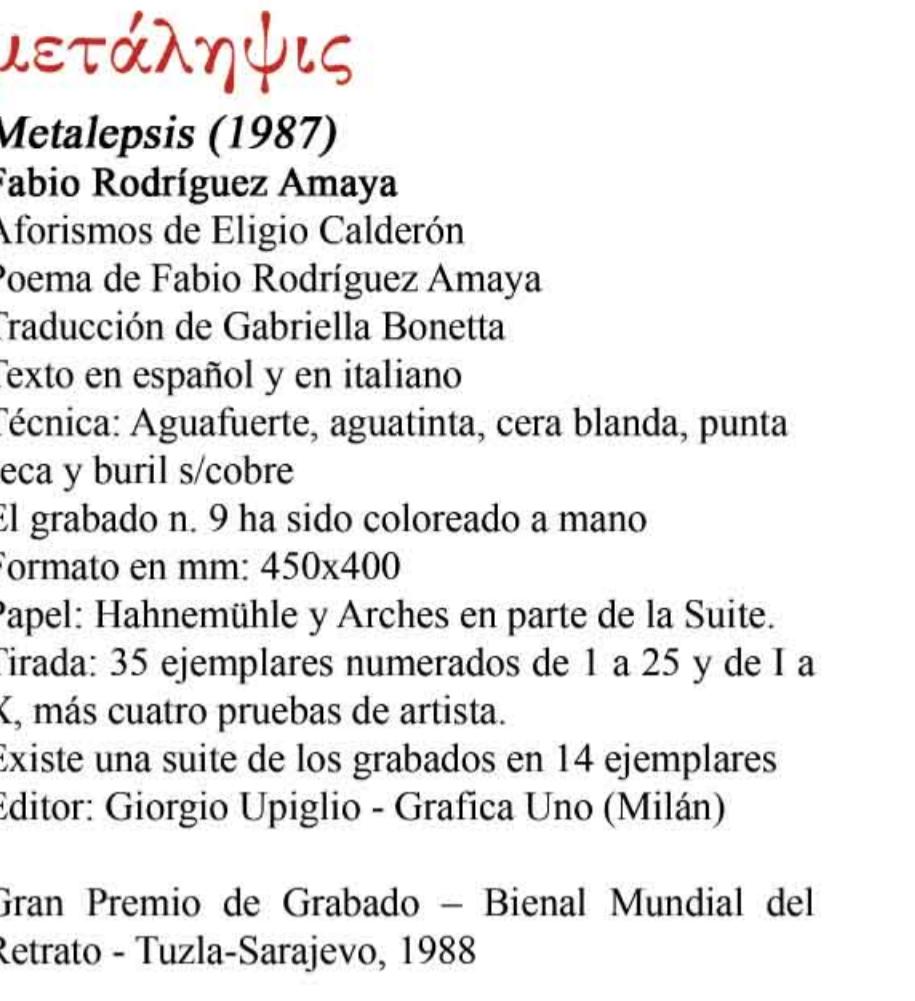

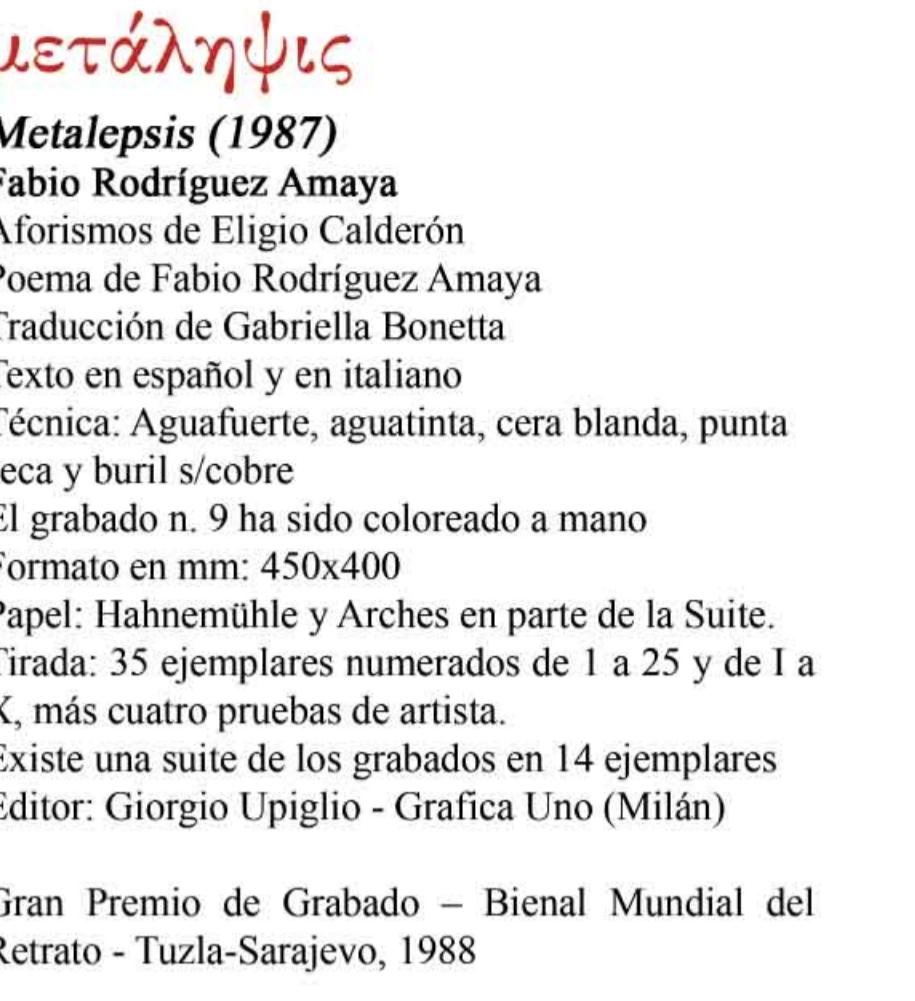

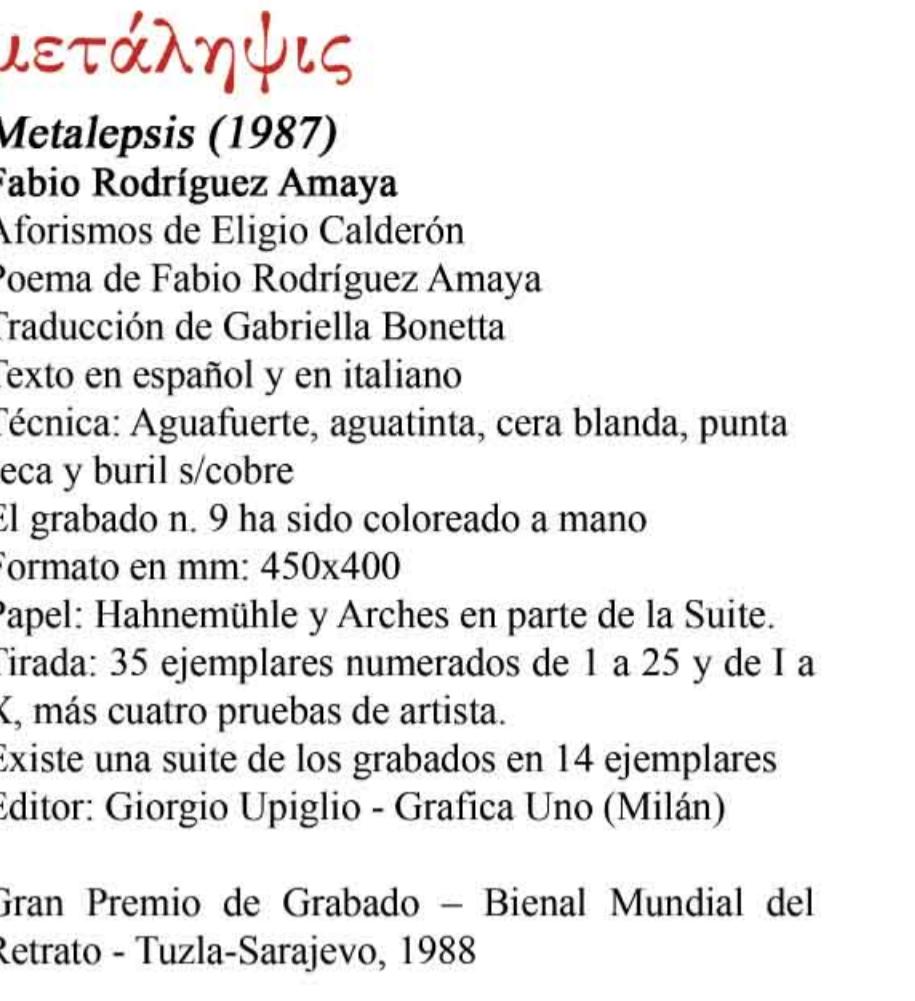

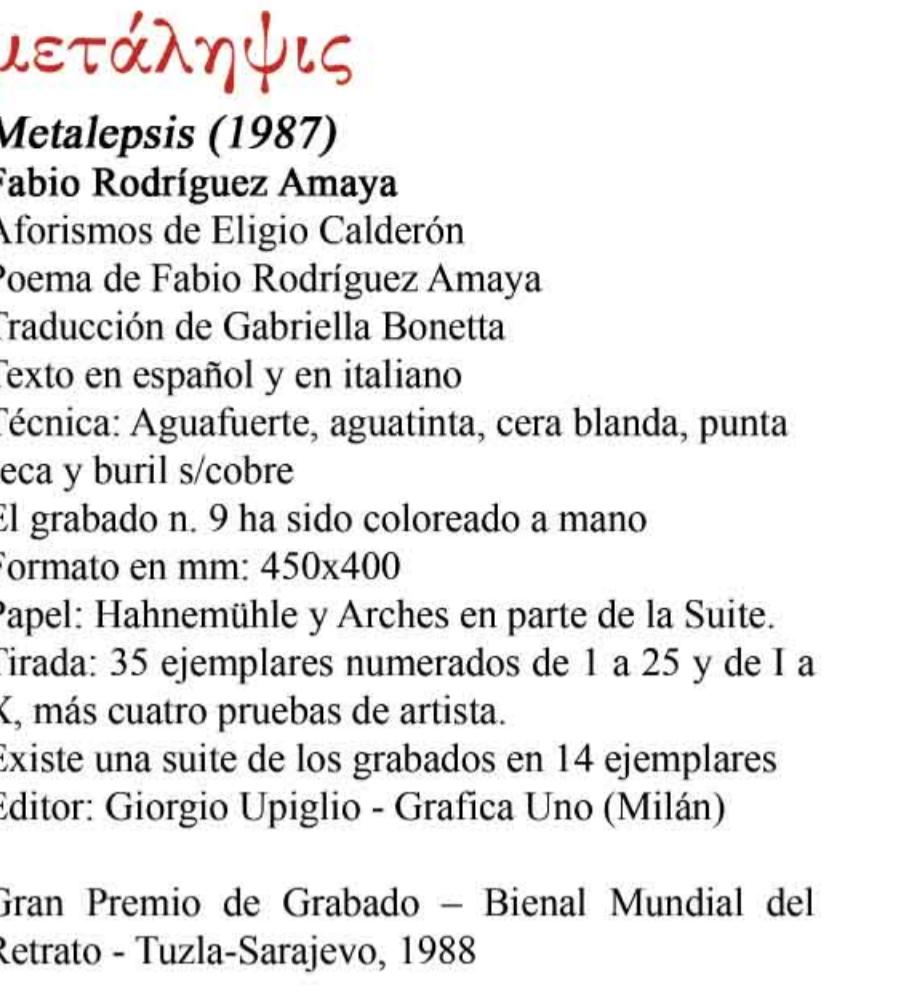

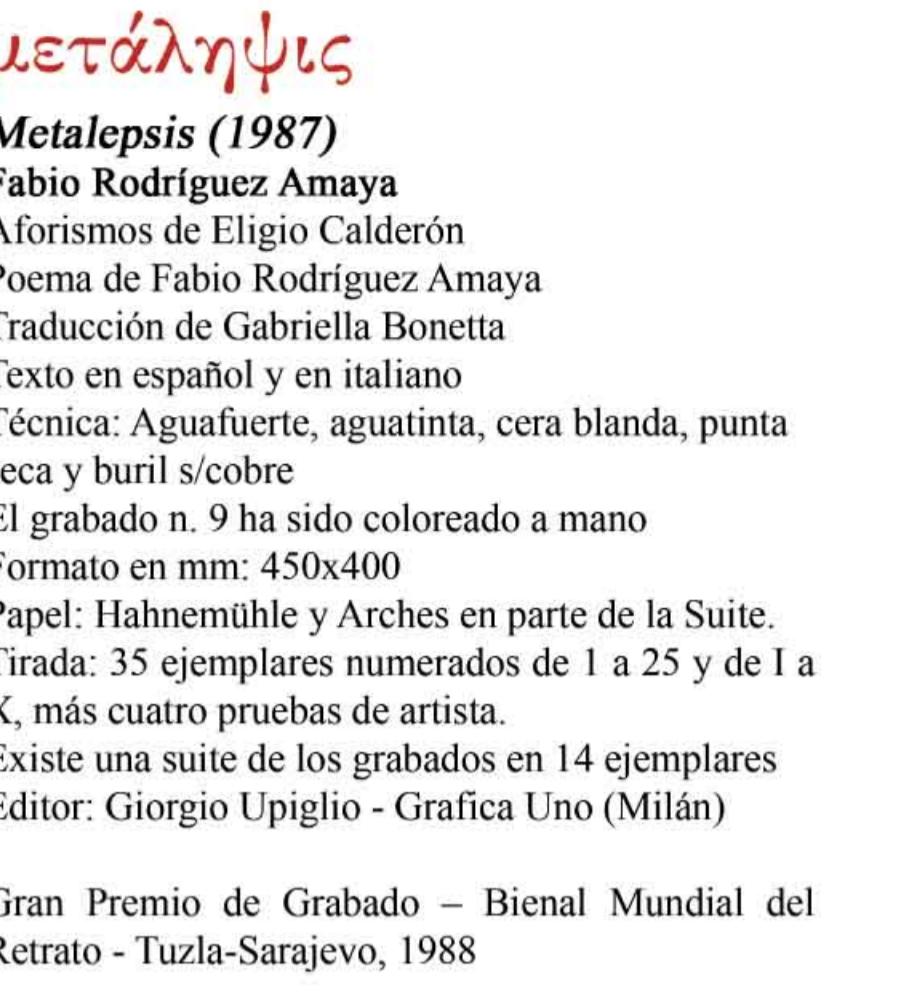

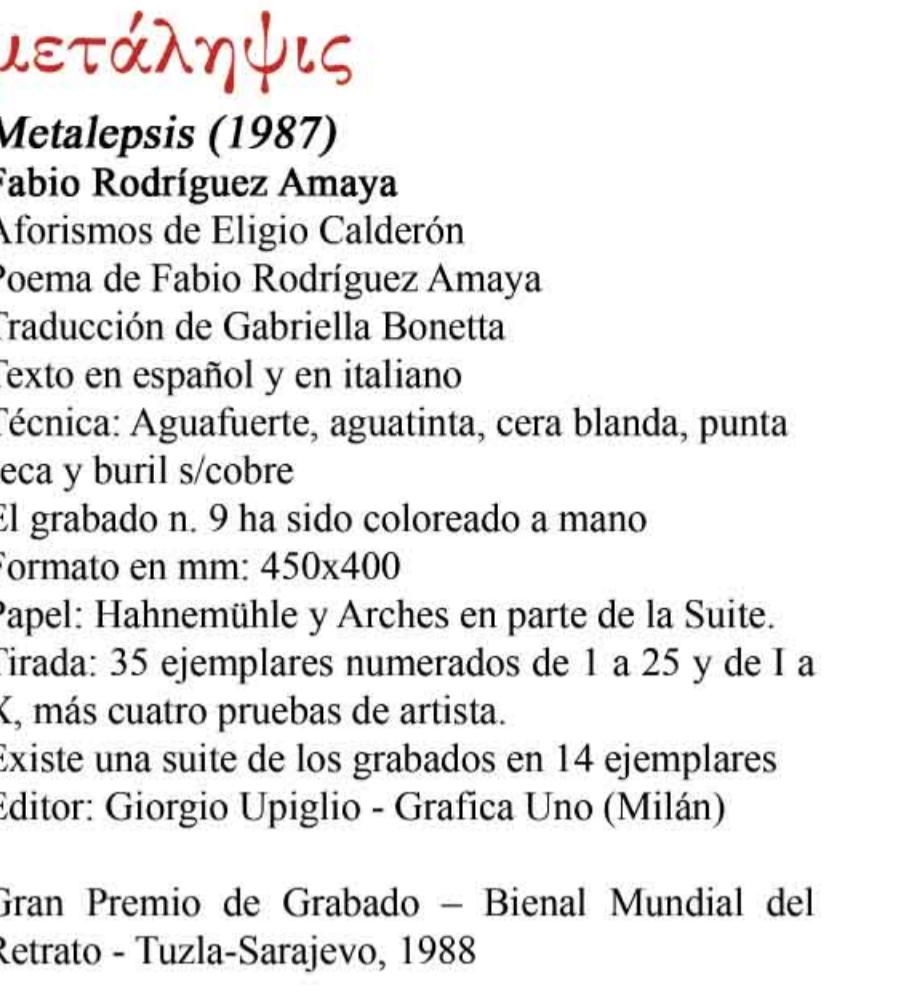

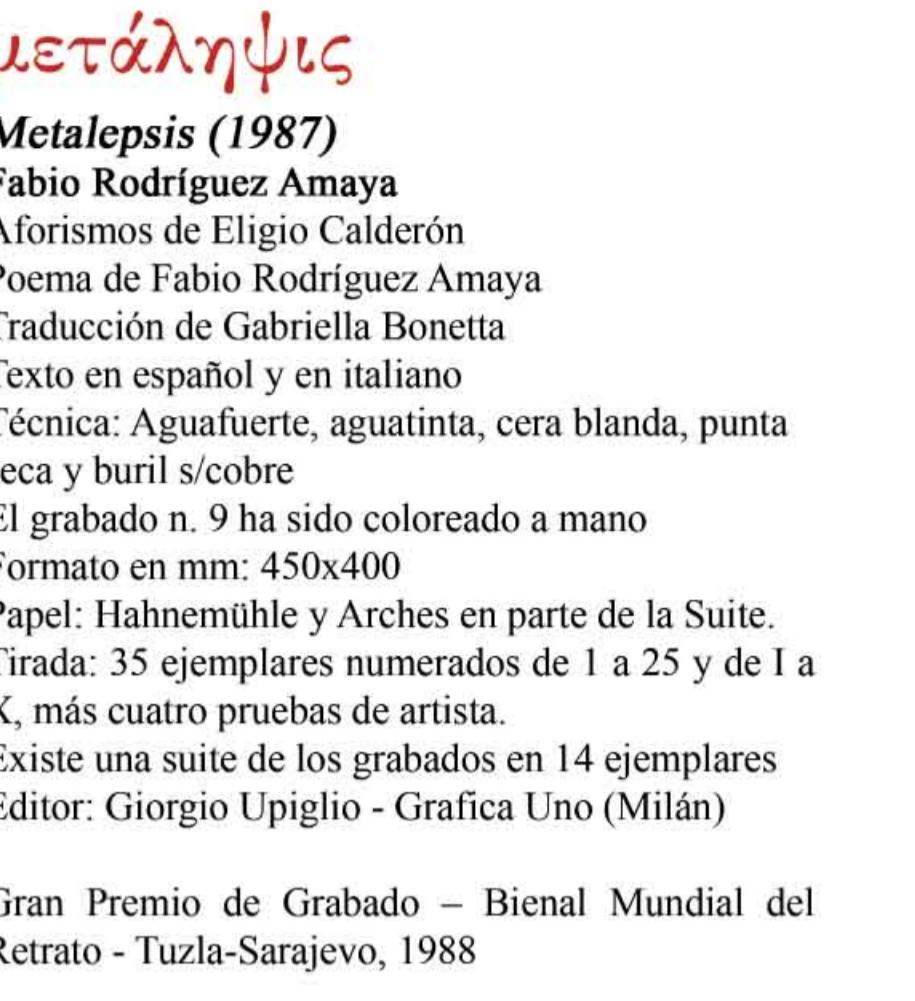

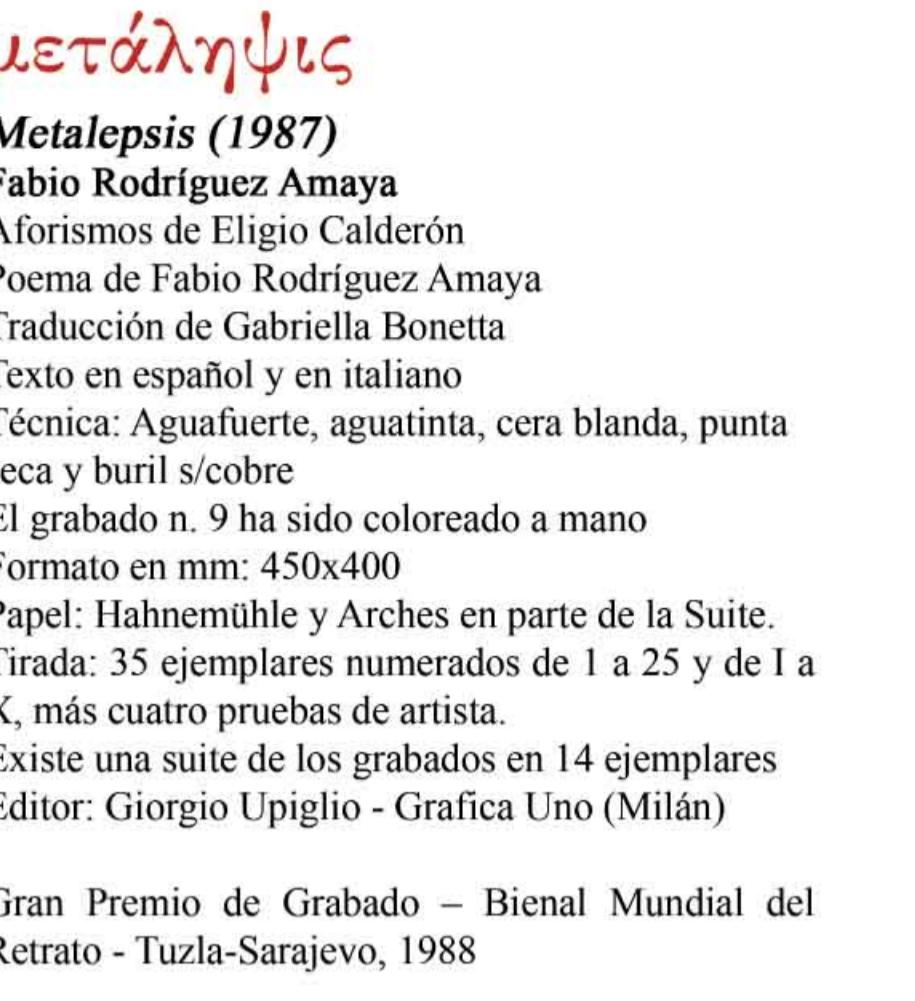

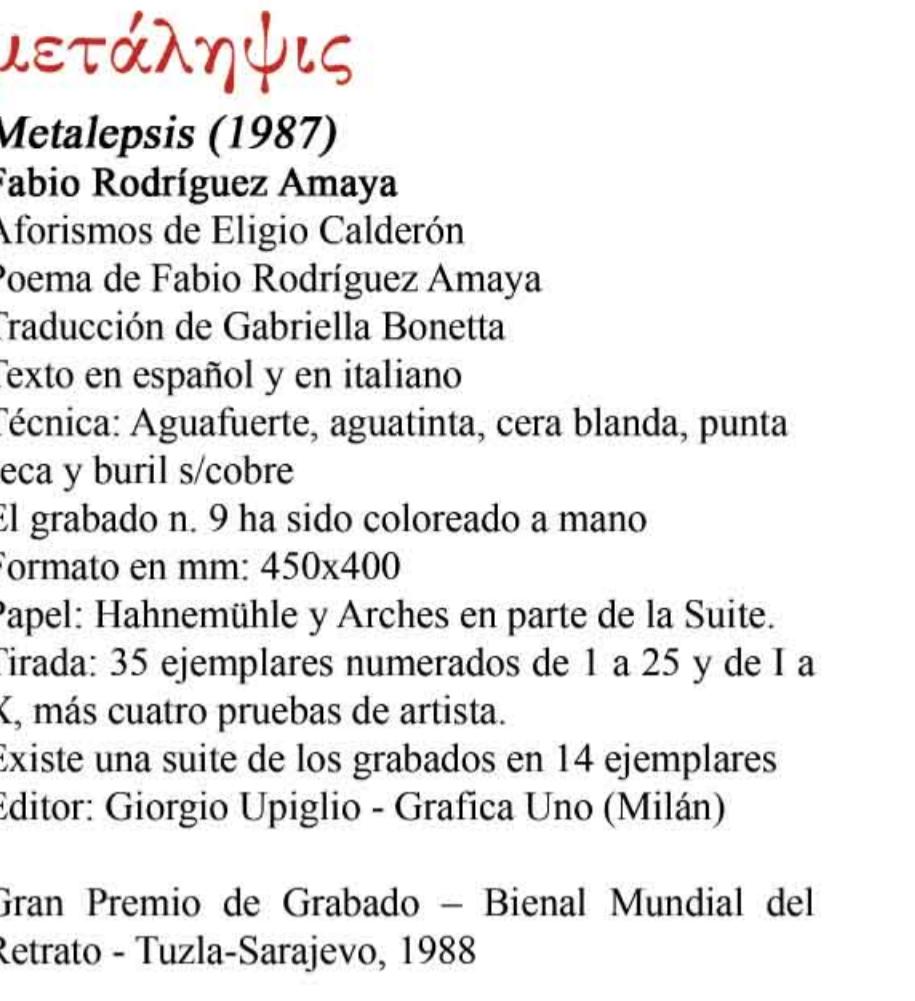

