Bolk's Companions for the Study of Medicine:
Why not look through different glasses!

Want to see medicine through another lens?

Embryology, biochemistry, anatomy, physiology; *these basic medical sciences become quite familiar to you during Medical School. The shape of the human body, how it develops, and which processes occur in health and illness, is all part of daily study material. In reading the recommended literature, during lectures and practice sessions, you learn to focus on, analyze, and explain your subject microscopically. You probably do not usually realize that this scientific method is just one of the ways to look at medicine.*

Get more out of your medical studies...

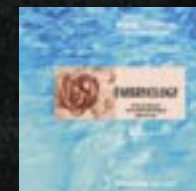

There is another method to research the human being, illness, and the process of healing, which does not require you to let go of all you that have learned up till now. This is the *phenomenological method*. The scientific method looks at biological processes through a magnifying glass, the phenomenological approach steps back from the subject and then brings more insight into the coherence and the meaning of the same facts. The added value that phenomenology brings can then be a deeper understanding of, for instance, the relation between body and mind. As you can well see, this will lead to a better insight into the problems of the individual patient.

Curious?

The Louis Bolk Institute in Holland has published the series "*Bolk's Companions for the Study of Medicine*". These compact volumes allow you to get to know phenomenology right during the first years of studying medicine. Practicing physicians have written the clear, short, and easily read texts, available at a good price. The structure of the Companions is similar to the textbooks that are used at most medical schools, which allows you to use them side by side. You can get to know phenomenology this way and experience the added value it may have for the course of your studies.

Available titles

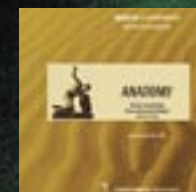

EMBRYOLOGY – *Early Development from a phenomenological point of view.*
Guus van der Bie, M.D.
Ordering number GVO 01. ISBN: 90-74021-29-8
Price € 12.00, including postage and handling.

BIOCHEMISTRY - *Metabolism from a phenomenological point of view.*
Christa van Tellingén, M.D.
Ordering number GVO 02. ISBN: 90-74021-28-X
Price € 12.00, including postage and handling.

ANATOMY – *Human Morphology from a phenomenological point of view.* Guus van der Bie, M.D.
Ordering number GVO 03. ISBN: 90-74021-30-1.
Price € 12.00, including postage and handling.

PHYSIOLOGY – *Organ Physiology from a phenomenological point of view.*
Christa van Tellingén, M.D.
Ordering number GVO 04. ISBN: 90-74021-27-1
Price € 12.00, including postage and handling.

IMMUNOLOGY and PHARMACOLOGY
will appear soon.