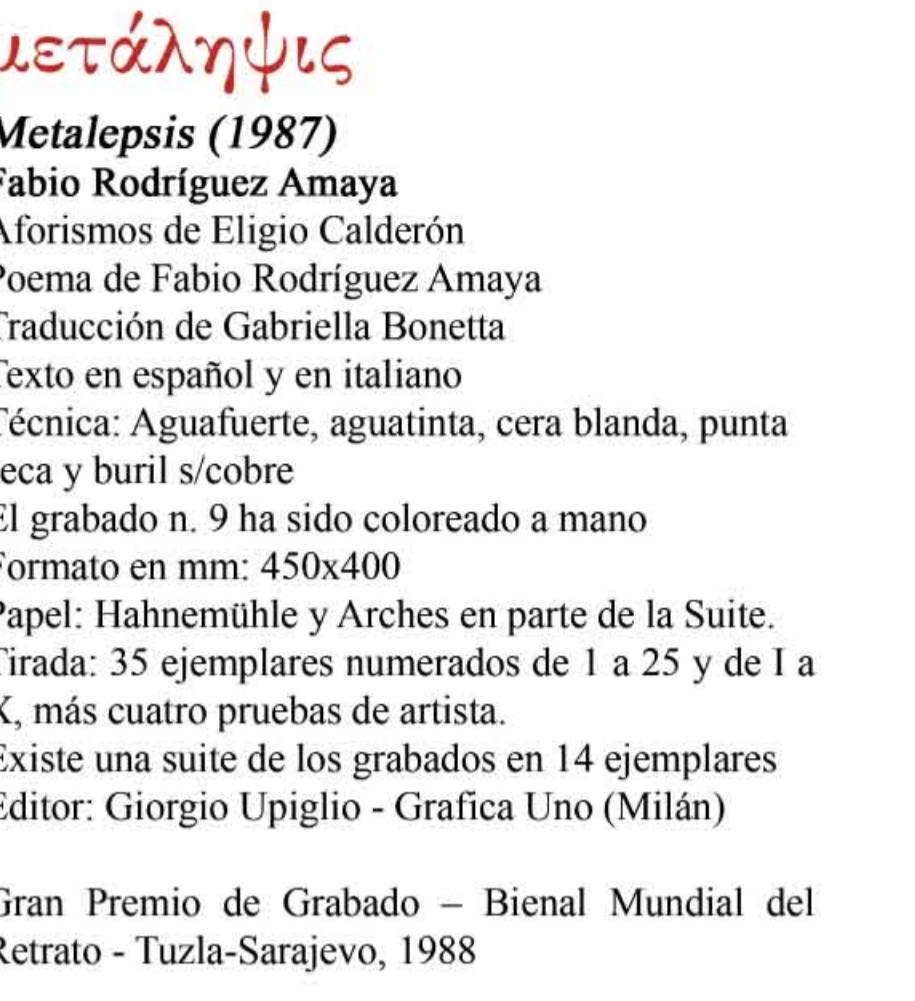

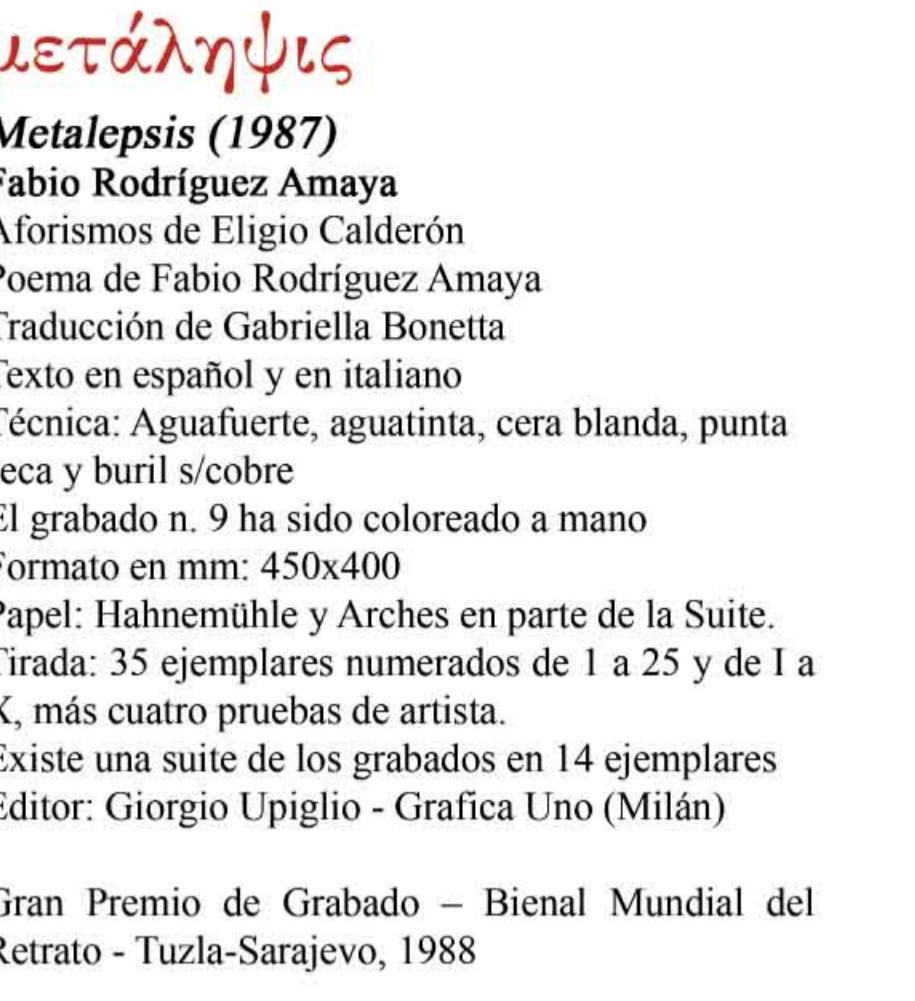

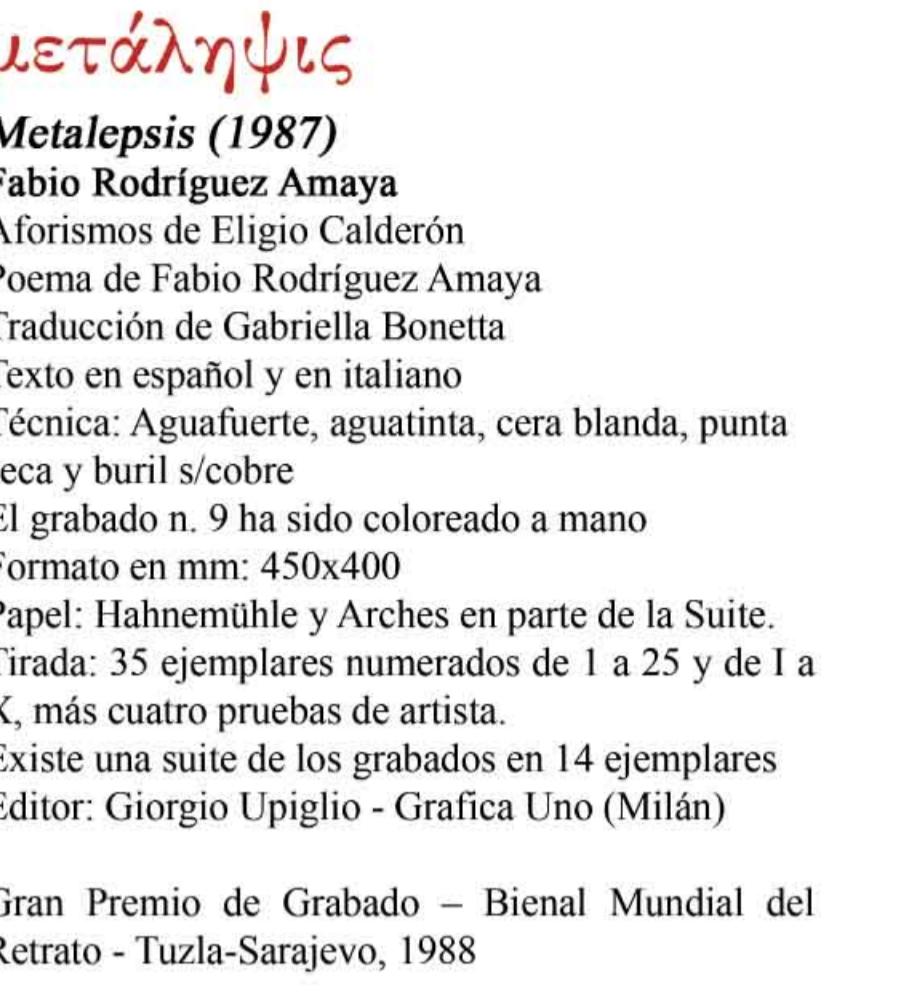

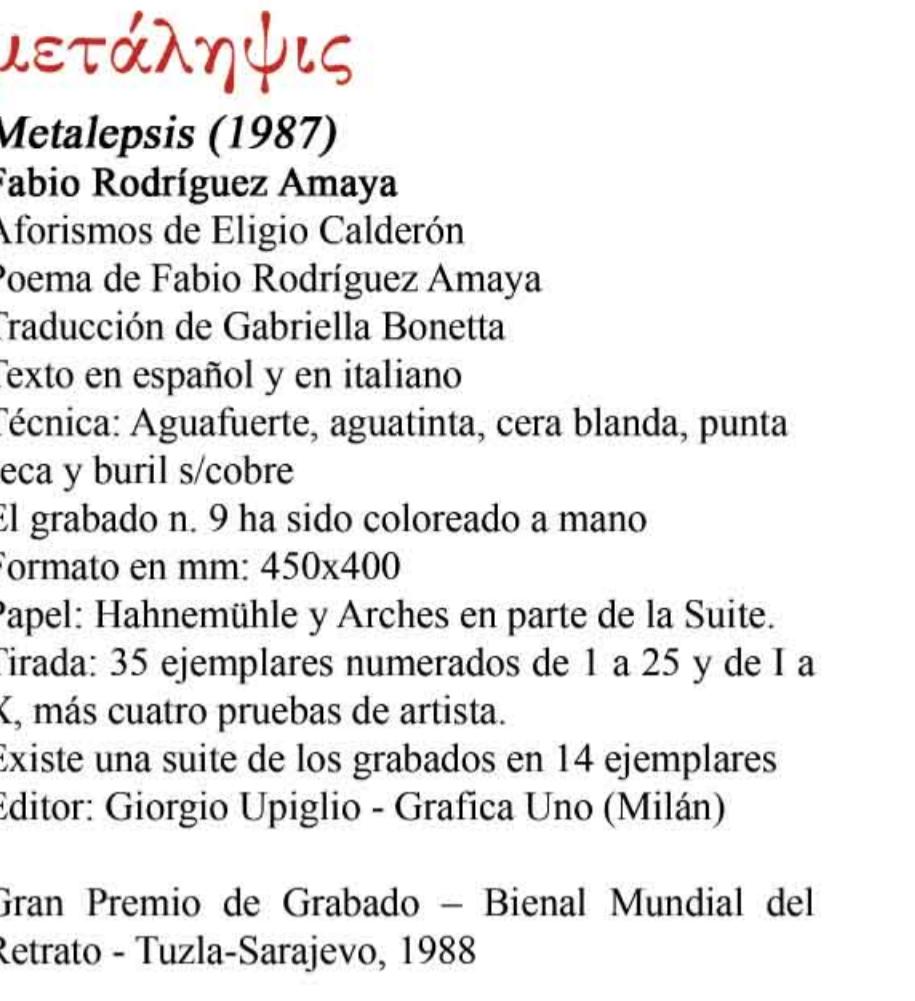

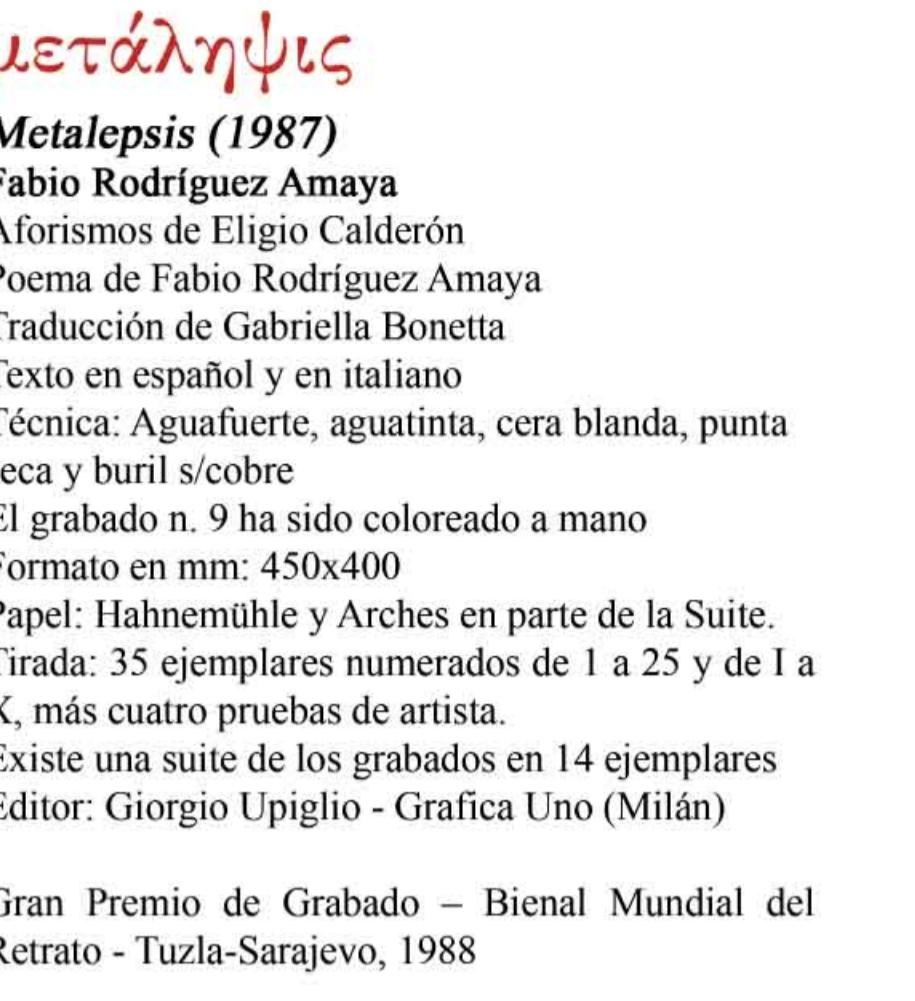

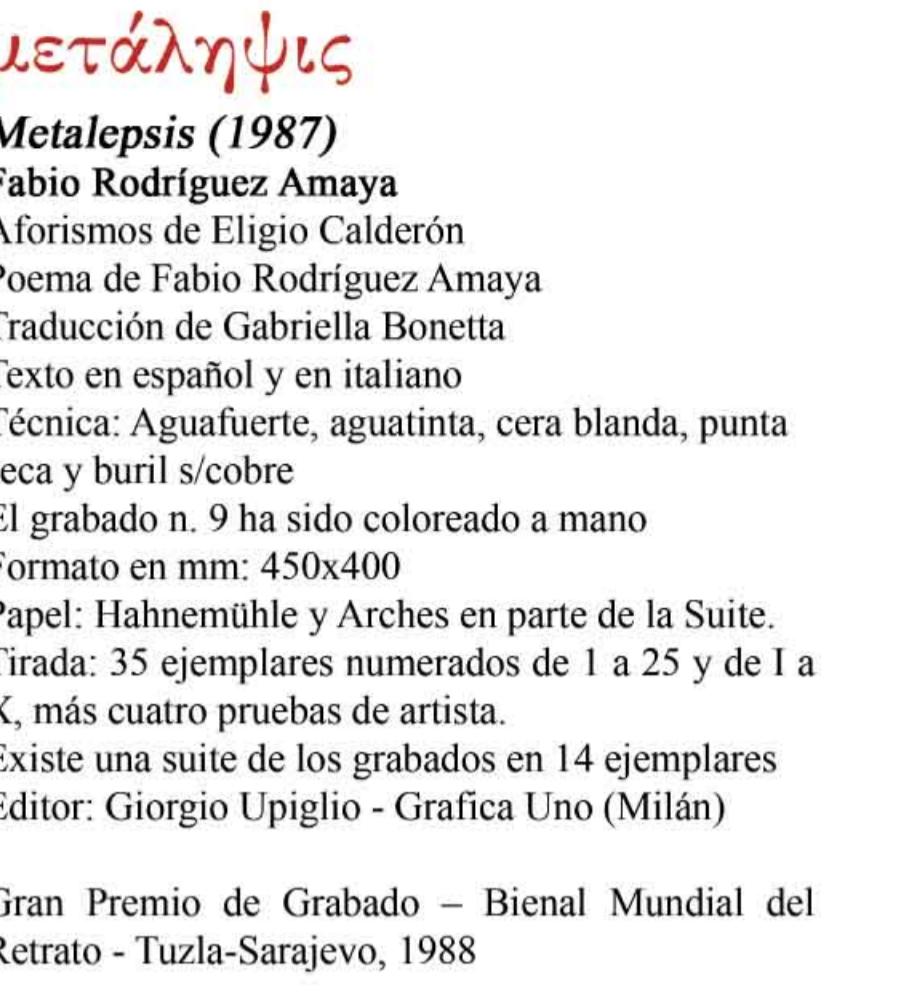

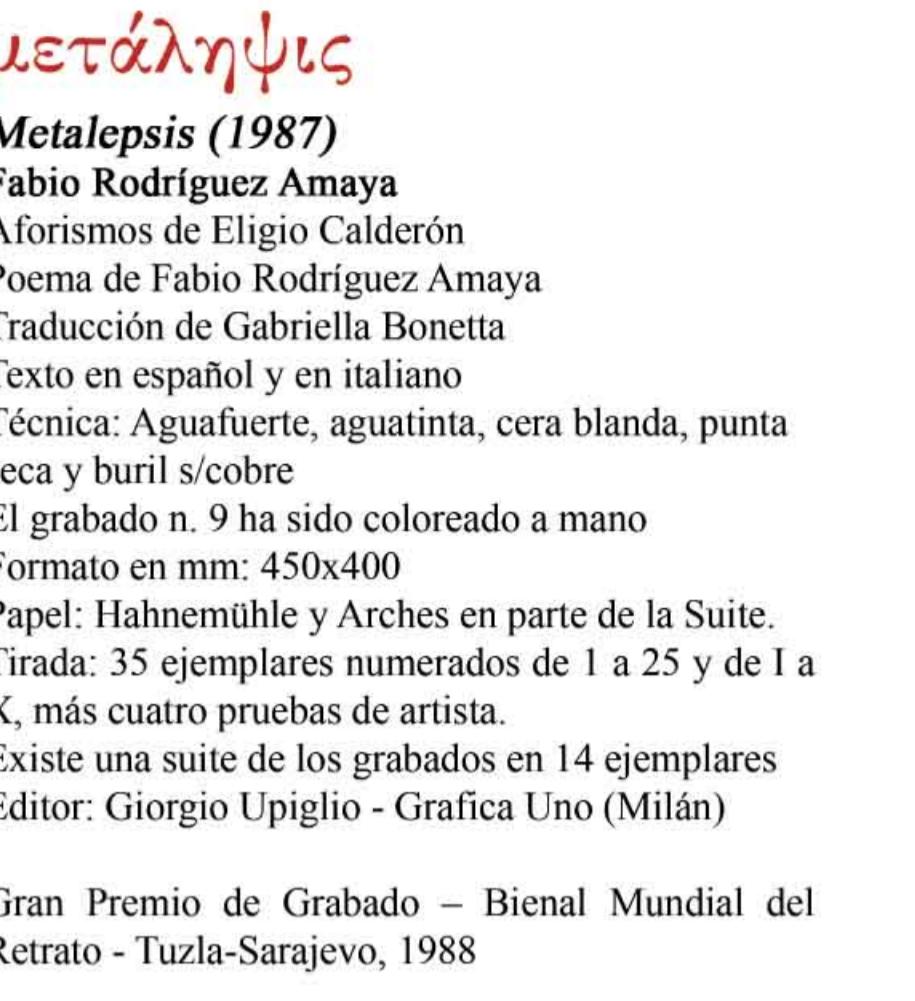

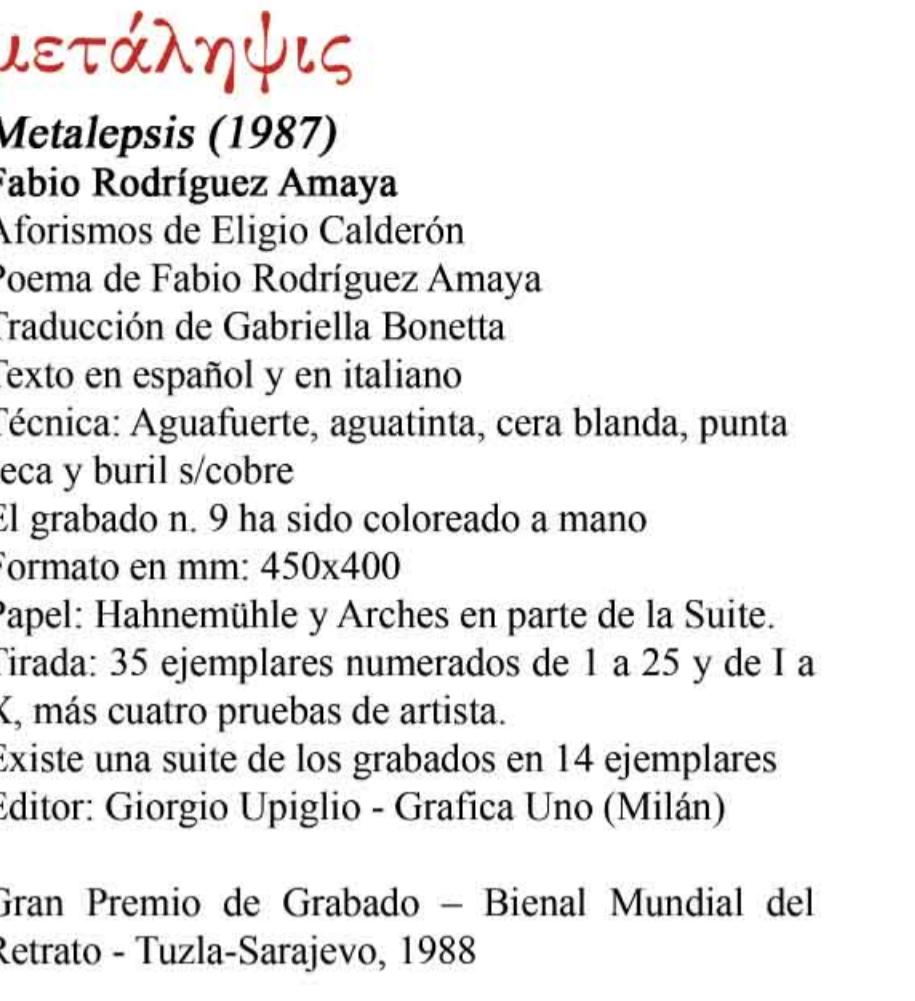

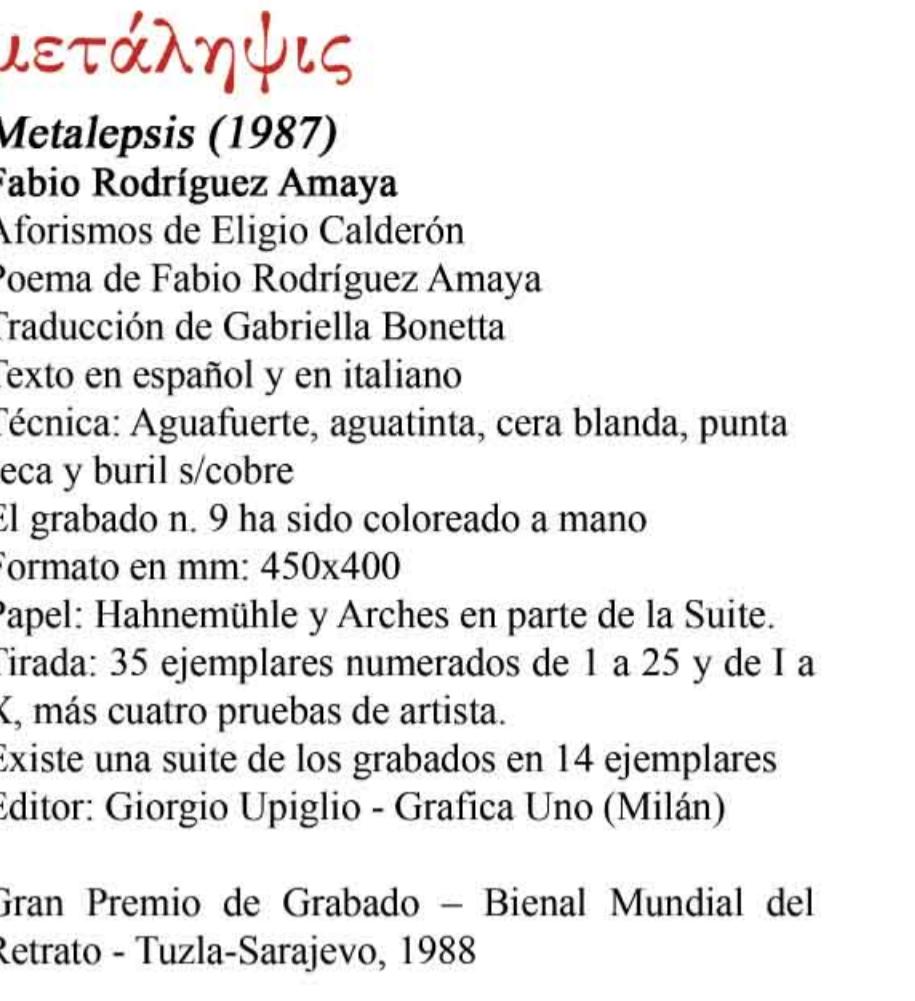

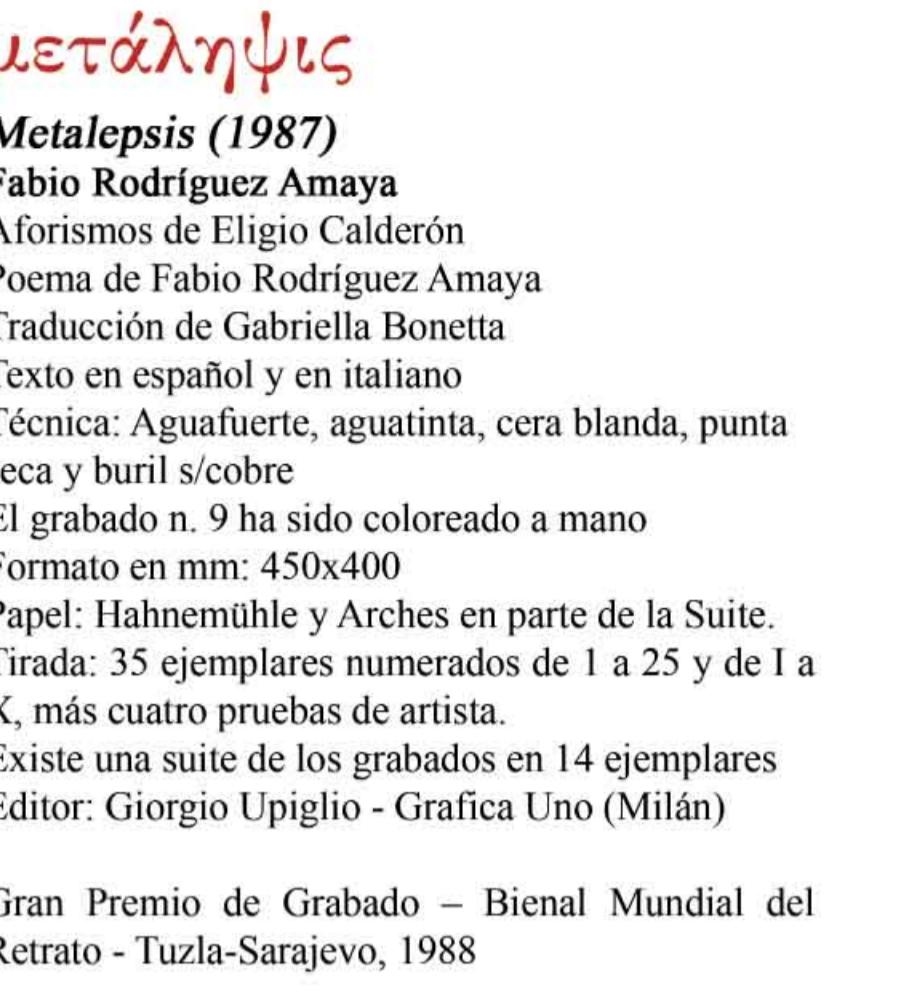

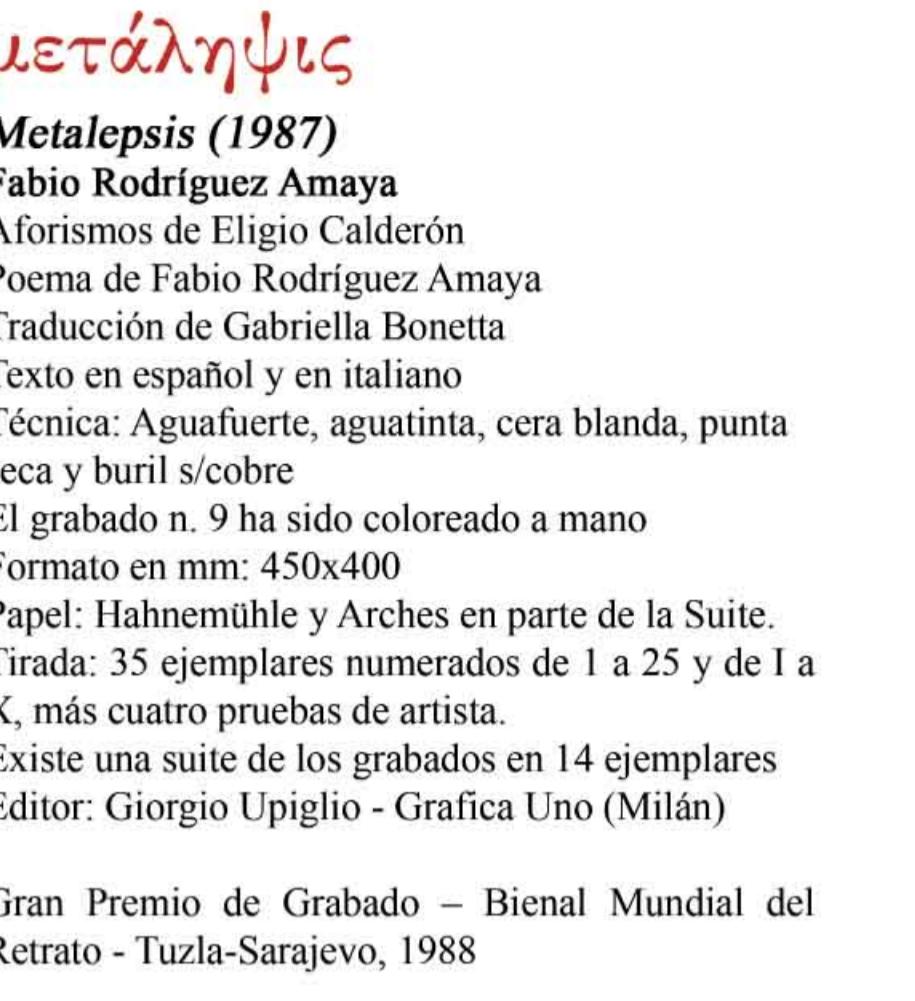

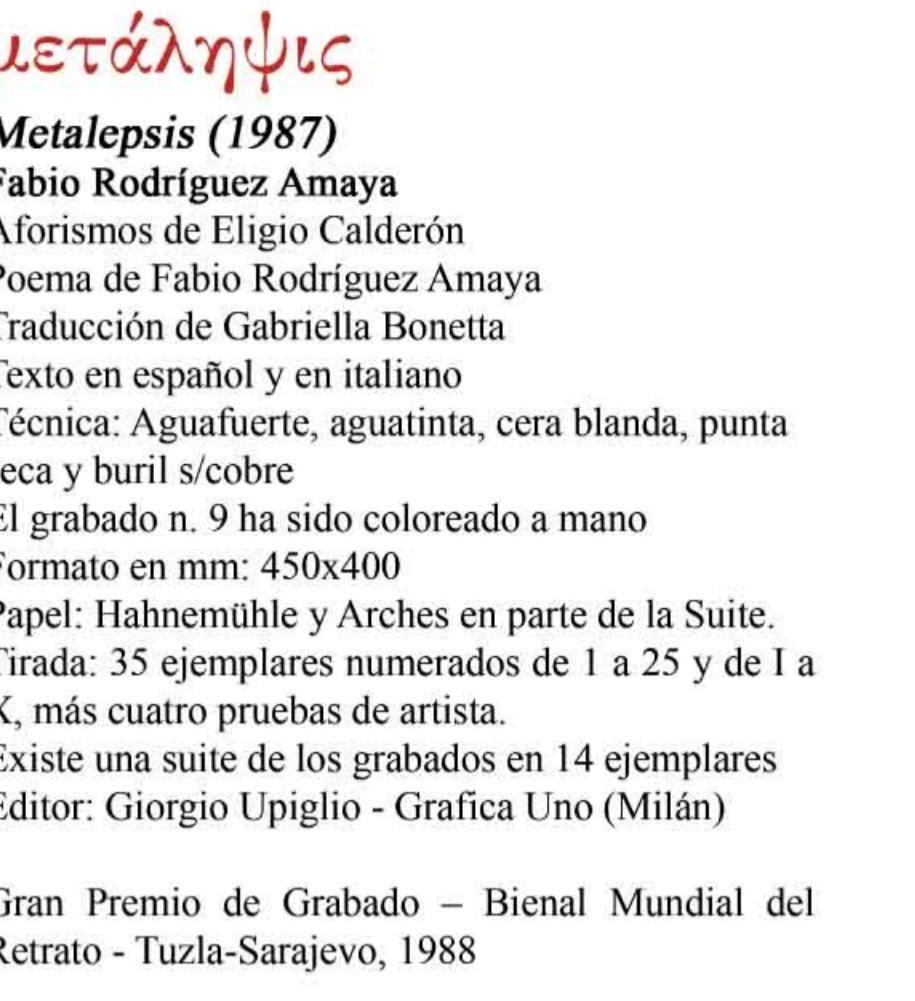

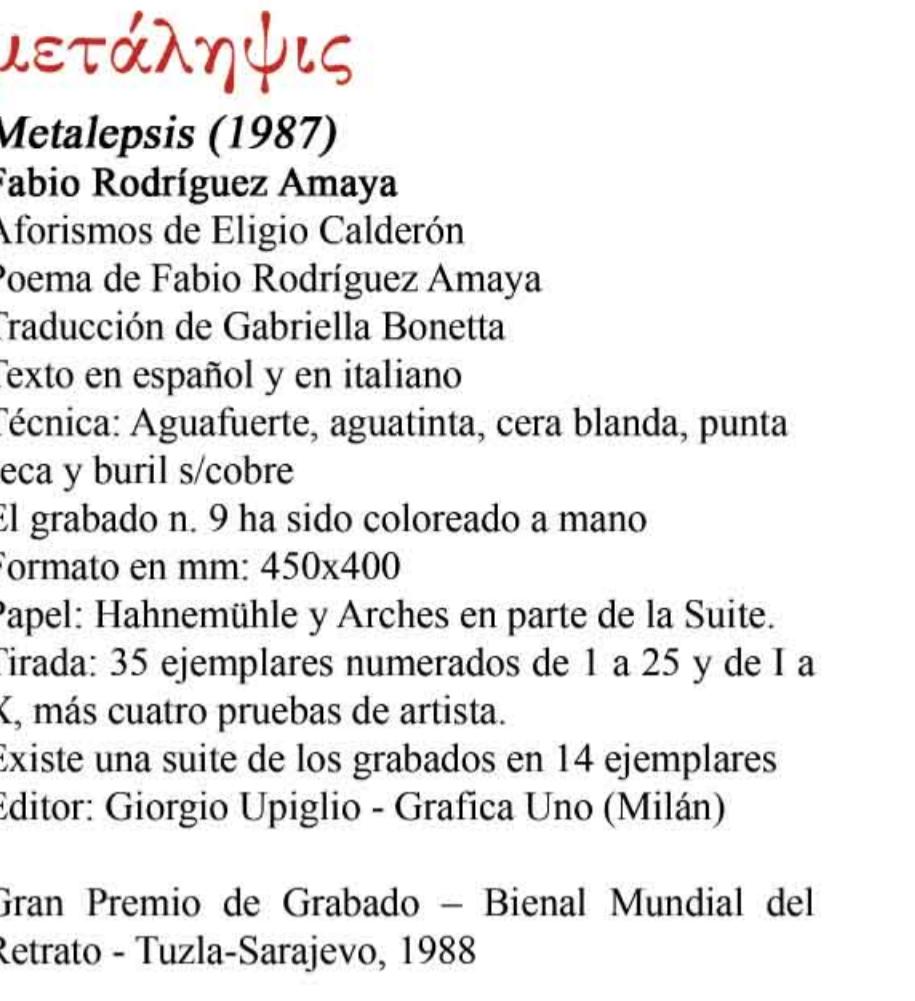

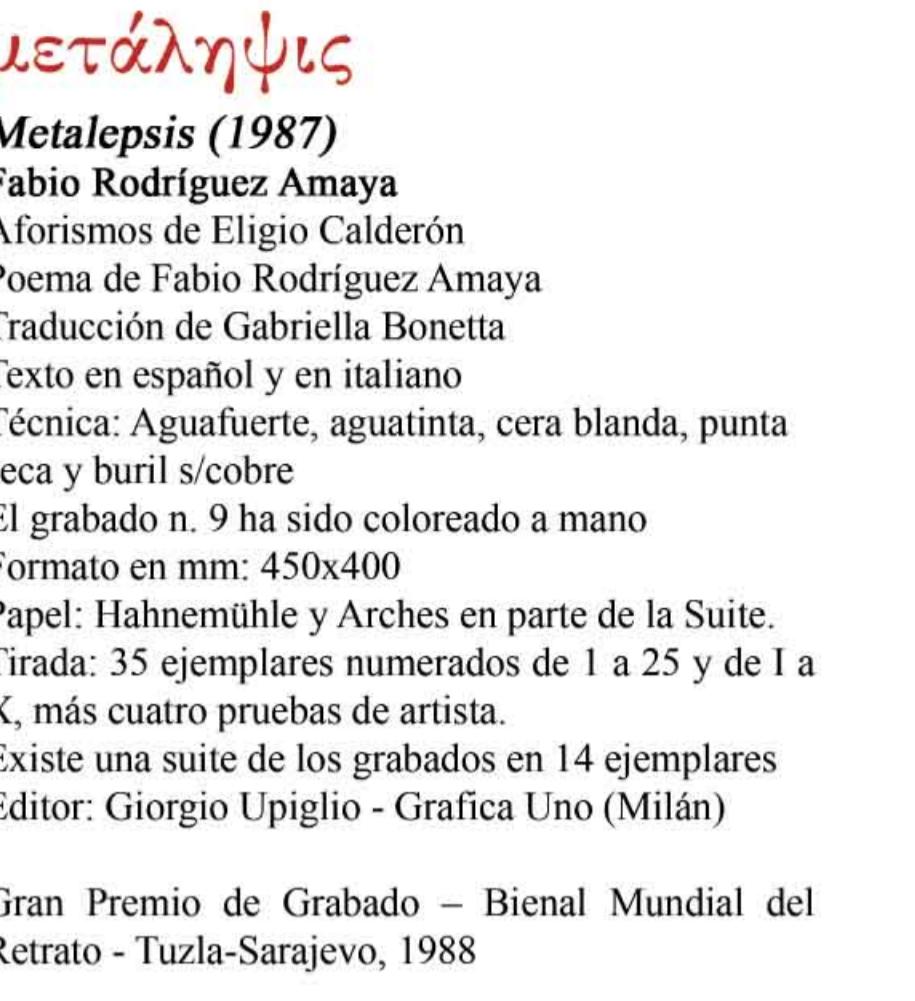

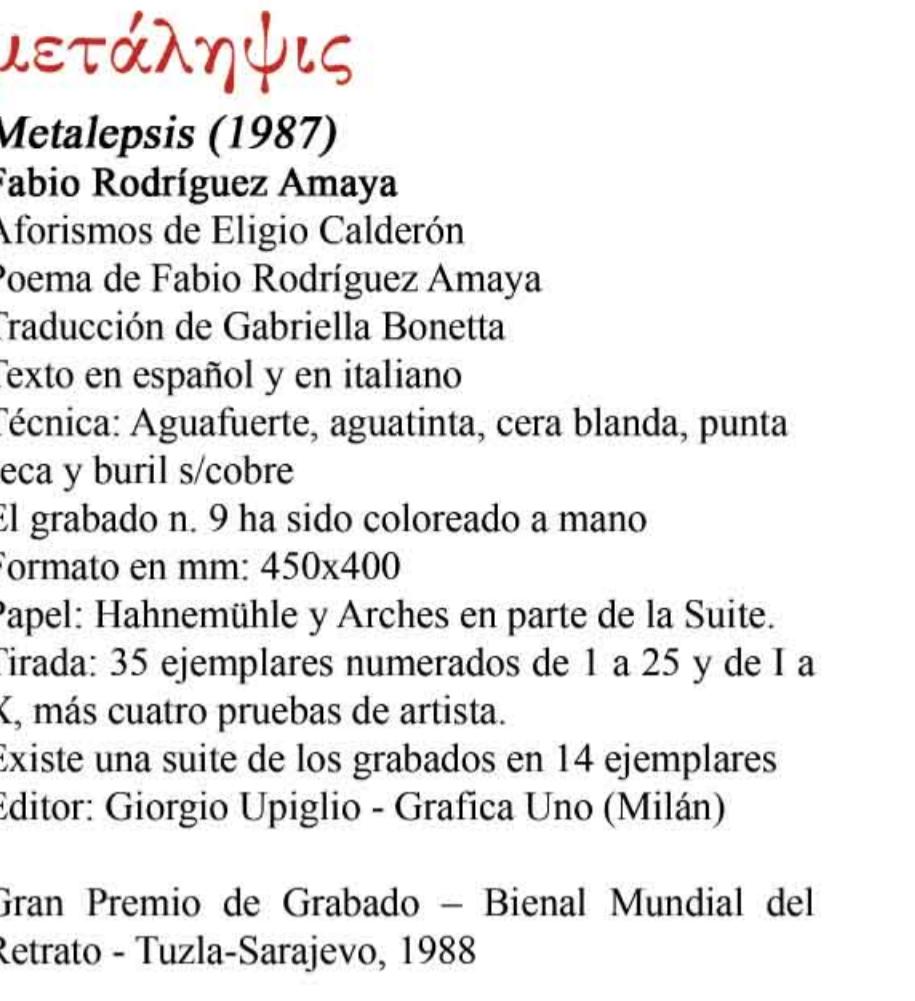

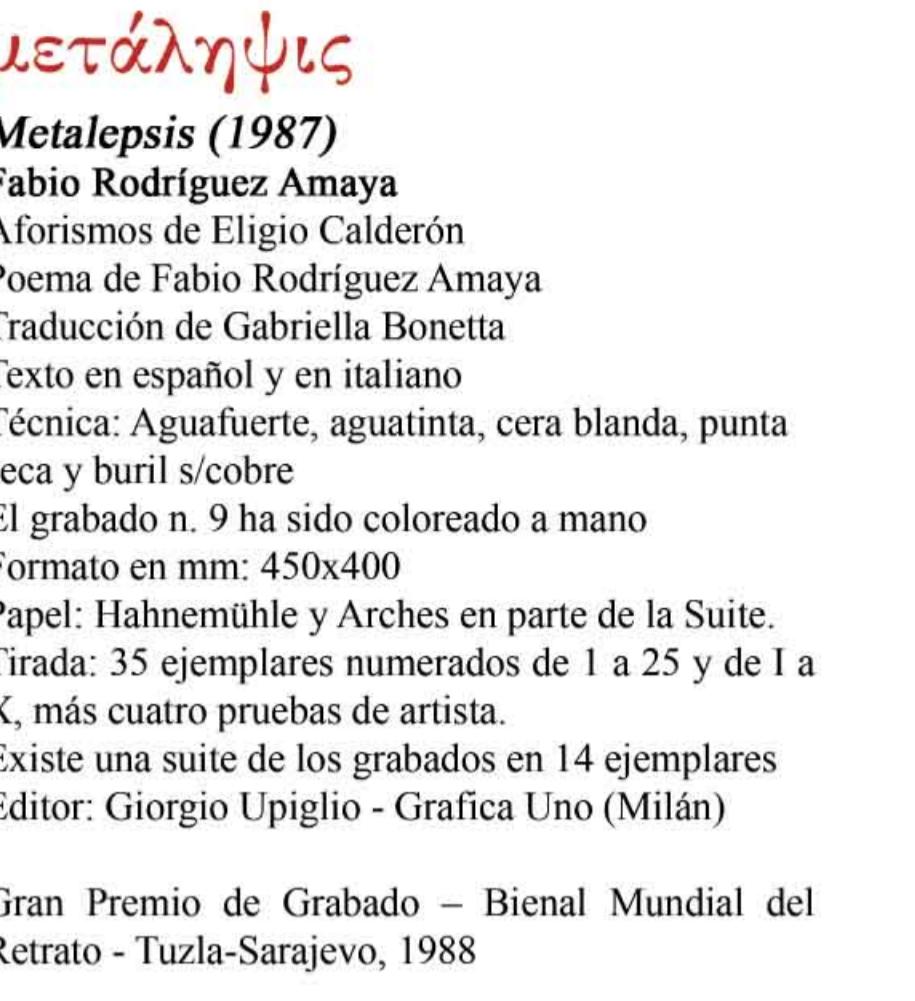

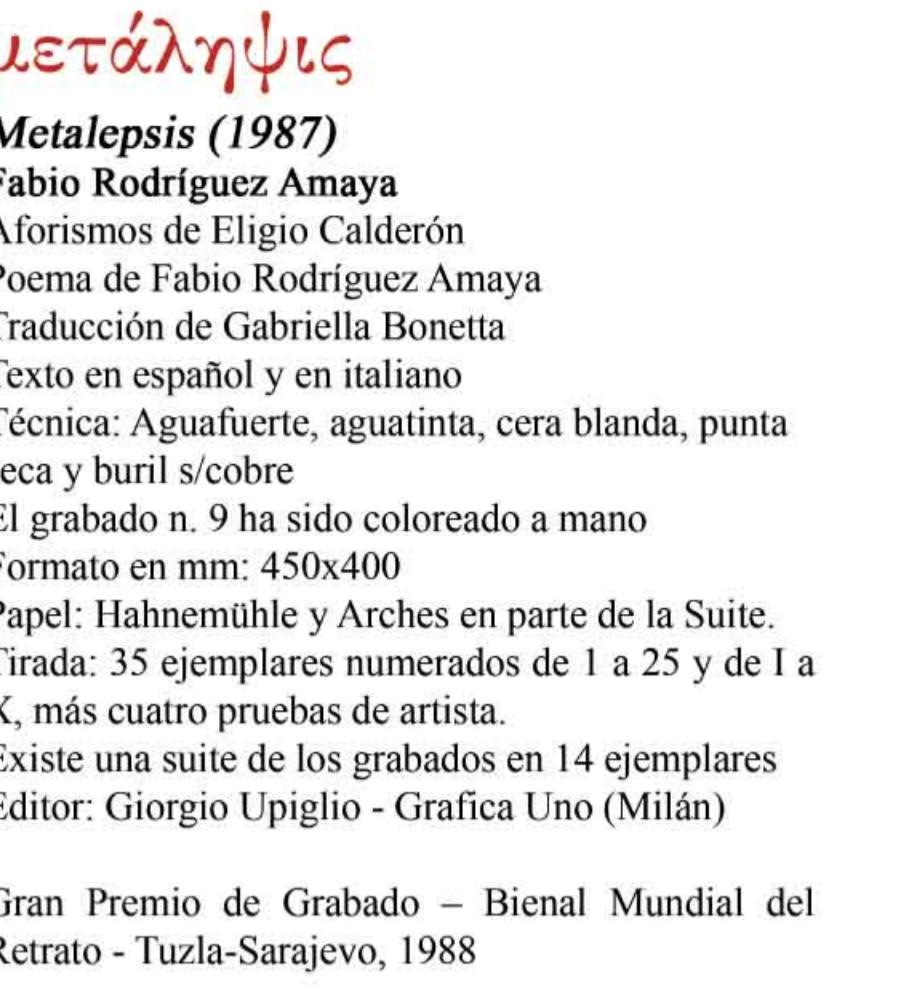

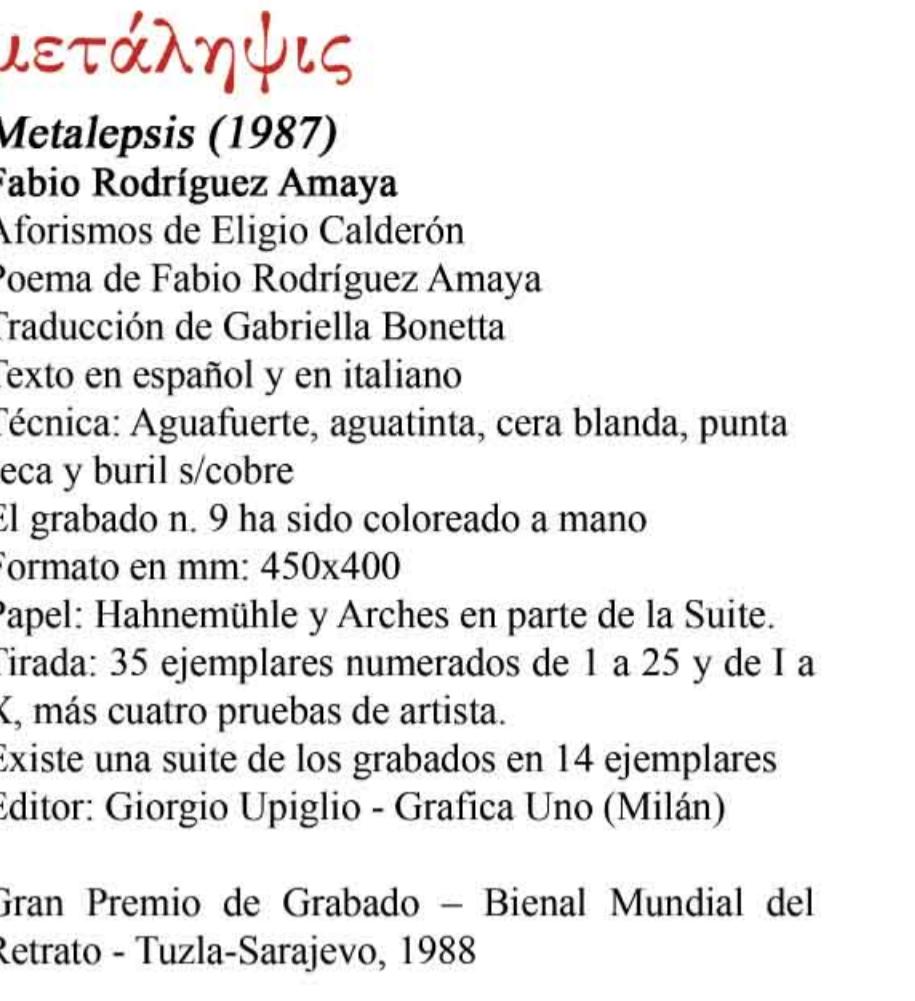

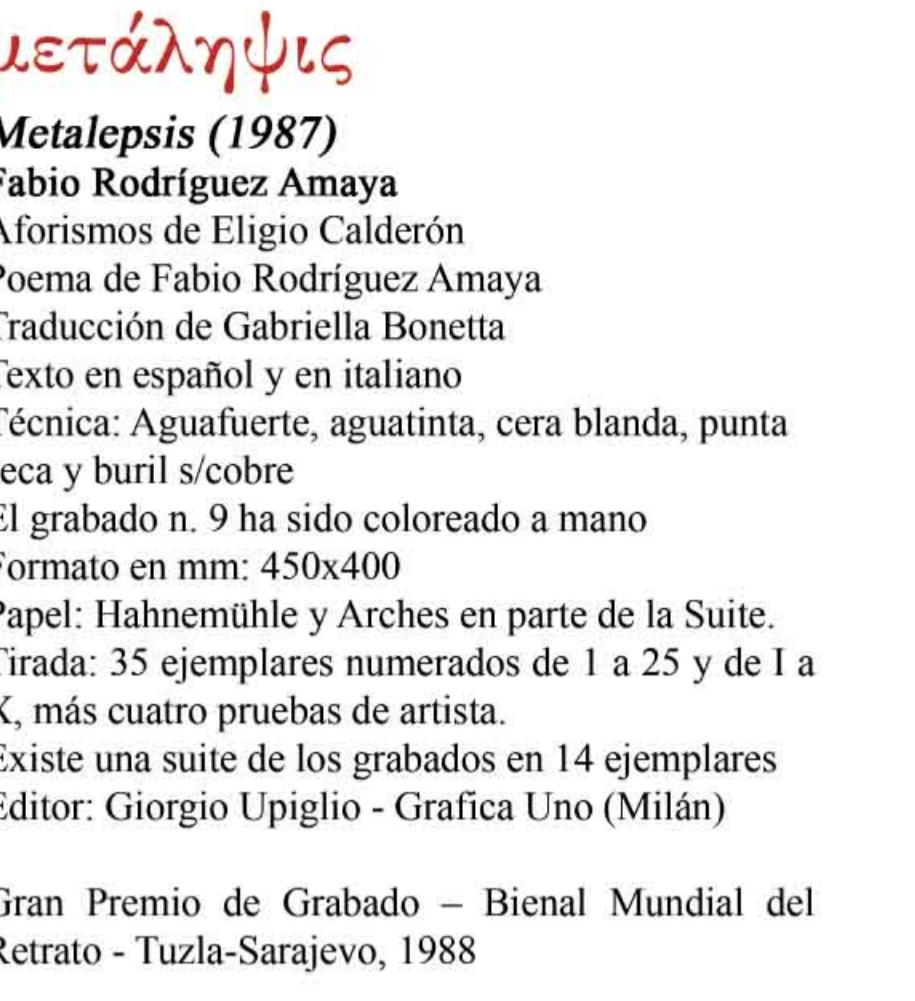

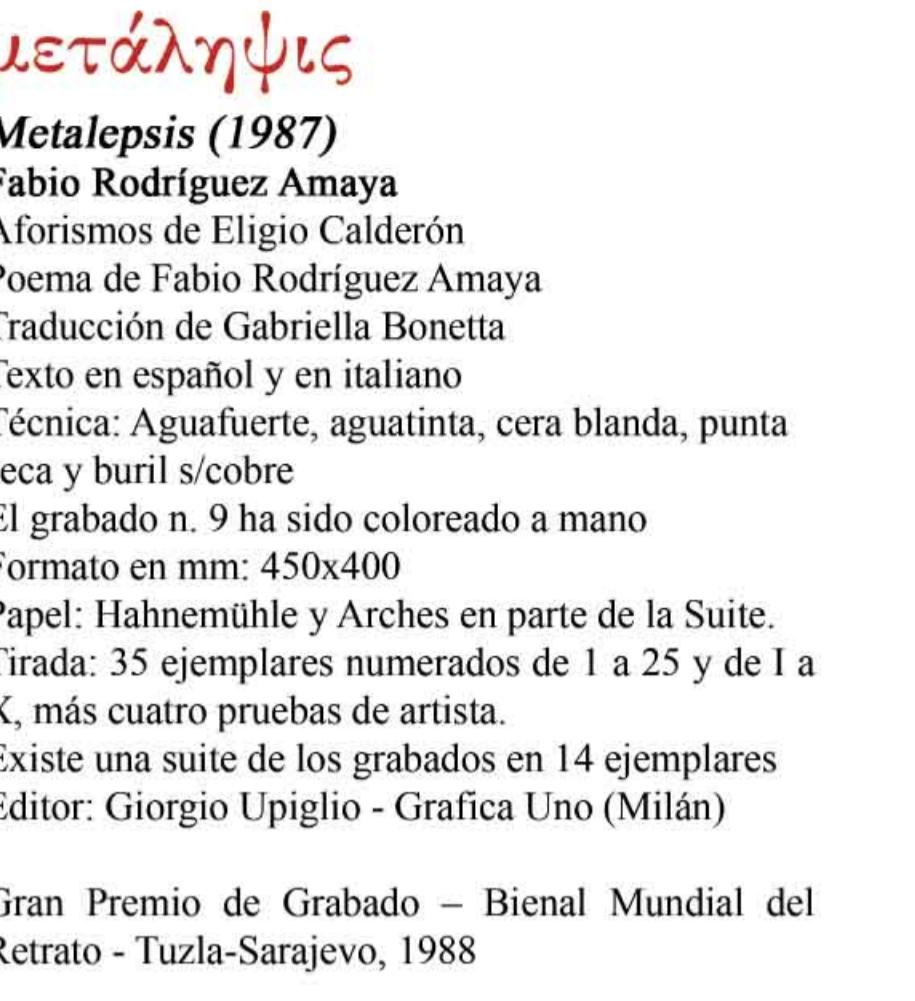

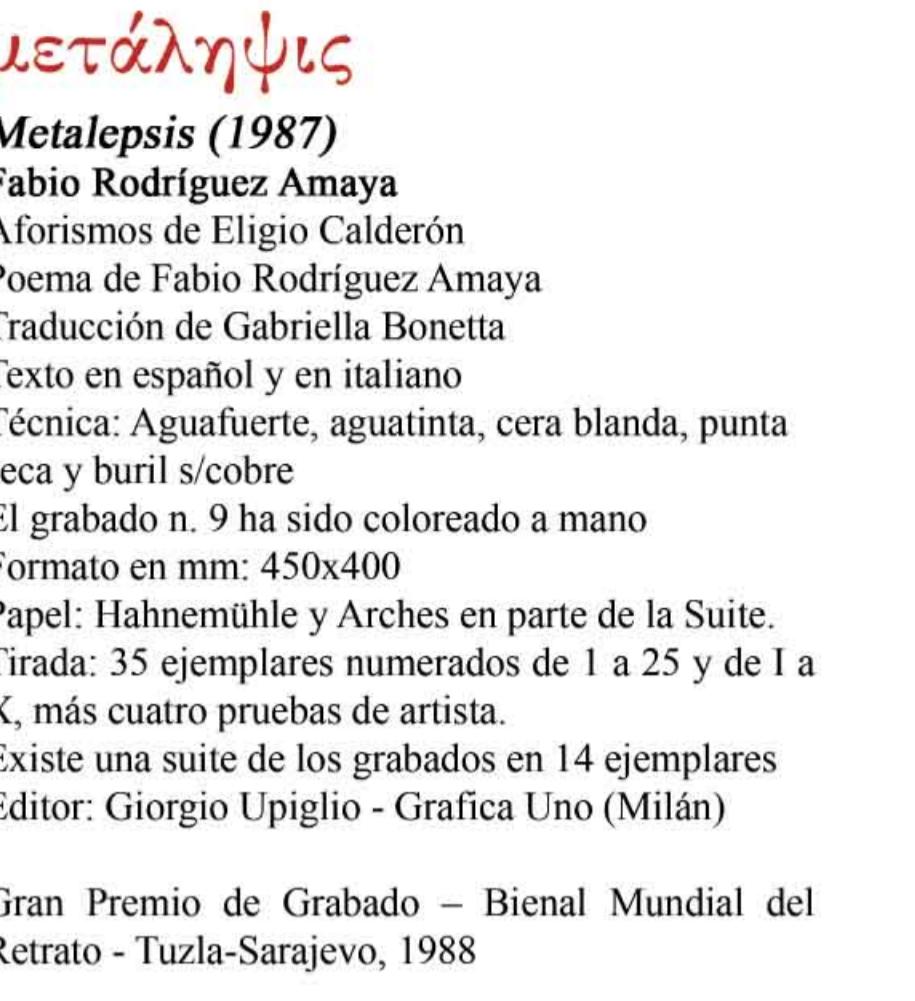

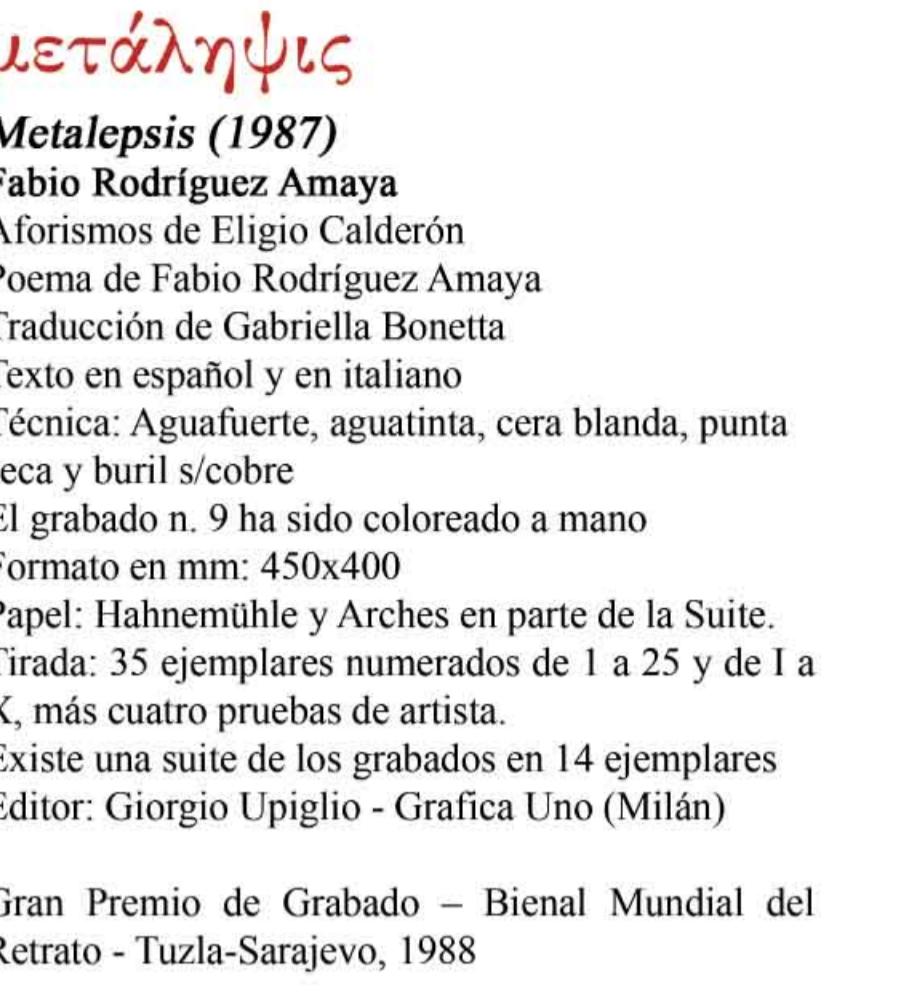

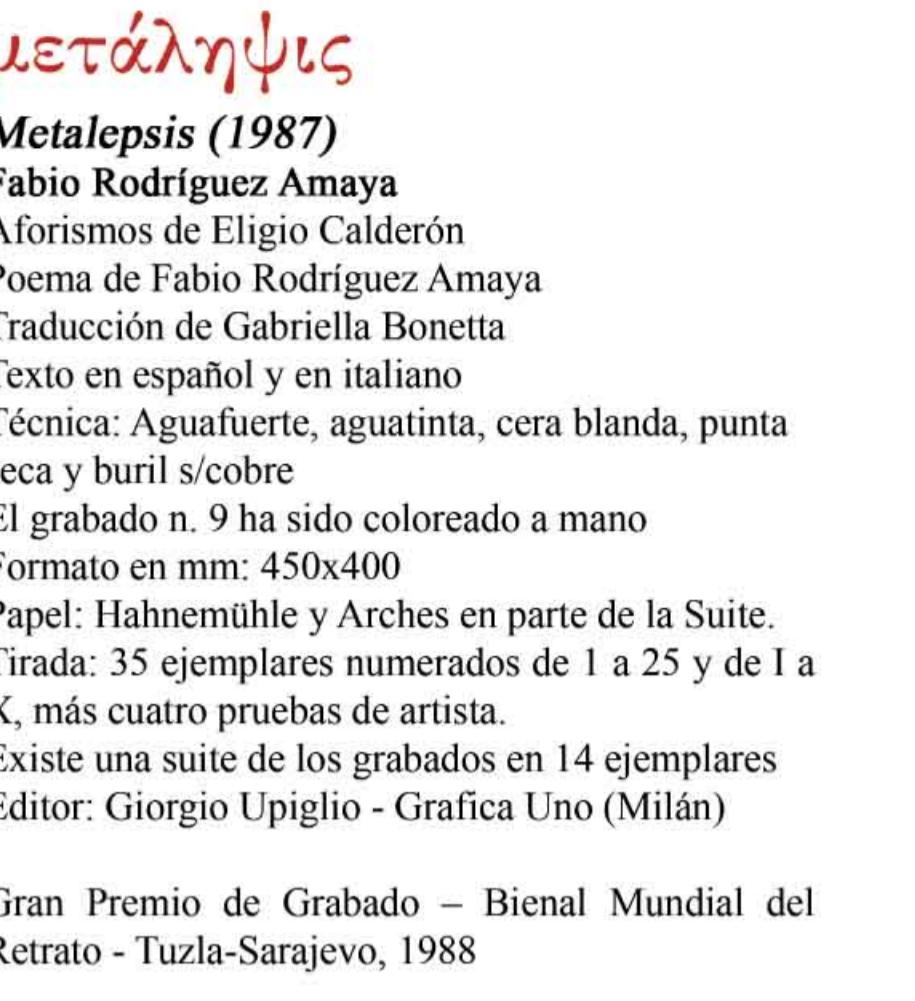

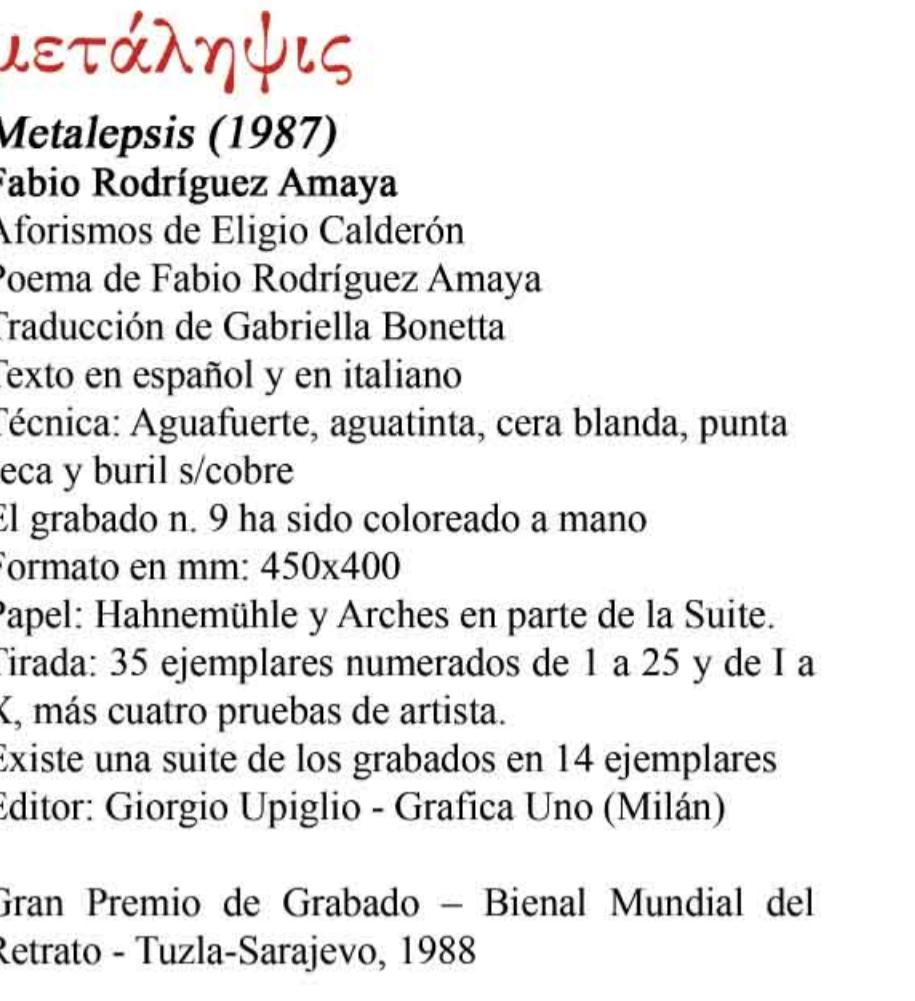

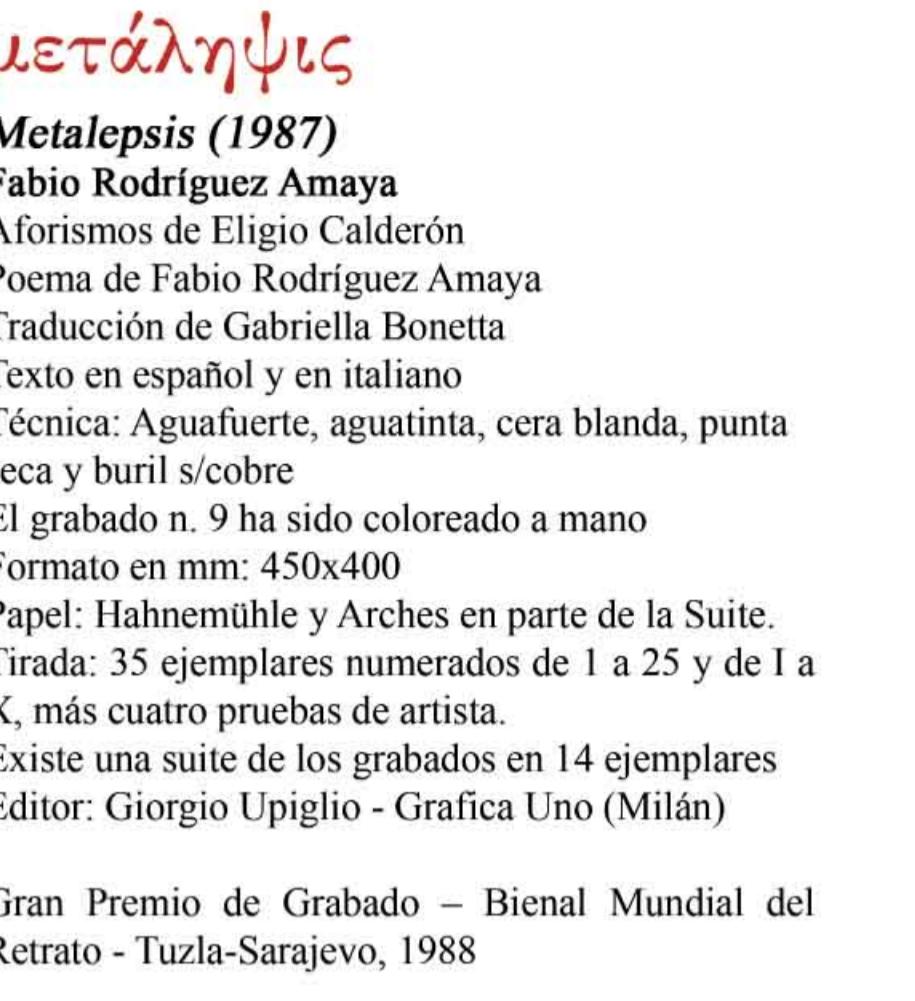

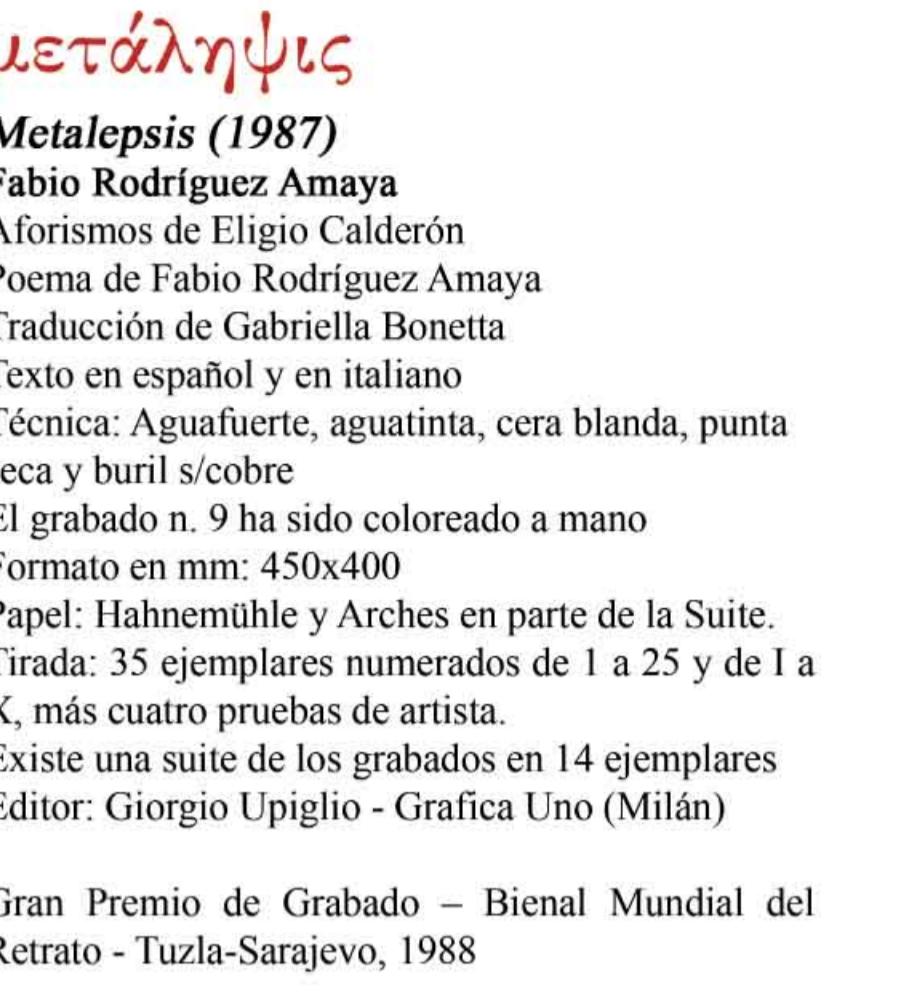

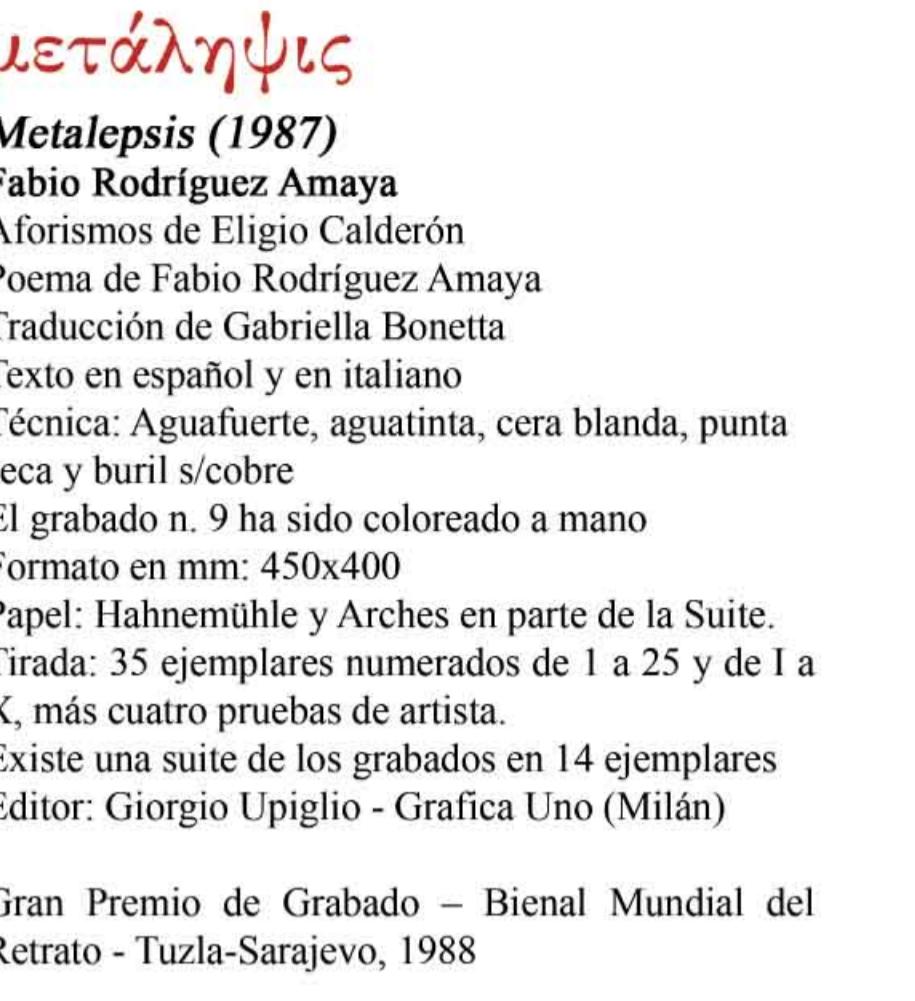

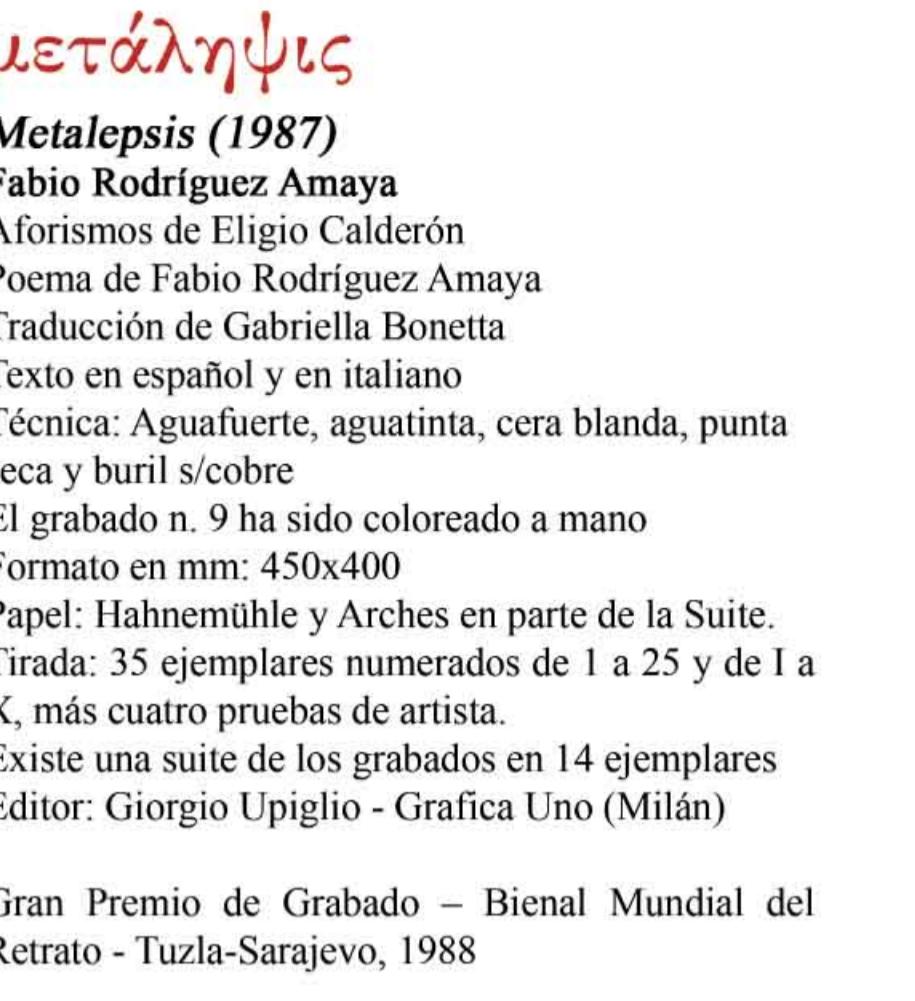

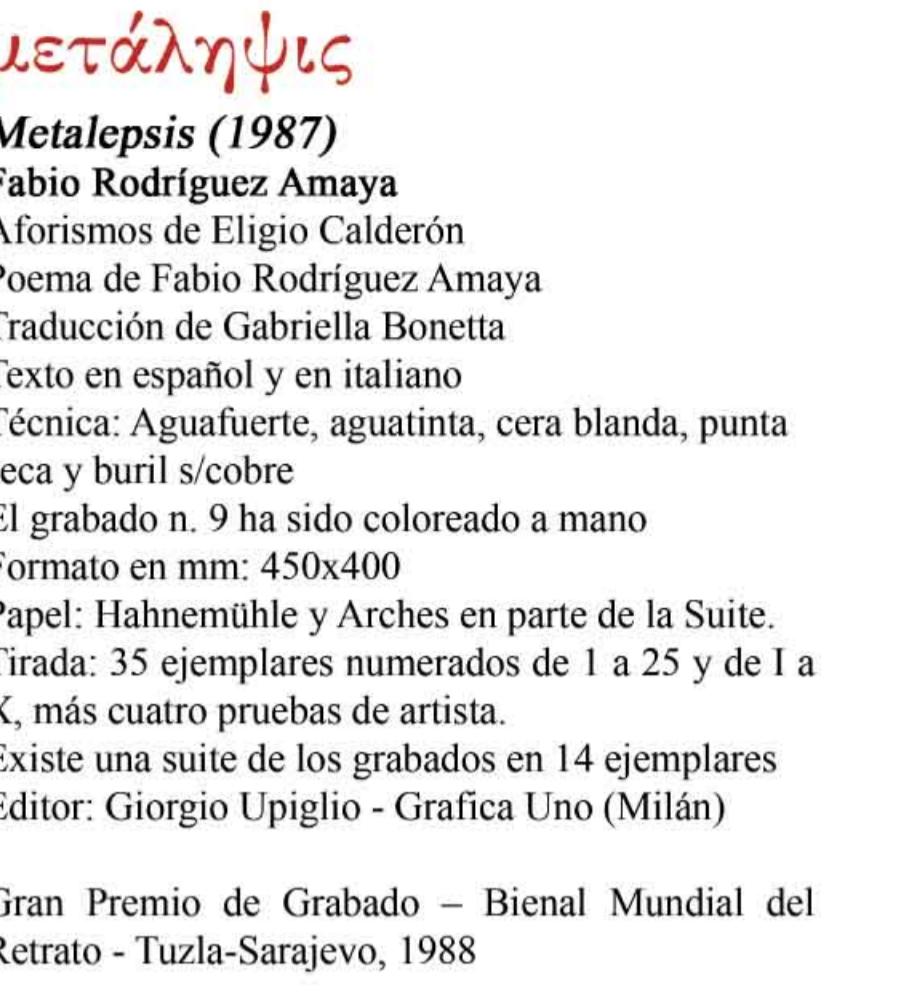

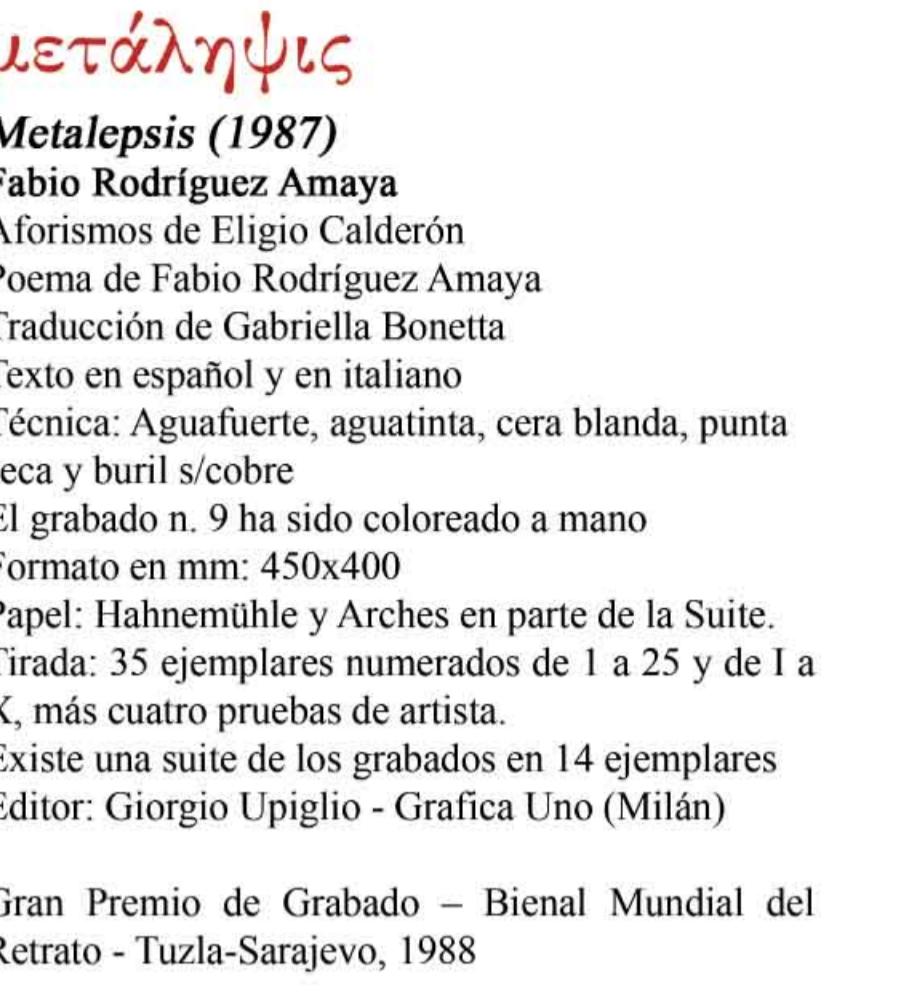

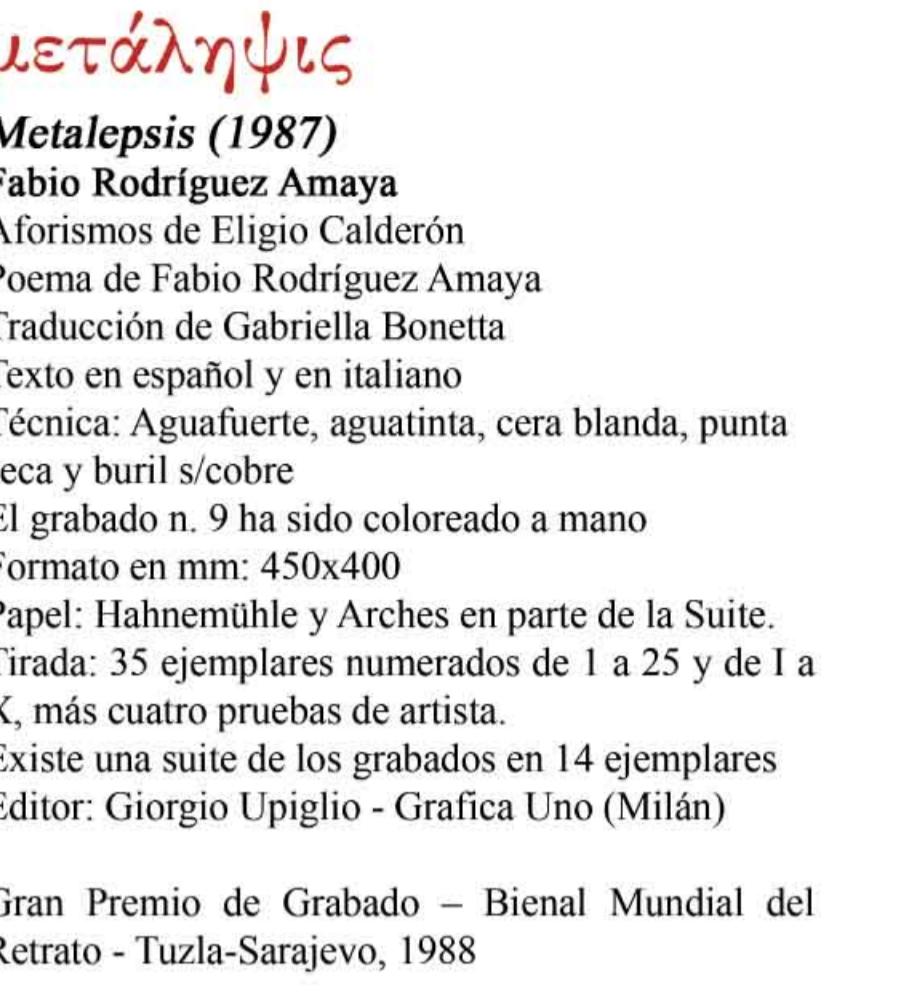

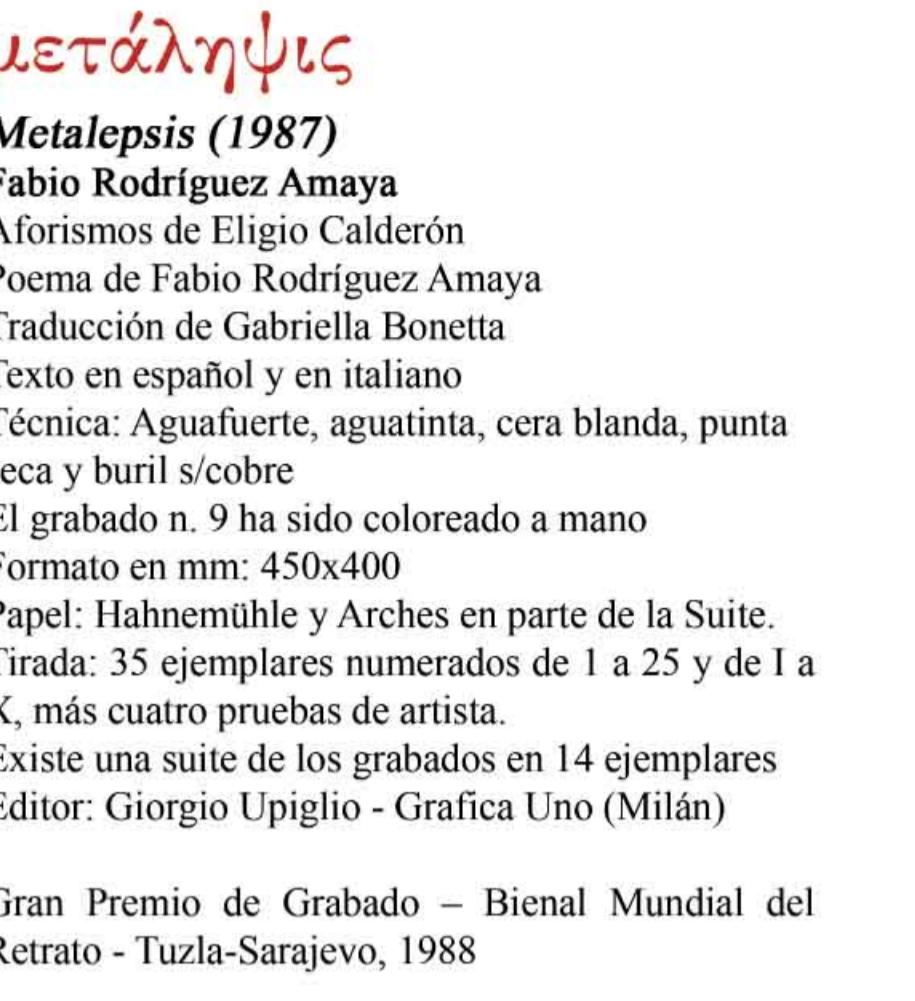

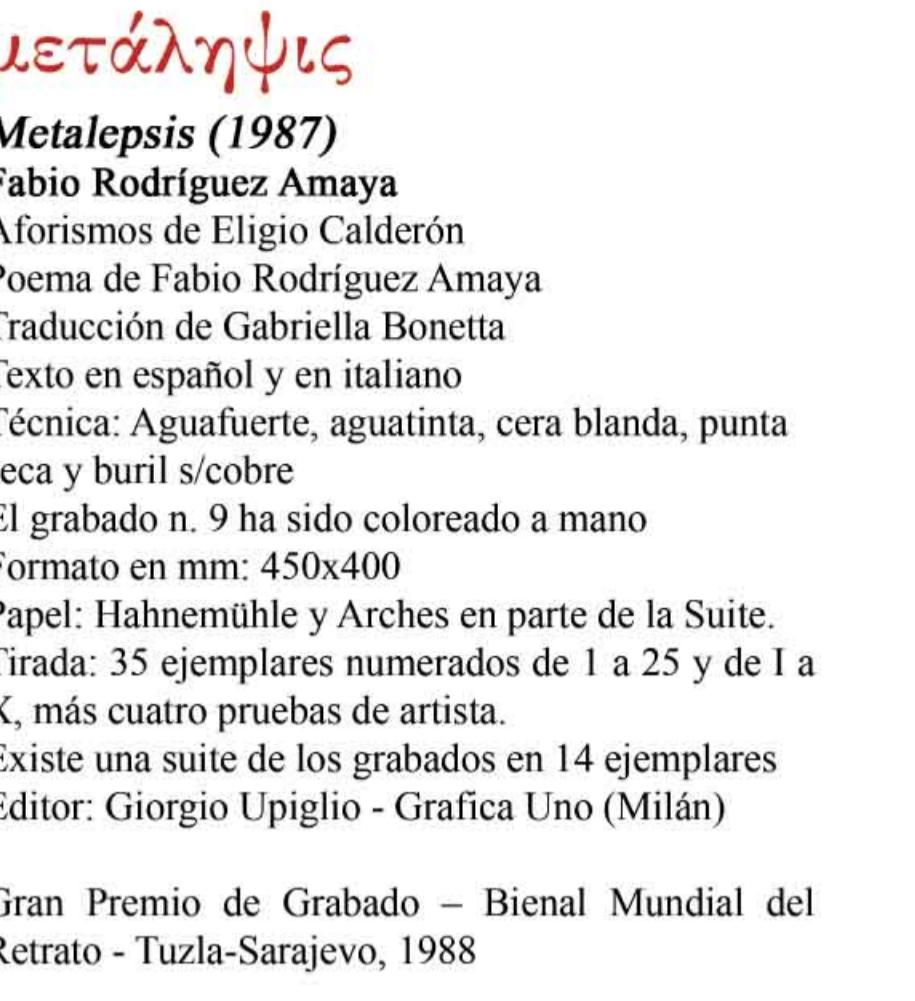

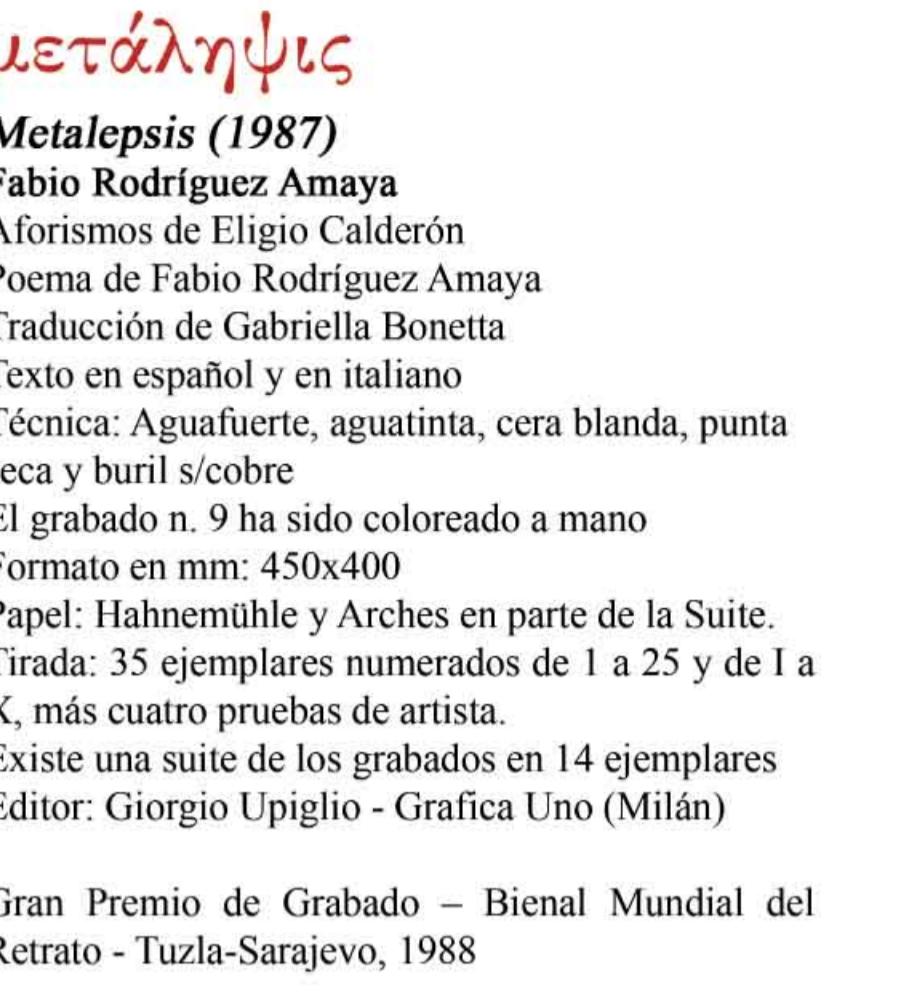

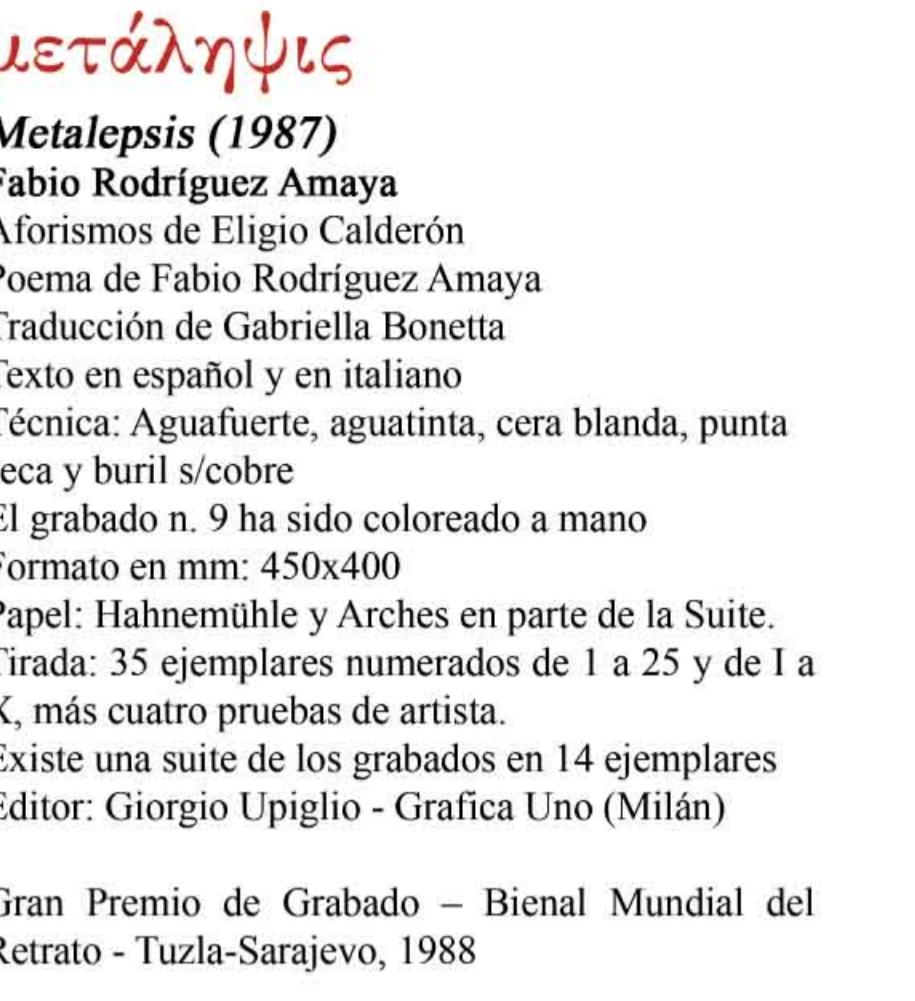

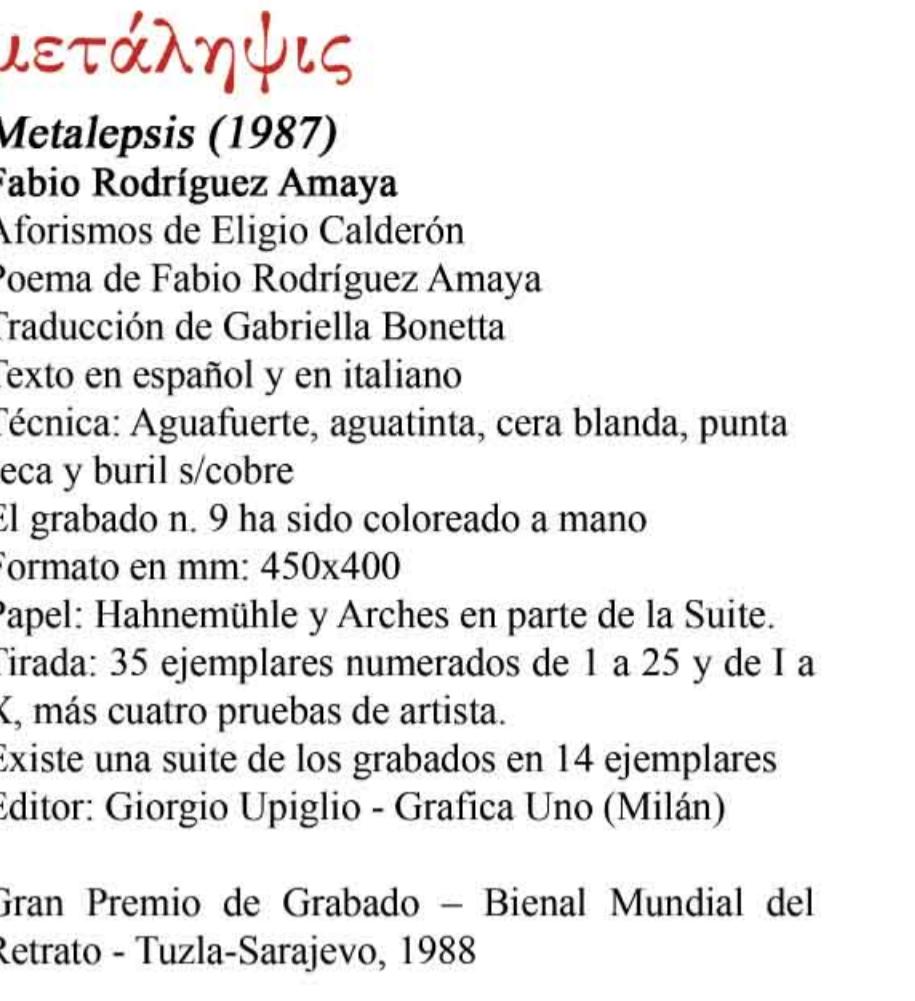

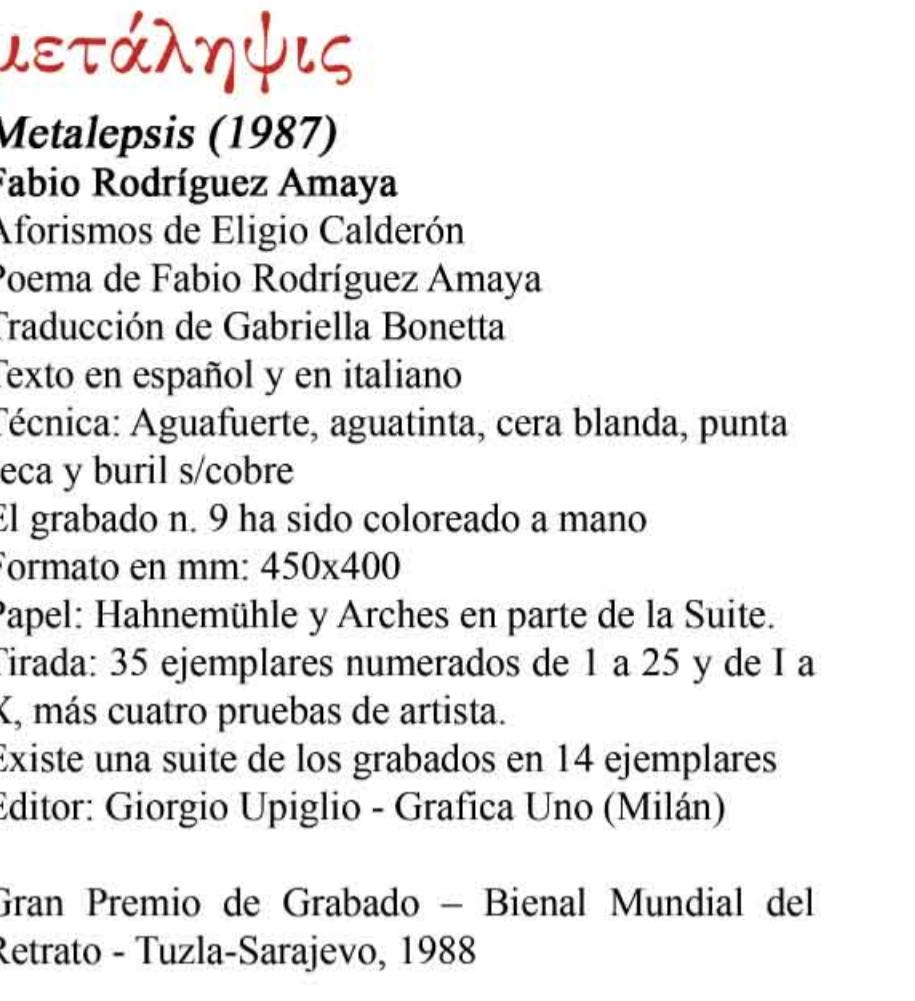

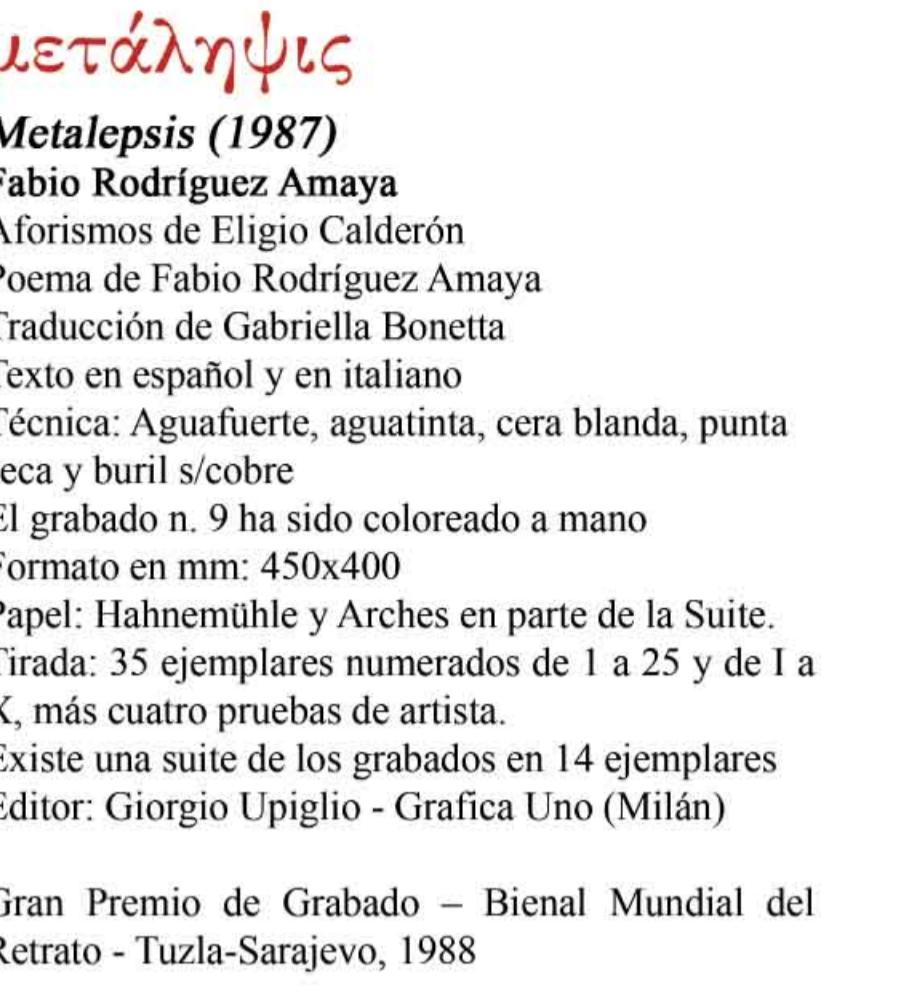

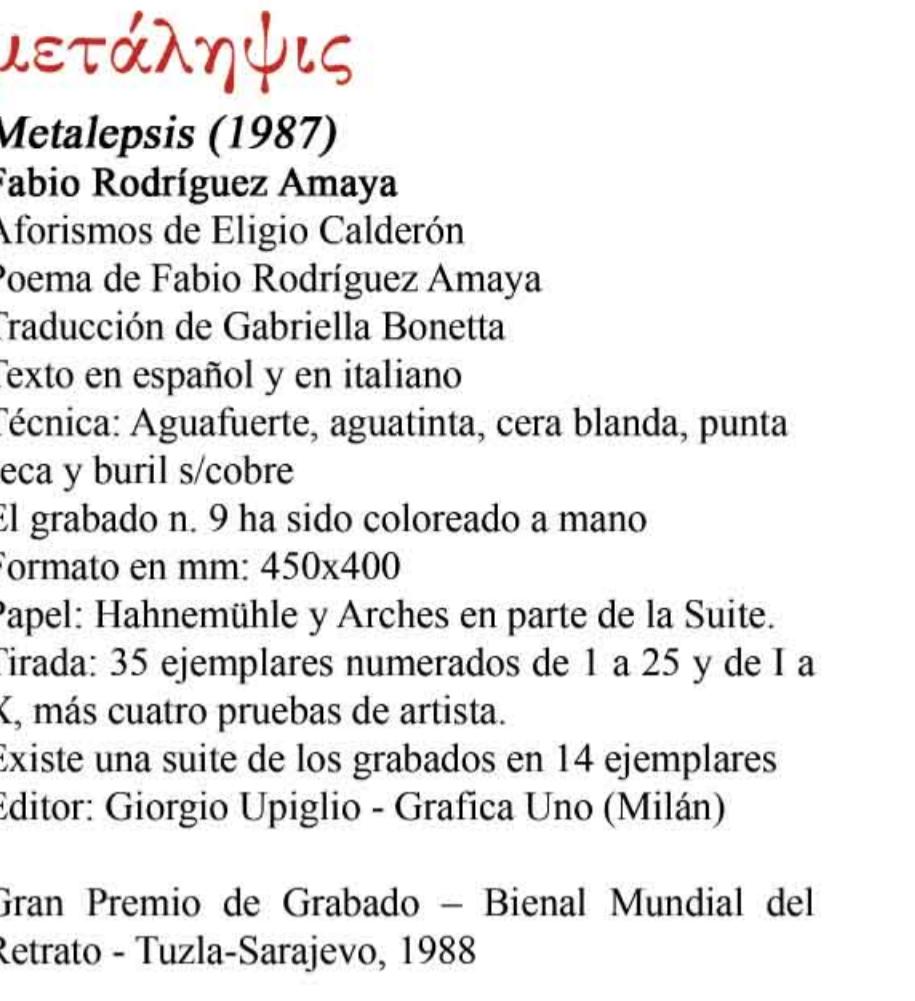

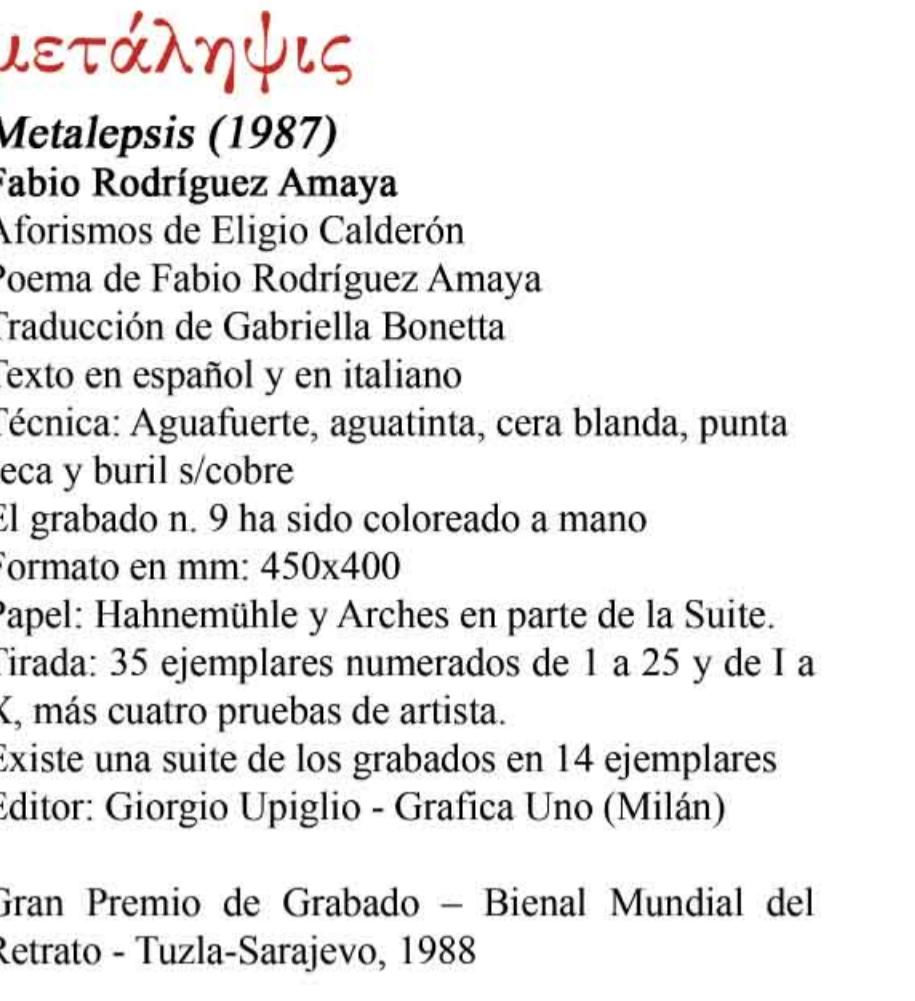

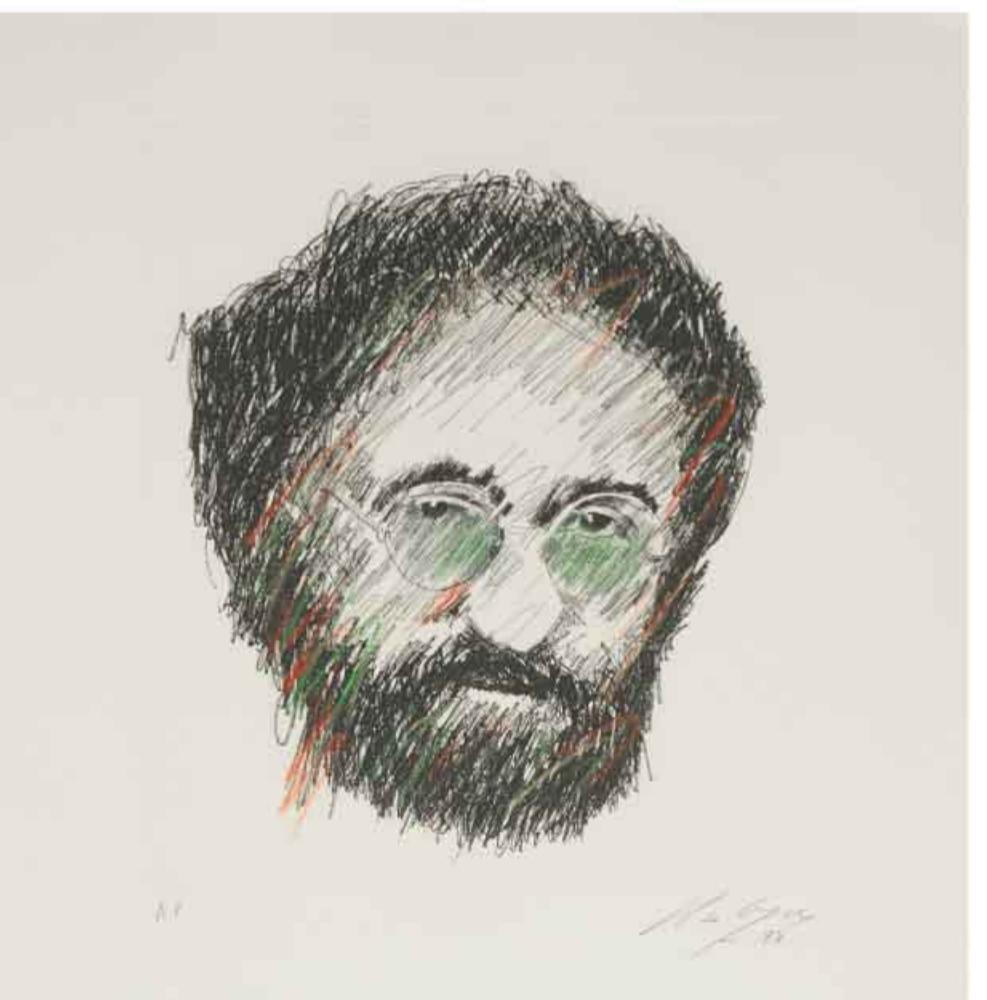

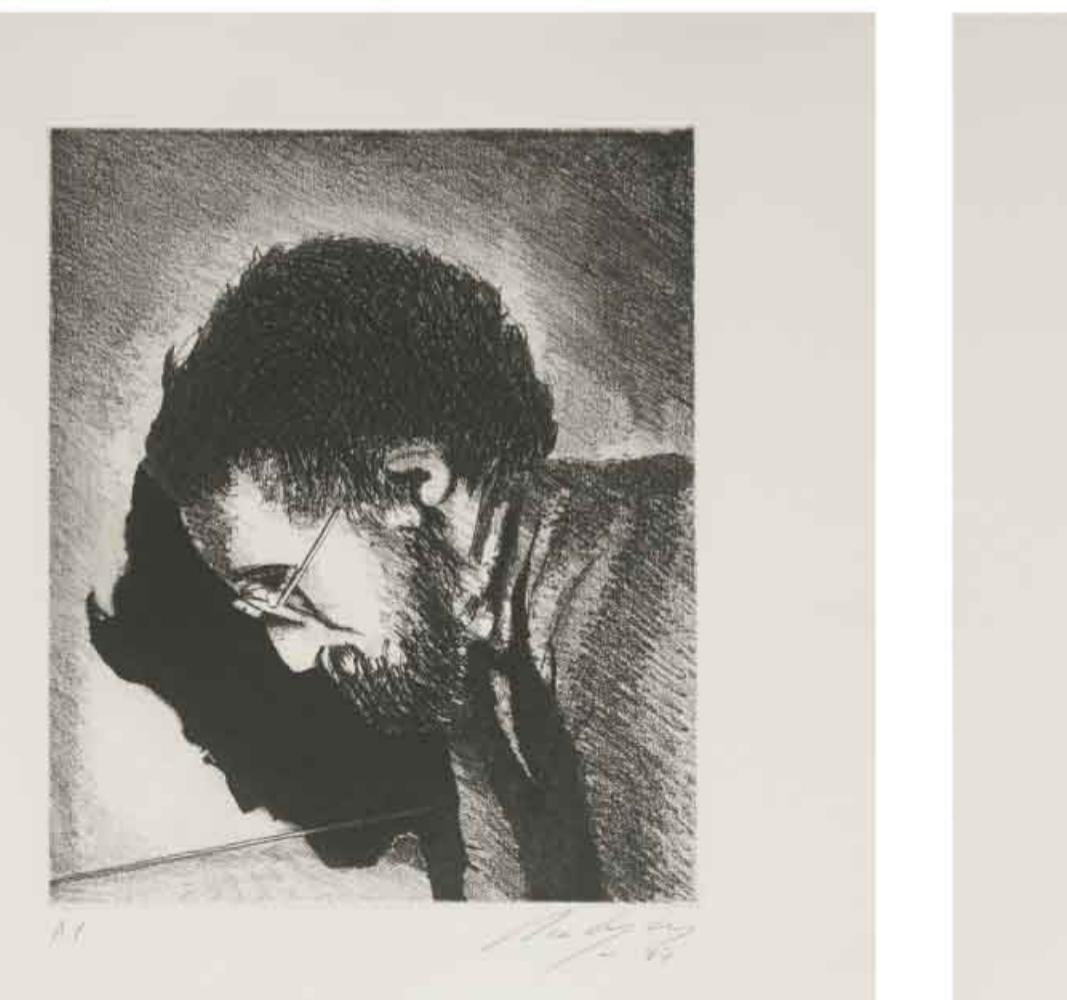

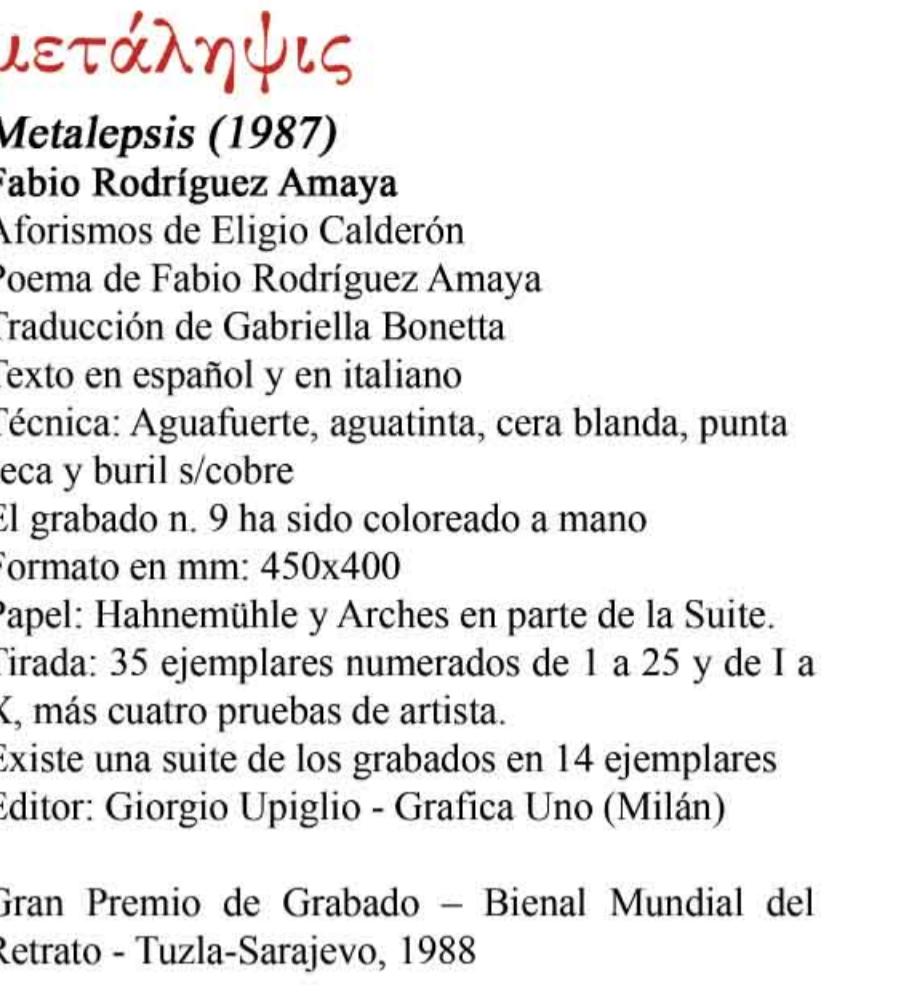

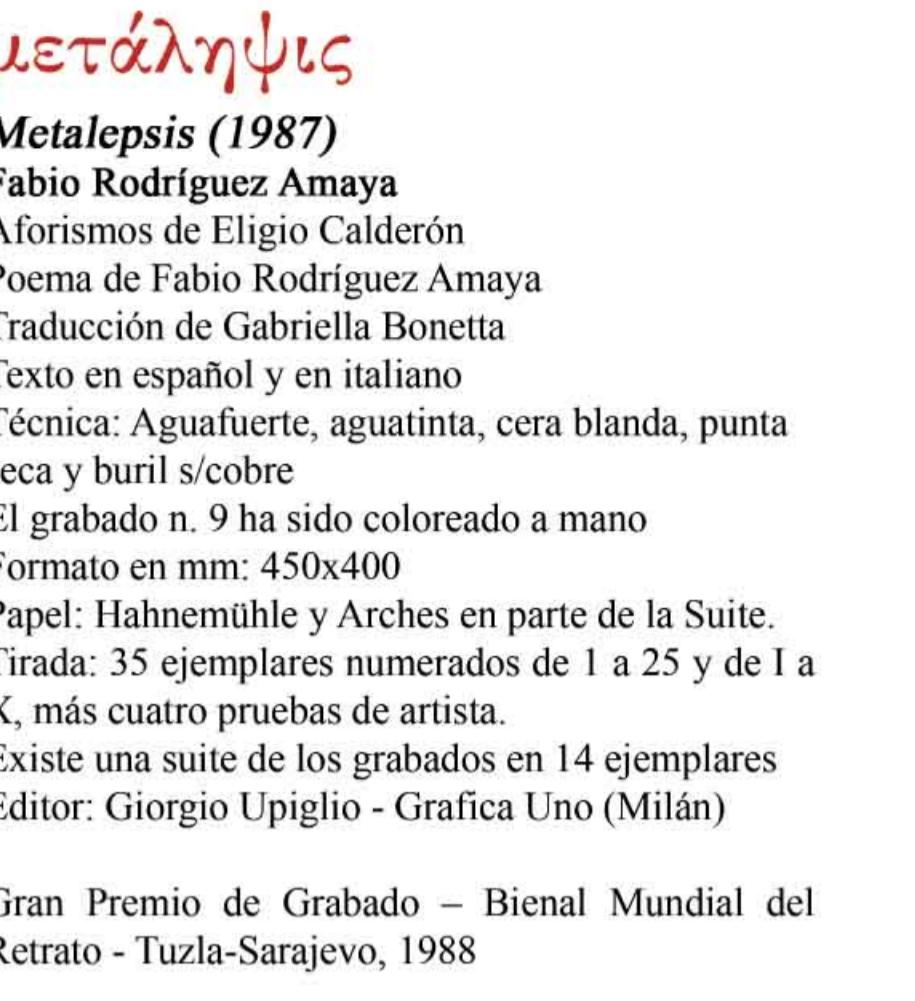

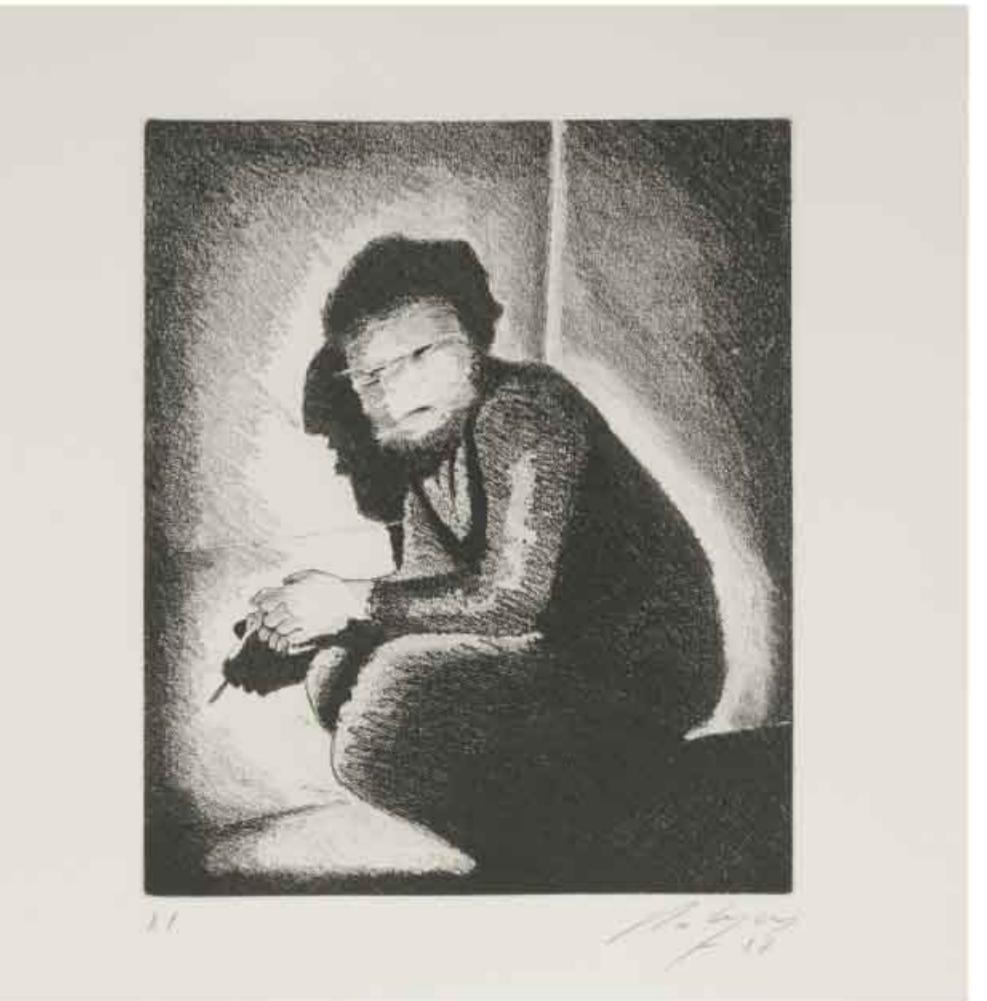

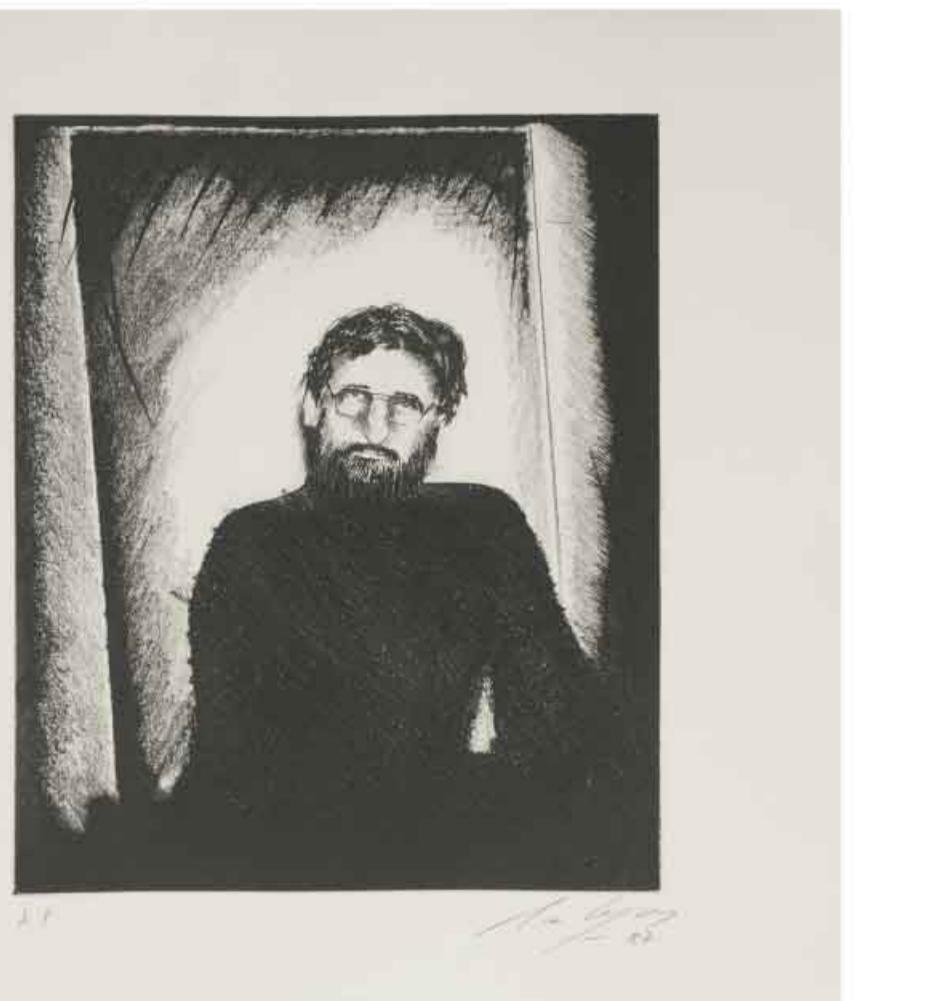

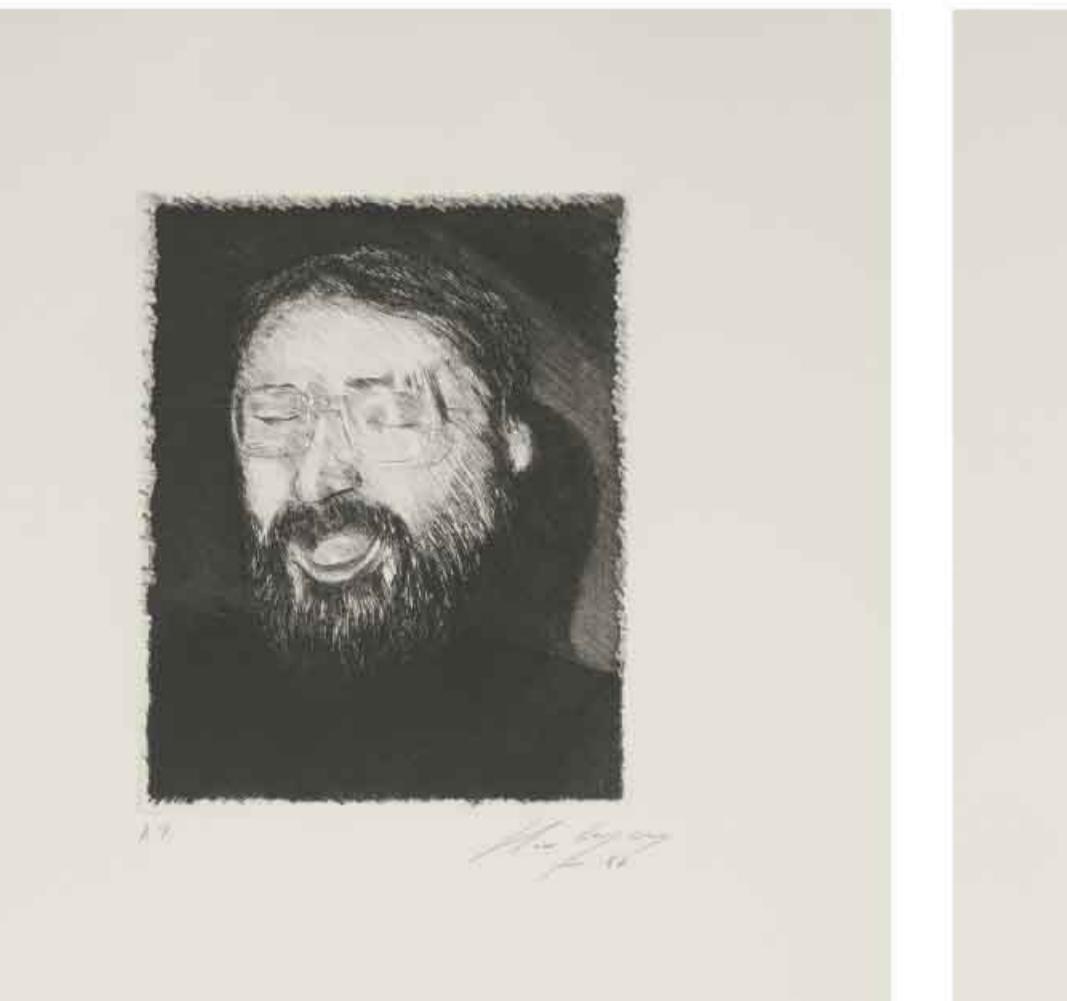

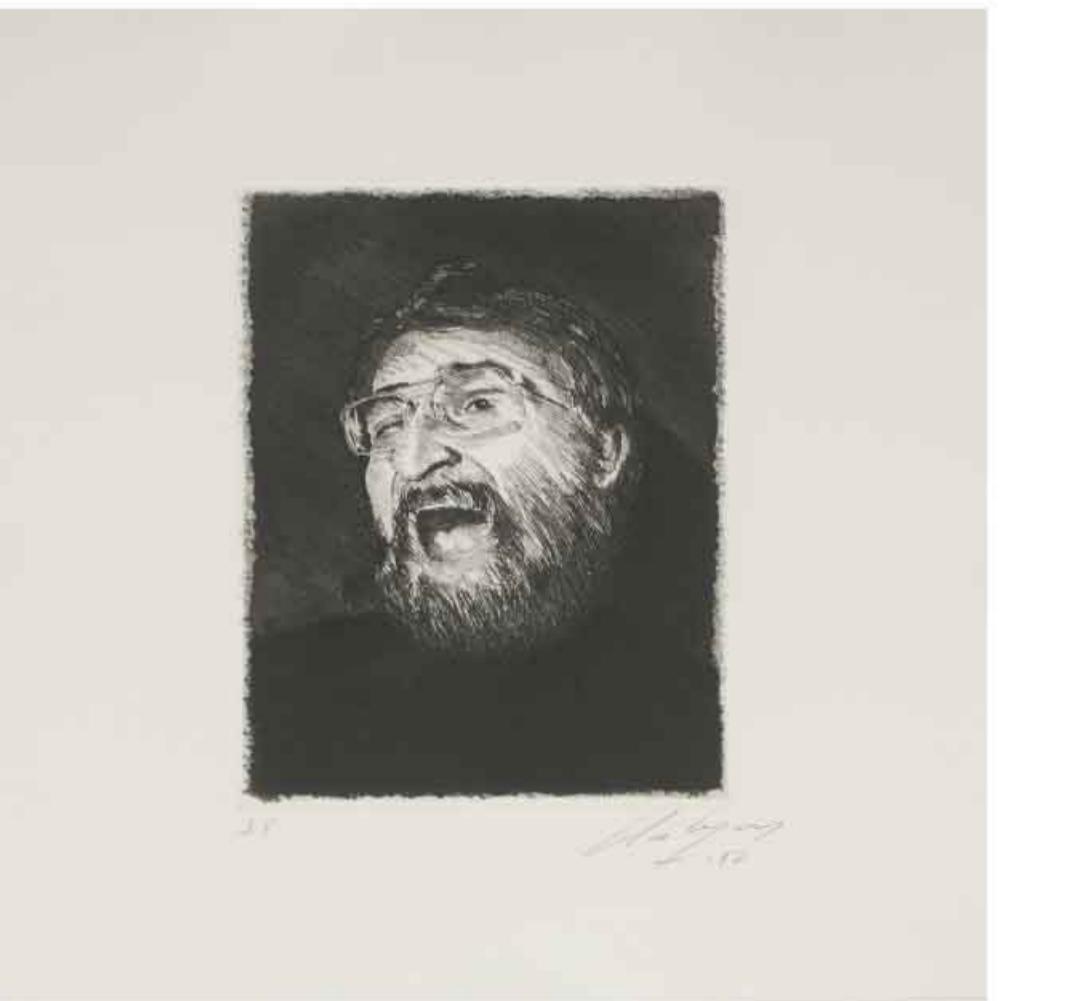

Metalepsis fue concebida por el autor con el propósito de alentar a sus contemporáneos a manifestar, en todas sus formas, su propia "dramaturgia del dolor", como dice el que escribió los aforismos que acompañan a esta obra.

Dedicada a Ximena, a Yolanda y a Giorgio:
τὸν παθεῖ μαθός

Componen
este portafolio nueve grabados realizados usando los siguientes
procedimientos: cera blanda, aguafuerte, aguatinta, punta seca y
buril sobre placas de cobre.

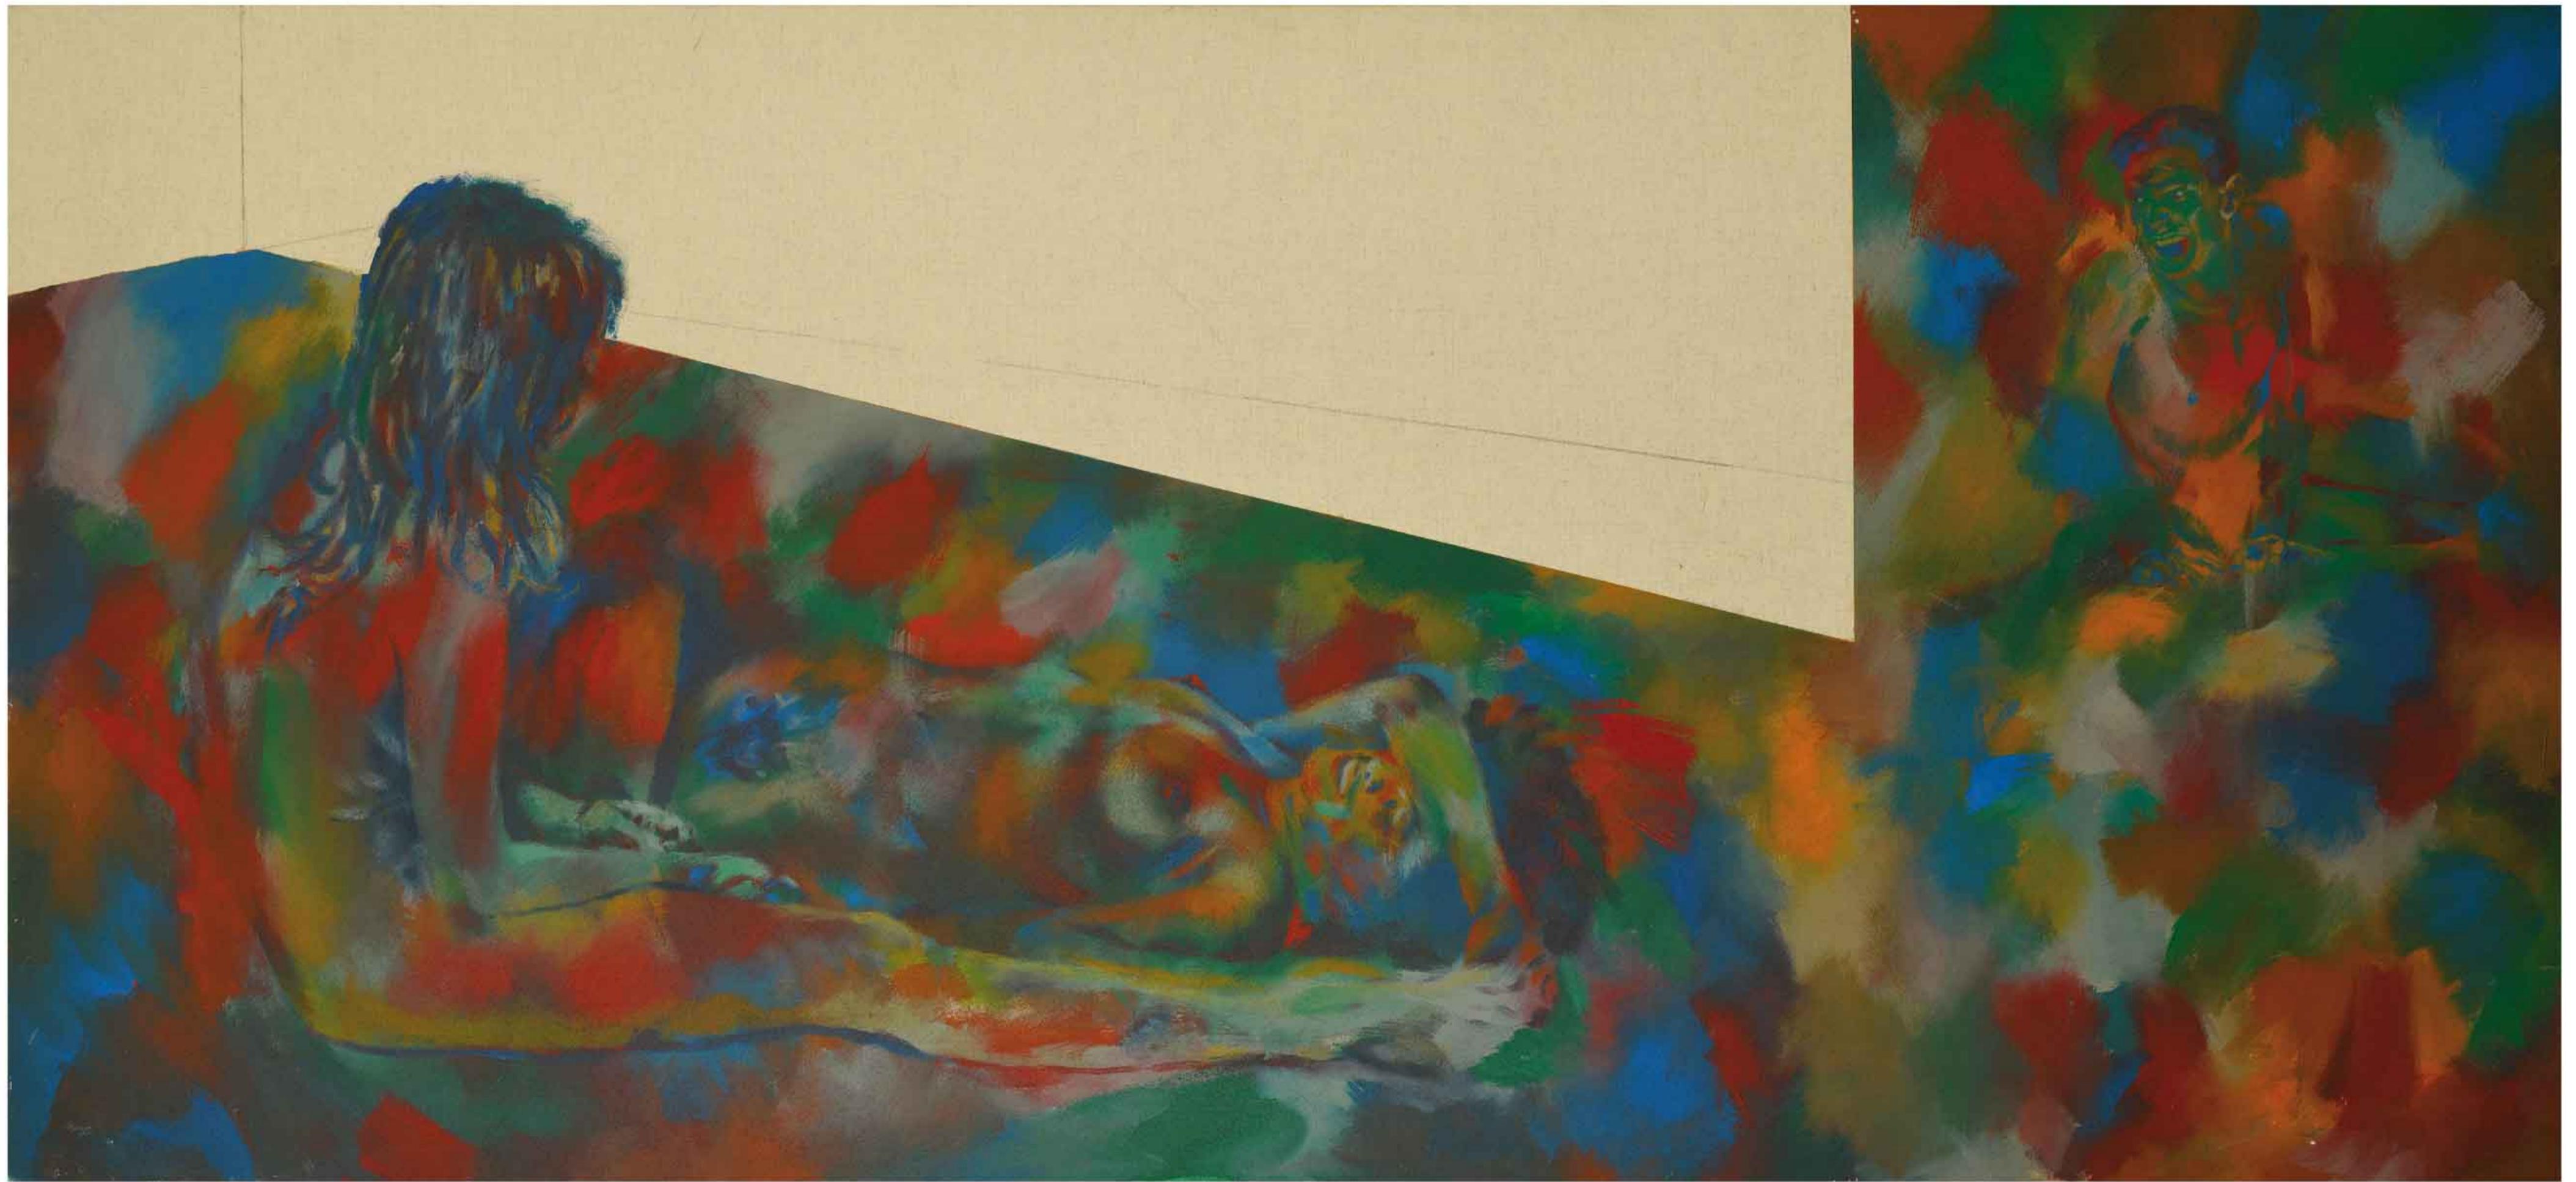

Los grabados y la introducción a *Metalepsis* son de Fabio Rodríguez Amaya,
los aforismos fueron escritos por Eligio Calderón Rodríguez y la versión
italiana de todos los textos es de Gabriella Bonetta.

Queda en la mueca,
en el gesto de cal
de la máscara;
el filo espectral
de un auto de fe.
